Basic Nursing

Saunders Comprehensive Review for the NCLEX-PN® Examination - E-Book

Skills Performance Checklists for Clinical Nursing Skills & Techniques8

Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text’s focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter’s case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

Taking all the expert nursing content and student-friendly features of Potter and Perry ’ s Fundamentals text and streamlining it into a shorter format, Essentials for Nursing Practice, 8th Edition is the perfect choice to help busy nursing students master all the fundamental nursing principles in less time! This new 8th edition contains the nursing principles, concepts, skills, and easy-to-follow format that nursing students have come to love about Potter and Perry ’ s Basic Nursing — all updated with the latest information, visuals, and learning features. Plus, this reinvigorated Essentials text is streamlined and re-designed to work better with the rest of your books. It also comes with a wide array of online learning tools (free with book purchase) to help you master the important nursing concepts and skills with ease. Progressive case studies are introduced at the beginning of the chapter and are then used to tie together the care plan, concept map, clinical decision-making exercises, and QSEN scenarios. Safety guidelines for nursing skills sections precede each skills section to help you focus on safe and effective skills performance. Nursing skills at the end of each chapter feature full-bleed coloring on the edge of the page to make them easy to locate. UNIQUE! Clinical Decision-Making exercises coordinate directly with the progressive case study presented in the chapter. Focused Patient Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. Evaluation boxes bring everything together after nursing interventions have been implemented. Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. NEW! QSEN scenarios present a clinical situation followed by an open-ended question designed to help you understand and apply these core competencies. NEW! Chapter on professional nursing includes information on QSEN, prioritization, delegation, and professional levels. NEW! Completely revised review questions contain a strong mix of clinical thinking and application-level questions. NEW! Content on the impact of exercise covers its influence on disease reduction, compassion fatigue, lateral violence, cyber bullying, social media implications, caregiver strain, and safe patient handling. NEW! Expanded use of Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a description of how the study has affected nursing practice — in every chapter. NEW! Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. These will related to the chapter case studies when possible.

This book was an amalgamation of 120 contributors from various fields of nursing throughout Malaysia who shared their opinions and experiences in privileging this book for the nursing practice. The Malaysian Nursing Board collaborated during the later stages of the manuscript development to ensure complete and accurate content. The scope of skills encompasses basic nursing and specialised care procedures. It has 17 units of basic and specialised components of care that comprises 136 procedures essential in nursing practice. The book was created based on the requirements of 14 ADLs covering the following aspects; Fundamental of Nursing, Vital Signs, Personal Hygiene, Bed Making, Moving and Positioning, Maintaining Airway and Oxygenation, Oral and Entrenal Nutrition, Specimen collection, Bowel and Elimination, Comfort Measures, Medication, Intravenous, Wound Care, Bandages, Intraoperative Procedures, Special Procedures and Care After Death. The skills and procedures were selected and consulted with experienced clinicians, nursing lecturers, nurse instructors and significant others whom we had wisely sought to ensure the book quality is sure-fire.

The Art and Science of Nursing Care

This innovative text presents nursing fundamentals in a concise, visually attractive format that captures students’ attention and addresses dramatic changes taking place in the health care environment. At the heart of this revision is the critical thinking model presented as a practical, clinical decision-making guide and applied to the nursing process throughout. Case studies in all clinical chapters bring this process to life, demonstrating to students how using the combination of critical thinking and the nursing process will help them deliver comprehensive, professional care. Case studies introduce the client, family and nurse, and follow them through synthesizing knowledge and assessment data, planning and evaluating care. It addresses community health care and health promotion by consistently organizing each implementation section into three main areas: health promotion, acute care, and restorative care. Other themes include delegation, multidisciplinary collaboration, focus on outcomes, cultural sensitivity, gerontologic principles, and client satisfaction. * Complete coverage of fundamentals in a concise, readable, visually appealing format. * Five-step nursing process provides a consistent framework in all clinical chapters. * Hundreds of color photographs and drawings increase educational value while adding visual appeal. * Client teaching covered in both narrative and boxes to highlight this key nursing role. * Skills are presented in a clear, two-column format with rationales for all steps. NEW FEATURES: * Critical thinking model provides a practical, clinical decision-making guide applied to the nursing process. * Case studies in all clinical chapters include the client, family and nurse, and are developed throughout the chapter to demonstrate the ongoing nature of nursing care. * Implementation consistently addresses health promotion, acute care, and restorative care to reflect the current focus on community-based nursing and health promotion. * Skills include guidelines to assist nurses when delegating to unlicensed assistive personnel, Critical Decision Points, Recording and Reporting, and Home Care Considerations. * Expanded evaluation includes both the nurse’s and client’s perspectives to stress today’s “customer satisfaction” emphasis. * Care Plans based on the case studies highlight key assessment data and include client goals and expected outcomes. * Procedural Guidelines provide step-by-step instructions for performing basic skills in a clear and concise format. * Cultural focus is reflected throughout and in special boxes to highlight the importance of cultural sensitivity. * Collaborative care and multidisciplinary problems are addressed in narrative and care paths/maps to reflect current health care focus.
