Philosophy Paper Outline Example

ETHICS: THEORY AND CONTEMPORARY ISSUES, 8E CONCISE presents the major areas of ethical theory through an engaging collection of contemporary moral debates. First, readers are introduced to such ethical subjects as religion and global ethics, utilitarianism and deontology, natural law ethics, virtue ethics, non-Western paradigms, feminist ethics, and care ethics. Then, these and other ethical concepts provide the framework for in-depth discussions on moral dilemmas such as euthanasia, sexual morality, economic justice, animal ethics, war, violence, and globalization. Plus, this edition brings the debate up-to-date with detailed discussions of timely moral topics such as same-sex marriage, structural racism, factory farming, pacifism, and global distributive justice. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This title, written by Robert A. Bowie, has been developed in consultation with OCR examiners to ensure that the materials is as effective for the specification as possible.

A man is imprisoned in a cell with a library. He discovers that no matter which book he turns to, each page unerringly describes what he has just thought and done. To demonstrate his freedom, he attempts to foil the predictions. Through twelve such intriguing and original short stories and plays, this innovative text brings to life the conceptual and substantive issues covered in introductory philosophy courses: determinism and freedom, God and suffering, morality, the nature of mind, appearance and reality, logic, and more. In a consistent five-part format that permits the instructor to choose the order of topics, each section presents a story illustrating the philosophical issues followed by pertinent questions, a discussion, classical and contemporary readings, and study questions.

Based on the premise that one of the best ways for a student to understand a topic is to write about it, this is a book that teaches students how to write philosophical essays. Geared toward first-time philosophy students, the book is a supplement for any Philosophy course in which the instructor requires the students to write essays. Most of the work involved in a Philosophy class is reading assigned material, thinking about it, and then writing about it – whether on an exam or in an essay written outside of class. This book is designed to make all three of those activities easier. Writing to Learn begins with helpful hints on how to read philosophy (chapter 2). In chapters 3 through 7 students are guided through several different types of essays, beginning with the simplest summaries that demonstrate knowledge and understanding, and progressing through essays that require the application of theories to new situations, the analysis and evaluation of arguments used, and finally, the synthesis of several theories or arguments.

Exercises in Philosophical Thinking, Reading, and Writing
Philosophical Analysis in the Twentieth Century, Volume 1
This is an expanded and revised second edition of Peter Morton's highly acclaimed A Historical Introduction to the Philosophy of Mind, a text that combines primary readings with detailed commentary. The book has two aims: to present the philosophy of mind from a historical perspective so that the theories in the field are seen to emerge in the process of solving problems with earlier theories; and to give students access to original source material together with commentaries that explain technical terms and jargon, outline argumentative structures, and place the texts in their historical context. The second edition adds several new chapters covering recent issues in the field, and revises earlier chapters to improve the readings and update the commentaries.
The bestselling and field-defining textbook which has introduced generations of students to the field of practical ethics, now in a new fully-revised fifth edition For more than twenty years, Ethics in Practice has paved the way for students to confront the difficult ethical questions they will, must, or do already face. Accessible to introductory students yet sufficiently rigorous for those pursuing advanced study, this celebrated collection encourages and guides readers to explore ethical dimensions of important, controversial topics such as euthanasia, environmental action, economic injustice, discrimination, incarceration, abortion, and torture. In combining new and revised modern texts with works of classic scholarship, Ethics in Practice equips readers to consider wide-ranging ideas in practical ethics and to understand the historical basis for contemporary developments in ethical theory. Revisions and updates to the new edition of Ethics in Practice focus on covering pressing global issues and adding depth to key sections. Many sections have been expanded to offer more thorough coverage of topics in ethical theory. Edited by Hugh LaFollette, highly regarded for his contributions in the field of practical ethics, this important volume: Explores the connections between ethical theory and divisive contemporary debates Includes general and section introductions which map the conceptual terrain, making it easy for students to understand and discuss the theoretical and practical dimensions of the issues Offers up-to-date incisive discussion global, local, and personal ethical issues Provides original essays, new perspectives, and revisions of key critical texts Enables instructors to discuss specific practical issues, broader groupings of topics, and common themes that connect major areas in ethics Already a market-leading text for introductory and applied ethics courses, the latest edition of Ethics in Practice: An Anthology continues to bean essential resource for instructors and students in philosophy departments around the world.
Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years, UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education, as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is, however, still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore, there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. The Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical

Implementation offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats, as well as across the undergraduate and graduate sectors. The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments. While highlighting UDL in areas such as educational technology, student engagement, assignment design, and inclusive education, this book is ideally intended for inservice and preservice teachers, administrators, teacher educators, higher education professors and leaders, practitioners, researchers, academicians, and students interested in the integration of UDL into strategic academic plans.

