and natural products chemistry (in relation to drug molecules). Clearly structured to enhance student understanding, the book is divided into six clear sections. The book opens with an overview of general aspects of chemistry and their importance to modern life, with particular emphasis on medicinal applications. The text then moves on to a discussion of the concepts of atomic structure and bonding and the fundamentals of stereochemistry and their significance to pharmacy- in relation to drug action and toxicity. Various aspects of aliphatic, aromatic and heterocyclic chemistry and their pharmaceutical importance are then covered with final chapters looking at organic reactions and their applications to drug

"The Development of American Pharmacology is the first comprehensive history of the emergence of the science of pharmacology as an independent discipline in the United States. Central to the story is John J. Abel (1857-1938), widely regarded as the "father of American pharmacology." A student of the University of Michigan and Johns Hopkins, Abel received his M.D. degree at the University of Strassburg and helped introduce German knowledge of pharmacology to his American colleagues. At the University of Michigan, he was appointed to the first chair of

The special features that distinguish Foundations of Community Medicine in its present form are: Contains well-organized material which is singularly free from repetition, confusion and uncertainty and which ensures availability of all the relevant information on a topic at one place. Lays adequate stress on applied aspects of preventive medicine and public health with focus on Indian situation. Contains detailed description of public health practices, namely, immunization, disinfection and sterilization, notification, isolation and quarantine, public health

surveillance and population screening. Extends a managerial treatment to the description of health organizations, health programmes and health care systems existing in the country. Incorporates a comprehensive coverage of physical, social and biological environments laying due stress on environmental pollution and its control. Provides adequate information on occupational hazards and industrial problems in consideration of the advancing industrialization in India. Encompasses an elaborate exposition on important issues

concerning maternal health, infant health, child health, adolescent health and geriatric health in an exclusive section devoted to personal health care. Presents a uniquely simplified and readily intelligible discourse on basic concepts of epidemiology and statistics which are usually abhorred by medical students. Incorporates a detailed description of the National Population Policy and National Health Policy in consideration of their crucial importance in the formulation of National Health Care Programmes for the country. Contains numerous comparison tables,

flowcharts, graphs and diagrams to improve comprehension and facilitate retention of the subject matter. Encloses multiple solved examples on epidemiology, vital statistics and basic statistics to enable the students to calculate rates, ratios and statistical values of applied significance. Contains elaborate discussion on Indian population problem, human disasters as well as emerging and re-emerging diseases. Provides adequate information on Indian health systems, hospital acquired infection and hospital waste management. Covers detailed

discussion on adolescent health care, mental disorders and millennium development goals. About the Author : - G.M. Dhaar, Professor, Department of Community Medicine, SKIMS, Srinagar, India. Irfan Robbani, Associate Professor, Department of Community Medicine, SKIMS, Srinagar, India.

Saunders Nursing Survival Guide: Pharmacology, 2nd Edition is a study and review aid that provides students with additional information on this extensive and difficult subject area. It offers a visual, interactive approach that clearly explains topics such as drug pharmacodynamics, pharmacotherapeutics, and pharmacokinetics. Visual cues help the student retain the information by expressing the material in a fun, engaging manner with activities created

to appeal to students with different learning styles. NCLEX® review questions are included at the end of each chapter review and test the students' understanding of key topics. Take Home Points highlight the most important points to study or use in the clinical atmosphere. Caution Notes alert readers to urgent information about dangerous conditions and how to avoid them. Lifespan Notes point out age-related variations in signs and symptoms, nursing interventions, and patient teaching. Culture Notes highlight possible variations

related to a patient's cultural background. WebLinks direct readers to the Internet for additional resources. New introductory chapter highlights information on Drug Concepts pertinent to pharmacology. New chapter on drugs used to treat neuropsychiatric disorders covers the most important drugs, including anxiolytics/sedative-hypnotics, antidepressants, antipsychotics, and mood stabilizers. New information on anti-migraine medications gives students a better understanding of pain relief for

patients. Revised cardiovascular section presents the material in a more streamlined approach. Revised NCLEX® review questions include new alternate item format questions, as well as 80 new questions. What You WILL LEARN familiarizes students with clear chapter objectives. Tell Us What YOU Think page directs students to the Saunders Nursing Survival Guide survey site where their feedback is gathered. advances and information in medicine. Divided into 25 chapters, the text covers the diagnosis and management of diseases and disorders in all medical subspecialties. The second edition has been fully revised and features new topics including recent advances, new drugs, geriatrics, and immunology. Disease aetiology, diagnostic procedures, radiological investigations and basics of ECG readings are discussed in depth. Important clinical examination-oriented questions are included in each section, with key points

emphasised to assist revision.

The comprehensive text is highly illustrated with clinical photographs and diagrams.

Important management techniques are highlighted in coloured tables. Key points

Pharmacological knowledge among medical students can have a very short 'half life': students often fail not because they have failed to study, but because they have been unable to retain key knowledge and reproduce it in an exam setting. This book takes an alternative route to the conventional approach of comprehensively exploring

each individual drug and its features: not only can such an approach overwhelm and make knowledge retention difficult, but the current exam format makes questions structured in this way unlikely anyway. Instead of aiming to be completely comprehensive, it examines drugs systematically by classifications, mechanisms of action, therapeutic uses and side effects, enabling students to gain the distilled, functional grasp of pharmacology that their exams actually demand quickly and clearly.
