From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

This book tells a compelling story about love, friendship, and the Divine that took over a thousand years to unfold. It argues that mind and feeling are intrinsically connected in the thought of Plato, Aristotle, and Plotinus; that Aristotle developed his theology and physics primarily from Plato’s Symposium (from the “Greater” and “Lesser Mysteries” of Diotima-Socrates’ speech); and that the Beautiful and the Good are not coincident classes, but irreducible Forms, and the loving ascent of the Symposium must be interpreted in the light of the Republic, as the later tradition up to Ficino saw. Against the view that Platonism is an escape from the ambiguities of ordinary experience or opposed to loving individuals for their own sakes, this book argues that Plato dramatizes the ambiguities of ordinary experience, confronts the possibility of failure, and bequeaths erotic models for the loving of individuals to later thought. Finally, it examines the Platonic-Aristotelian heritage on the Divine to discover whether God can love us back, and situates the dramatic development of this legacy in Plotinus, Iamblichus, Proclus, and Dionysius the Areopagite.