This volume collects contributions from leading scholars of early modern philosophy from a wide variety of philosophical and geographic backgrounds. The distinguished contributors offer very different, competing approaches to the history of philosophy. Many chapters articulate new, detailed methods of doing history of philosophy. These present conflicting visions of the history of philosophy as an autonomous sub-discipline of professional philosophy. Several other chapters offer new approaches to integrating history into one's philosophy by re-telling the history of recent philosophy. A number of chapters explore the relationship between history of philosophy and history of science. Among the topics discussed and debated in the volume are: the status of the principle of charity; the nature of reading texts; the role of historiography within the history of philosophy; the nature of establishing proper context.

Ethics: Theory and Contemporary Issues

A Historical Introduction to the Philosophy of Mind - Second Edition

The claim that contemporary analytic philosophers rely extensively on intuitions as evidence is almost universally accepted in current meta-philosophical debates and it figures prominently in our self-understanding as analytic philosophers. No matter what area you happen to work in and what views you happen to hold in those areas, you are likely to think that philosophizing requires constructing cases and making intuitive judgments about those cases. This assumption also underlines the entire experimental philosophy movement: only if philosophers rely on intuitions as evidence are data about non-philosophers' intuitions of any interest to us. Our alleged reliance on the intuitive makes many philosophers who don't work on meta-philosophy concerned about their own discipline: they are unsure what intuitions are and whether they can carry the evidential weight we allegedly assign to them. The goal of this book is to argue that this concern is unwarranted since the claim is false: it is not true that philosophers rely extensively (or even a little bit) on intuitions as evidence. At worst, analytic philosophers are guilty of engaging in somewhat irresponsible use of 'intuition'-vocabulary. While this irresponsibility has had little effect on first order philosophy, it has fundamentally misled meta-

philosophers: it has encouraged meta-philosophical pseudo-problems and misleading pictures of what philosophy is.

The Philosophy Student Writer's Manual and Reader's Guide, Fourth Edition, is a set of instructions and exercises that sequentially develop citizenship, academic, and professional skills while providing students with knowledge about a wide range of philosophical concepts, phenomena, and information sources. Part 1 begins by teaching students to read newspapers and other media sources critically and analytically. It focuses on the crafts of writing and scholarship by providing the basics of grammar, style, formats, and source citation, and then introduces students to a variety of rich information resources. Part 2 provides advanced exercises in ethics, metaphysics, philosophy of the mind, philosophy of religion, and political philosophy.

A guide to writing about the fiction of Ernest Hemingway offers instructions for composing different types of essays and contains literary criticism, analysis, and suggested essay topics for individual works.

The 1896-1899 papers, few of which were published in Russell's lifetime, concentrate primarily on physics, arithmetic and the concept of quantity. Several views that later became well-known in his The Principles of Mathematics actually originate in his earlier work, and though incomplete,An Analysis of Mathematical Reasoning, forms a centrepiece of the volume.

Writing to Learn: An Introduction to Writing Philosophical Essays

While well-known for his book-length work, philosopher Peter Unger's articles have been less widely accessible. These two volumes of Unger's Philosophical Papers include articles spanning more than 35 years of Unger's long and fruitful career. Dividing the articles thematically, this first volume collects work in epistemology and ethics, among other topics, while the second volume focuses on metaphysics. Unger's work has advanced the full spectrum of topics at the heart of philosophy, including epistemology, metaphysics, philosophy of language and philosophy of mind, and ethics. Unger advances radical positions, going against the so-called "commonsense philosophy" that has dominated the analytic tradition since its beginnings early in the twentieth century. In epistemology, his articles advance the view that nobody ever knows anything and, beyond that, argue that nobody has any reason to believe anything--and even beyond that, they argue that nobody has any reason to do anything, or even want anything. In metaphysics, his work argues that people do not really exist--and neither do puddles, plants, poodles, and planets. But, as Unger has often changed his favored positions, from one decade to the next, his work also advances the opposite, "commonsense"

positions: that there are in fact plenty of people, puddles, plants and planets and, quite beyond that, we know it all to be true. On most major philosophical questions, both of these sides of Unger's significant work are well represented in this major two volume collection. Unger's vivid writing style, intellectual vitality, and fearlessness in the face of our largest philosophical questions, make these volumes of great interest not only to the philosophical community but to others who might otherwise find contemporary philosophy dry and technical.

