*A comprehensive guide to the burgeoning hedge fund industry Intended as a comprehensive reference for investors and fund and portfolio managers, Handbook of Hedge Funds combines new material with updated information from Francois-Serge L’habitant’s two other successful hedge fund books. This book features up-to-date regulatory and historical information, new case studies and trade examples, detailed analyses of investment strategies, discussions of hedge fund indices and databases, and tips on portfolio construction. Francois-Serge L’habitant (Geneva, Switzerland) is the Head of Investment Research at Kedge Capital. He is Professor of Finance at the University of Lausanne and at EDHEC Business School, as well as the author of five books, including Hedge Funds: Quantitative Insights (0-470-85667-X) and Hedge Funds: Myths & Limits (0-470-84477-9), both from Wiley.*

*An Invitation There’s no place Like Rome. Founded in 753 BC, according to legend by the city’s first king, Romulus, it was the world’s headquarters for over a thousand years during the Empire. The city contains layers upon layers of archeological treasures. A center of art and architecture, culture and cuisine, Rome is one of the most visited cities in the world. I invite you on a three-month journey inside Rome and beyond through the Journal of your tour guide, Kristin, her husband, Andrew, and their six-month-old English springer spaniel, Titus Livius–Livy for short. Yes, you read that right, they are traveling with a six-month-old puppy, and that’s not half as funny as the tales you will read along the way. This isn’t Kristin and Andrew’s first rodeo. In fact, they have traveled together to over one hundred countries, so you will be in their good, capable hands. Kristin was a Classical Humanities major at The Ohio State University and has carried a passion for history with her throughout their travels. She continues to be an avid student of history, as is evident in the bibliography that follows, and she has a true gift for bringing history to life in an interesting and entertaining way. In addition to travel and history, Kristin and Andrew are avid foodies. Throughout your journey, you will read some mouthwatering descriptions of feasts you can almost taste. Speaking of food, your journey’s icing on the cake is a trip through Greece. Located at the geographic and historic crossroads of Europe, Asia, and Africa, Greece is considered the cradle of Western civilization. The territory was annexed by Rome from 146 BC, thus becoming an integral part of Rome’s vast empire. This promises to be a wonderful journey with all the spectacular sights you will see, the interesting history you will learn, and the engaging culture you will experience. Come join them for a fun, funny, and fantastic trip through Rome, Greece, and history. We’ll leave the driving to Andrew! Tom Henz*

WIPO Intellectual Property Handbook

Systematically & Mercilessly Realigning the World of Cycling

*This is a general reference work on all aspects of intellectual property, including international treaties and conventions, analyses of all fields of intellectual property, its administration, enforcement and teaching, technological and legal developments, and WIPO’s work in its Member States. It covers issues including electronic commerce, biotechnology, traditional knowledge and management of copyright and related rights and WIPO’s vision and approaches to meet new challenges with a widening circle of partners. Can be used as a key reference work by creators, innovators, intellectual property lawyers, government officials, university teachers and students.*

*Initially, the only electric loads encountered in an automobile were for lighting and the starter motor. Today, demands on performance, safety, emissions, comfort, convenience, entertainment, and communications have seen the working-in of seemingly innumerable advanced electronic devices. Consequently, vehicle electric systems require larger capacities and more complex configurations to deal with these demands. Covering applications in conventional, hybrid-electric, and electric vehicles, the Handbook of Automotive Power Electronics and Motor Drives provides a comprehensive reference for automotive electrical systems. This authoritative handbook features contributions from an outstanding international panel of experts from industry and academia, highlighting existing and emerging technologies. Divided into five parts, the Handbook of Automotive Power Electronics and Motor Drives offers an overview of automotive power systems, discusses semiconductor devices, sensors, and other components, explains different power electronic converters, examines electric machines and associated drives, and details various advanced electrical loads as well as battery technology for automobile applications. As we seek to answer the call for safer, more efficient, and lower-emission vehicles from regulators and consumer insistence on better performance, comfort, and entertainment, the technologies outlined in this book are vital for engineering advanced vehicles that will satisfy these criteria.*

A Clear Outline of Current Methods for Designing and Implementing Automotive Systems Highlighting requirements, technologies, and business models, the Automotive Embedded Systems Handbook provides a comprehensive overview of existing and future automotive electronic systems. It presents state-of-the-art methodological and technical solutions in the areas of in-vehicle architectures, multipartner development processes, software engineering methods, embedded communications, and safety and dependability assessment. Divided into four parts, the book begins with an introduction to the design constraints of automotive-embedded systems. It also examines AUTOGAR as the emerging de facto standard and looks at how key technologies, such as sensors and wireless networks, will facilitate the conception of partially and fully autonomous vehicles. The next section focuses on networks and protocols, including CAN, LIN, FlexRay, and TTCAN. The third part explores the design processes of electronic embedded systems, along with new design methodologies, such as the virtual platform. The final section presents validation and verification techniques relating to safety issues. Providing domain-specific solutions to various technical challenges, this handbook serves as a référale,

complete and well-documented source of information on automotive embeded systems.

Every one of the many millions of cars manufactured annually worldwide uses shock absorbers, otherwise known as dampers. These form a vital part of the suspension system of any vehicle, essential for optimizing road holding, performance and safety. This, the second edition of the Shock Absorber Handbook (first edition published in 1999), remains the only English language book devoted to the subject. Comprehensive coverage of design, testing, installation and use of the damper has led to the book’s acceptance as the authoritative text on the automotive applications of shock absorbers. In this second edition, the author presents a thorough revision of his book to bring it completely up to date. There are numerous detail improvements, and extensive new material has been added particularly on the many varieties of valve design in the conventional hydraulic damper, and on modern developments such as electrorheological and magnetorheological dampers. "The Shock Absorber Handbook, 2nd Edition" provides a thorough treatment of the issues surrounding the design and selection of shock absorbers. It is an invaluable handbook for those working in industry, as well as a principal reference text for students of mechanical and automotive engineering.

Includes Errata Sheet of Notice to Mariners (NTM) 22/13. This book contains a complete copy of the Inland and International Navigation Rules as presented by the United States Coast Guard. The Coast Guard requires that an up-to-date copy such as this one be carried on all vessels 12 meters (39 feet) or more in length at all times.In addition to a complete copy of the USCG edition (COMDTINST M16672.2D), Paradise Cay Publications has added the following features to make our book more useful and comprehensive.

1) We have created an Annotated Contents. This added feature will help guide the reader to a desired rule. The topic of each subsection of the rules has been noted for quick reference along with the page numbers for Inland and International Rules. 2) We have updated this edition for corrections presented in Notice to Mariners up through November 15, 2004. 3) We have included detailed instructions on how to log on to the NGA (National Geospatial-Intelligence Agency, formerly NIMA) website and update this Rules Publication.
