**International Code of Conduct on Pesticide Management**

The understanding that some pesticides are more hazardous than others is well established. Recognition of this is reflected by the World Health Organization (WHO) Recommended Classification of Pesticides by Hazard, which was first published in 1975. The document classifies pesticides in one of five hazard classes according to their acute toxicity. In 2002, the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) was introduced, which in addition to acute toxicity also provides classification of chemicals according to their chronic health hazards and environmental hazards.

The Book o Pest Control is a truly powerful book and I recommend it as a must read. This book should be mandatory reading for you when starting out in a pest control business as it contains vital education for you. What makes this book so great is that it explains all the intricate details involved in starting your pest control business, primarily how to plan and set up your business for maximum profit. Nathan will show you how to dramatically improve your start in the business and how to improve your knowledge base. The Book on Pest Control is truly an insight into what is behind putting a business together. This book contains your next steps on how to set up your business for success, as well as information on major pests that you will come across and the methods in controlling them. If you are looking to get into the pest control business, you must read this book.