A guide to writing philosophy essays which addresses the needs of instructors as well as students. It is a valuable aid to grading papers that facilitates communication between instructors and students. It also presents the steps of writing a philosophical essay. It addresses common mistakes and confusions about philosophical writing.

Qualitative Research Methods in Education and Educational Technology was written for students and scholars interested in exploring the many qualitative methods developed over the last 50 years in the social sciences. The book does not stop, however, at the boundaries of the social sciences. Social scientists now consume and use research methods from many fields. The rich resources of research methods and theories from both the humanities and philosophy are also covered in this book. It explains why postpositivist quantitative research should not be "the only game in town" and provides solid theoretical foundations, beginning with the positions of Plato and Aristotle, for broadening our horizons about what warrants our attention. Using Aristotle's concept of phronesis the author shows why methods such as narrative research and storytelling, hermeneutic inquiry, literary theory, philosophical inquiry, and much more have important applications in education and educational technology. On those foundations, the author also builds a framework for doing many types of research – from participatory action research to content analysis, to postmodern case studies, to empowerment research and philosophical inquiry. He accomplishes this through a combination of original text, summaries of exemplary research in education and educational technology, and suggested readings that are annotated and introduced at the end of each chapter. Many of these readings are available online and they extend the discussion of research methods or serve as exemplars of a particular type of educational technology research. There are open ended and conceptual questions for each reading, and developing your own answers to them is one way you can extend your depth of understanding about qualitative research methods in education and educational technology.

Writing Philosophy Papers

Philosophical Writing

Writing Philosophy

The present collection of seventeen papers, most of them already published in international philosophical journals, deals both with issues in the philosophy of logic, the philosophy of mathematics, the philosophy of language and epistemology. The first part contains critical assessments and somewhat deviant renderings of the work of two seminal philosophers, Frege and Husserl, as well as of the young Carnap and Kripke. The second part contains analyses of central issues in the philosophy of logic, the philosophy of mathematics and semantics, including arguments on behalf of Platonism in the philosophy of mathematics, a defense of second-order logic, a new definition of analyticity, a sketch of a semantics for mathematical statements and a critique of Kripke's possible world semantics for modal logic.

Confucianism and Daoism absorbing and mutually transforming new horizons, especially Buddhism; attention to the writings of Matteo Ricci and potential Christian contributions to modern development in Chinese culture.

15 Minutes. That's as long as we think any student should have to spend formatting their papers. Unfortunately, students often spend hours trying to find answers from hard to follow manuals or confusing websites. Whether you want a step-by-step guide to building a title page, suggestions for writing with greater clarity, or freedom from doing internet searches every time you have a question about APA standards, APA Made Easy is the only blueprint that you will need for writing in APA style. This comprehensive writing guide includes illustrated steps for formatting an APA document in: Microsoft Word 2010, Microsoft Word 2011 for Mac, Microsoft Word 2013, and Apple's Pages programs. You will also learn how to build an APA formatted paper from the ground up by understanding: • How to outline information you've already gathered. • How to write an essay or research paper from an outline. • How to write a solid introduction. • How to use the required headings in a research paper including Abstracts, Method, Subjects and Participants, Materials or Apparatus, Results, and Discussion sections. • Building Citations within your paper and on your Reference page. Also included in this guide: • APA examples and high resolution screen shots to help students correctly format documents within 15 minutes. • Over 150 completed Reference examples • Over 60 completed In-Text Citation examples • How to use Headings effectively in your writing • Specific examples that cover how to cite new media such as blog posts, emails, websites, online lectures, computer programs, social media and much more. • A new section on using and citing DOI's (Digital Object Identifiers) for new media. • A Short Sample paper in APA format. • For more information on APA Made Easy and downloadable APA templates visit: YouVersusTheWorld.com.

