Brands are among the most valuable assets of most of today's corporations. Brand names are the lingua franca of commerce. Branding is all about brands in both the packaged goods and the services industries - how to develop them, how to protect them, how to use them

effectively. It combines the practical experience of marketing executives, trade mark lawyers, designers, advertising agents and others. It provides an international perspective on branding and is the first, authoritative book written on this increasingly important subject.

A Mind Always in Motion: The Autobiography of Emilio Segrè

*An Introduction to Sustainable Transportation
(Mar 99 - 02) T to 52*

The Exploited Child

This investigation of child labor explores difficult conceptual and public policy issues. It demonstrates the sheer prevalence of the commercial exploitation of child labor in both industrial and developing countries, and its rapid growth today under the twin pressures of mass poverty and the globalized

marketplace for labor. In addition to its rich empirical material from countries in Asia, Latin America, Africa, and Europe, the author makes a clear distinction between the socialization of children through labor within the family and their economic exploitation for profit. It also focuses on the role of adults with responsibility for children, and the specific form which paternal domination takes towards children.

Born in Italy to a well-to-do Jewish family, Emilio Segrè (1905-1989) became Enrico Fermi's first graduate student in 1928, contributed to the discovery of slow neutrons and was appointed director of the University of Palermo's physics laboratory in 1936. While visiting the Radiation Laboratory in Berkeley, California in 1938, he learned that he had been dismissed from his Palermo post by Mussolini's Fascist regime. Ernest O. Lawrence hired him to work on the cyclotron at Berkeley with Luis Alvarez, Edwin McMillan, and Glenn Seaborg. Segrè was one of the first to join Oppenheimer at Los Alamos, where he became a group leader on the Manhattan Project. In 1959, he won the Nobel Prize in physics for the discovery of the antiproton. He was a professor of physics at UC Berkeley from 1946 until 1972. "[A] readable, absorbing, interesting autobiography... A valuable contribution by a person who witnessed the development of much of modern nuclear physics. Segrè's

description of the historic neutron experiments performed in Rome during the mid-1930s by Enrico Fermi's group, of which Segrè was a member, is of inestimable worth." – Glenn T. Seaborg, *Physics Today* "A Mind Always in Motion is Emilio Segrè's account – published four years after his death in 1989 – of his personal life and his life in physics... It is absorbing, moving in places and frequently revealing. Segrè noted in his preface, 'I have not sought to display manners and tact I never had, and I have tried to treat myself no better than any one else.' He ably succeeded in these purposes." – Daniel J. Kevles, *Nature* "For general readers with an interest in the history of nuclear physics, Segrè... is among the most personable witnesses." – *Publishers Weekly*

Fashion law encompasses a wide variety of issues that concern an article of clothing or a fashion accessory, starting from the moment they are designed and following them through distribution and marketing phases, all the way until they reach the end-user. Contract law, intellectual property, company law, tax law, international trade, and customs law are of fundamental importance in defining this new field of law that is gradually taking shape. This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective renders more interesting. The volume seeks to sketch out

the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

Transportation plays a substantial role in the modern world; it provides tremendous benefits to society, but it also imposes significant economic, social and environmental costs. Sustainable transport planning requires integrating environmental, social, and economic factors in order to develop optimal solutions to our many pressing issues, especially carbon emissions and climate

change. This essential multi-authored work reflects a new sustainable transportation planning paradigm. It explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility management solutions to transportation problems. This text reflects a fundamental change in transportation decision making. It focuses on accessibility rather than mobility, emphasizes the need to expand the range of options and impacts considered in analysis, and provides practical tools to allow planners, policy makers and the general public to determine the best solution to the transportation problems facing a community. Featuring extensive international examples and case-studies, textboxes, graphics, recommended reading and end of chapter questions, the authors draw on considerable teaching and researching experience to present an essential, ground-breaking and authoritative text on sustainable transport. Students of various disciplines, planners, policymakers and concerned citizens will find many of its provocative ideas and approaches of

considerable value as they engage in the processes of understanding and changing transportation towards greater sustainability.