This is a major, wide-ranging history of analytic philosophy since 1900, told by one of the tradition's leading contemporary figures. The first volume takes the story from 1900 to mid-century. The second brings the history up to date. As Scott Soames tells it, the story of analytic philosophy is one of great but uneven progress, with leading thinkers making important advances toward solving the tradition's core problems. Though no broad philosophical position ever achieved lasting dominance, Soames argues that two methodological developments have, over time, remade the philosophical landscape. These are (1) analytic philosophers' hard-won success in understanding, and distinguishing the notions of logical truth, a priori truth, and necessary truth, and (2) gradual acceptance of the idea that philosophical speculation must be grounded in sound prephilosophical thought. Though Soames views this history in a positive light, he also illustrates the difficulties, false starts, and disappointments endured along the way. As he engages with the work of his

predecessors and contemporaries--from Bertrand Russell and Ludwig Wittgenstein to Donald Davidson and Saul Kripke--he seeks to highlight their accomplishments while also pinpointing their shortcomings, especially where their perspectives were limited by an incomplete grasp of matters that have now become clear. Soames himself has been at the center of some of the tradition's most important debates, and throughout writes with exceptional ease about its often complex ideas. His gift for clear exposition makes the history as accessible to advanced undergraduates as it will be important to scholars. Despite its centrality to philosophy in the English-speaking world, the analytic tradition in philosophy has had very few synthetic histories. This will be the benchmark against which all future accounts will be measured.

A Companion for Philosophy Students and Instructors

Philosophy without Intuitions

An Introduction Through Original Fiction, Discussion, and Readings

This authoritative collection of the seminal texts in post-war political philosophy has now been updated and expanded. Reprints key articles, mainly unabridged, touching upon the nature of the state, democracy, justice, rights, liberty, equality and oppression. Includes work from politics, law and economics, as well as from continental and analytic philosophy. Now includes thirteen additional texts, taking account of recent developments in the field and reflecting the most pressing concerns in international affairs. Can be used alongside A Companion to Contemporary Political Philosophy (Blackwell Publishing, 1993; second edition in preparation) as the basis for a systematic introduction to the subject.

Built around practical exercises, this book helps students to practise and master core reading and writing skills crucial to the successful study of philosophy.

This important new book is the first of a series of volumes collecting the essential articles by the eminent and highly influential philosopher Saul A. Kripke. It presents a mixture of published and unpublished articles from various stages of Kripke's storied career. Included here are seminal and much discussed pieces such as "Identity and Necessity", "Outline of a Theory of Truth", "Speaker's Reference and Semantic Reference", and "A Puzzle About Belief." More recent published articles include "Russell's Notion of Scope" and "Frege's Theory of Sense and Reference" among others. Several articles are published here for the first time, including both older works ("Two Paradoxes of Knowledge", "Vacuous Names and Fictional Entities", "Nozick on Knowledge") as well as newer ("The First Person" and "Unrestricted Exportation"). "A Puzzle on Time and Thought" was written expressly for this volume. Publication of this volume -- which ranges over epistemology, linguistics, pragmatics, philosophy of language, history of analytic philosophy, theory of truth, and metaphysics -- represents a major event in contemporary analytic philosophy. It will be of great interest to the many

who are interested in the work of one its greatest living figures.

Philosophical Writing: An Introduction, 4th Edition, features numerous updates and revisions to A. P. Martinich's best-selling text that instructs beginning philosophy students on how to craft a well-written philosophical essay. Features an entirely new chapter on how to read a philosophical essay, new sections on quantification and modality, and rhetoric in philosophical writing, as well as more updated essay examples Includes many new essay examples and an accompanying website with further topics and examples Traces the evolution of a good philosophical essay from draft stage to completion Emphasizes what a student should do in crafting an essay, rather than on what not to do Written with clarity and humor by a leading philosopher

A Practical Guide for Students

A comprehensive collection of resources showing students of theology how to prepare and write creative research-oriented material The Craft of Innovative Theology: Argument and Process delivers a thorough examination of the method of producing and writing creative theological theses and projects, explaining to students how to write elegant, innovative research-oriented articles. Through a collection of papers written by distinguished scholars, the text exhibits numerous examples of well-executed creative writing on topics as varied as theodicy and evolution, and artificial intelligence and baptism. Each article includes an introduction by the editor that serves to guide the student through the material and elucidates what makes the work stand out as exceptional. The articles are also annotated to assist with the appreciation of the methodology and style used by the author. The Craft of Innovative Theology assists theology students in improving their research writing to a point where they'll be ready for a Masters' thesis or PhD dissertation, and is an excellent resource for a research methods course in a graduate program. The works incorporated by the editors include: A thorough introduction to God and the Incarnation, including knowing God through religious pluralism An exploration of God and church, including racial stigma and the southern Baptist public discourse in the twentieth century, and the appropriateness of baptizing artificial intelligence A discussion of God and the world, including where humanity has come from and where we're going, and the challenges posed by biological evolution to Christian theology A treatment of God and ethics, including sin and the faces of responsibility Perfect for students of postgraduate theology and research methods courses, The Craft of Innovative Theology: Argument and Process will also earn a place in the libraries of students in courses that prepare them to write a Masters' thesis in theology or to begin shaping their PhD dissertation topic.

This monograph addresses a perceived lack of clarity in the recent turns toward 'theological interpretation', presenting an understanding of theological interpretation that is highly eclectic.

Sound reasoning is the basis of good philosophy. Writing Philosophy Papers is the only handbook that clearly and concisely introduces philosophy students to four basic kinds of papers - thesis defense, comparison-and-contrast, research, and summary - commonly assigned in philosophy courses. First published in 1993, Writing Philosophy Papers continues to help thousands of students learn the basics of philosophical logic and the elements of a well-reasoned paper. It contains specific instruction on planning, selecting a topic, doing research, writing, revising, and presentation. It also has a new chapter on informal logic that helps readers polish their persuasive writing skills. Based on the author Zachary Seech's experience as a philosophy professor and writing instructor, Writing Philosophy Papers addresses the basic questions most students have when faced with writing a philosophy paper, such as how to handle documentation and how to use the school library. In addition, new material on accessing The Philosopher's Index and using computer-based references makes Writing Philosophy Papers an indispensable desk reference for every philosophy student.

READINGS FOR WRITERS is the preeminent rhetorical reader for the freshman composition course. This bestseller continues its tradition of providing comprehensive coverage of the writing and research process, while also offering a wide variety of appealing readings. With more than 70 selections from a broad range of topics and genres, this text offers something to spark excitement in any writer. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Guide to the Writing of Philosophy Papers

Aims and Methods in the Study of Early Modern Philosophy

Argument and Process

Philosophy and Its History

How to Write a Philosophy Paper is a handbook which provides students with a ready arsenal of analytical and compositional techniques. It is intended for undergraduate students in any type of philosophy course and is written and organized in a user-friendly manner. The first half includes discussions of the nature of philosophy and a variety of basic and essential techniques of philosophical enquiry and argumentation. The second half takes the student step-by-step through the writing process, from choosing a suitable topic, to developing his or her thought, to preparation of the final draft. Includes an index and bibliographical material.

Target success in AQA A-level Philosophy with this proven formula for effective, structured revision; key content coverage is combined with exam-style tasks and practical tips to create a revision guide that you can rely on to review, strengthen and test students' knowledge. With My Revision Notes, every student can: - Plan and manage a successful revision programme using the topic-by-topic planner - Consolidate subject knowledge by working through clear and focused content coverage - Test understanding and

identify areas for improvement with regular 'Now Test Yourself' tasks and answers - Improve exam technique through practice questions, expert tips and examples of typical mistakes to avoid Introduce your students to the major perspectives in ethical theory and a broad range of contemporary moral debates using MacKinnon/Fiala's ETHICS: THEORY AND CONTEMPORARY ISSUES, Eighth Edition. Illuminating overviews and a selection of readings from traditional and contemporary sources make even complex philosophical concepts reader-friendly. Comprehensive, clear-sighted introductions to general and specific areas of ethical debate cover influential ethical theories, including religion and global ethics, utilitarianism and deontology, natural law ethics, virtue ethics, and feminist and care ethics. Contemporary moral issues discussed include euthanasia, sexual morality, economic justice, animal ethics, war, violence, and globalization. A broader range of voices and philosophical traditions in this edition includes continental and non-Western philosophers, with new readings from prominent ethicists such as Kwame Anthony Appiah, Angela Y. Davis, Mohandas Gandhi, and Richard Rorty. Increased coverage of contemporary dilemmas highlights issues of widespread interest, such as same-sex marriage, structural racism, factory farming, pacifism, and global distributive justice. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Doing Philosophy provides a practical guide to studying philosophy for undergraduate students. The book presents strategies for developing the necessary skills that will allow students to get the most out of this fascinating subject. It examines what it means to think, read, discuss and write philosophically, giving advice on: Reading and analysing philosophical texts Preparing for and participating in seminars Choosing essay topics Constructing arguments and avoiding plagiarism Using libraries, the internet and other resources Technical terms, forms of expression and logical notation The second edition is fully revised and expanded throughout, packed with practical exercises, useful examples and fully up-to-date resources. It also features for the first time a full companion website with additional resources and a range of pedagogical tools and activities designed for students and lecturers to use both in the classroom and in seminar preparation. Concise and accessible, Doing Philosophy equips the student with the tools needed to successfully engage in discussing, reading and writing philosophy.

Philosophy of Education: Society and education

The period during which Bernard Lonergan delivered the eleven lectures in this volume was one of important transition for him: he was moving rapidly toward a new conception of theology and its method; and he was on the verge of what is now recognized as a major breakthrough in his thought on method, the idea that came to him in February 1965 of the eight functional specialities. While the lectures maintain a continuity with Lonergan's previous work, they also reveal new and significant ideas, especially in regard to his drive toward a new conception of theology as a whole, and his particular concern for the relevance of theology to the spiritual life. The lectures here include `The Redemption,' `Method in Catholic Theology,' `The Philosophy of History,' `The Origins of Christian Realism,' `Time and Meaning,' `Consciousness and the Trinity,' `Exegesis and Dogma,' `The Mediation of Christ in Prayer,' `The Analogy of Meaning,' `Philosophical Positions with Regard to Knowing,' and `Theology as Christian Phenomenon.' This volume provides a key to understanding the development of Lonergan's philosophical and theological thought, his major influences, and the pivotal moments of transition in the road leading up to Method in Theology and beyond.

The revised and updated edition of Goodin and Pettit's highly-acclaimed contemporary political philosophy anthology, bringing together the field's most important readings in a single volume Unparalleled in the breadth and scope of its coverage, this newly-revised third edition traces the evolution of political philosophy as a contemporary practice, and raises important questions about the impact of current political events. Fully updated to include 49 contemporary and classic selections from the most distinguished scholars in political philosophy Offers expanded coverage of international affairs and political oppression Includes essays which represent a diversity of political and ideological positions, and features interdisciplinary voices in politics, law, and economics Edited by two of the field's most highly-respected scholars The ideal collection of primary readings to accompany the Companion to Contemporary Political Philosophy, Second Edition (Wiley Blackwell, 2012) for coursework in political philosophy

Health professionals are increasingly expected to conduct and publish their research, apply for grants, write newsletters, liaise with the media, present conference papers and contribute articles to professional journals. Writing well is an essential professional skill and writing to publish is an important aspect of professional development. But how do you get published? Where do you start? How do you know if your writing is good enough and what can you learn to make it better? Effective Writing for Health Professionals is an invaluable insider's guide to publishing within the health profession, providing handy tips on: · Getting started · The writing process · Winning habits of successful authors · Promoting your work · Author rights and responsibilities Many would-be writers - students, administrators, clinicians, managers and academics alike - are often intimidated at the thought of writing. This book will help to overcome this writing block and introduce aspiring authors to the world of writing and publishing in a professional capacity. Written by a best-selling academic author, Effective Writing for Health Professionals provides insights and strategies for publishing designed for nurses, midwives and health professionals.

Richard A. ("Red") Watson has published fiction, general nonfiction, and scholarly books. His essay "On the Zeedijk," about Descartes in Holland and first published in The Georgia Review, was the lead essay in The Pushcart Prize XV, 1990—1991: Best of the Small Presses. Red knows writing. He also knows academe and has written Writing Philosophy as a kind of survival manual for undergraduates, graduate students, and junior faculty members in philosophy. Also helpful to those in the humanities and the social sciences, the book is a guide to the professional writing and publishing that are essential to an active participation in the conversation and discussion that constitute these professional fields. To the extent that publication is the crucial factor in tenure decisions, it will help the beginning scholar meet tenure criteria. Despite the importance of the oral tradition in philosophy and the influence of the dialogue, many philosophical points are so intricate and complex that they can be advanced, followed, and criticized only if they are written as stepwise arguments for study and contemplation at length and at leisure. Watson provides a set of basic principles and a plan for writing argumentative papers of 1,500 to 15,000 words (3 to 30 printed pages) and books containing a sequence of sustained arguments of 70,000 to 150,000 words (200 to 300 printed pages). Because the first book of most professional philosophers is a revised dissertation, Watson presents a plan for writing that dissertation in such a way that its chapters will serve as publishable articles

and the dissertation itself will need very little rewriting as a book. His discussion of the principles of reason, clarity, and argument ranges from such topics as dangling participles and the proper usage of ellipses to matters of categorization and univocity.
