Fundamentals of Geoenvironmental Engineering: Understanding Soil, Water, and Pollutant Interaction and Transport examines soil-water-pollutant interaction, including physico-chemical processes that occur when soil is exposed to various contaminants. Soil characteristics relevant to remedial techniques are explored, providing foundations for the correct process selection. Built upon the authors' extensive experience

in research and practice, the book updates and expands the content to include current processes and pollutants. The book discusses propagation of soil pollution and soil characteristics relevant to remedial techniques. Practicing geotechnical and environmental engineers can apply the theory and case studies in the book directly to current projects. The book first discusses the stages of economic development and their connections to the sustainability of the environment. Subsequent chapters cover waste and its management, soil systems, soil-water and soil-pollutant interactions, subsurface transport of pollutants, role of groundwater, nano-, micro- and

International Seminar on Social Science, Humanities and Education (ISSHE) is motivated by efforts to increase the quality of research and respond to the development of studies related to social science, humanities and education fields. This seminar aims: (1) to bring together all scientists, researchers, practitioners,

and lecturers, (2) to share and discuss theoretical and practical knowledge about social science, humanities and education fields. The conference was held virtually by using Zoom on November, 25th 2020. The host of the conference was the Faculty of Cultural Sciences of Universitas Haluoleo, Kendari, Indonesia in collaboration with Graduate Program of Linguistics Universitas Warmadewa, Denpasar-Bali, Indonesia. By organising the seminar, it is expected it can be used as a scientific forum to accommodate discussions among young researchers originated from Indonesia in the fields of social science, humanities, and education.

Therefore, the keynote speakers and invited speakers in the seminar are the researchers that are reputable and well-known in the world. We would like to thank the organising committee and the board of reviewers for their kind assistance and intention in reviewing all the papers. We would also extend our best gratitude to keynote speakers for their invaluable contributions and worthwhile ideas shared in the seminar. As a result, ISSHE is expected to be able to be used as academic media to exchange ideas that will impact on conduction of any study related to social science, humanities, and education phenomena.

The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user. People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility. The authors show how creative designers can take a user-focused approach for a wide range of types of transport products and systems. In so doing their starting point is one of creative dissatisfaction with what is currently available, and their specialist capability is in imagining and developing new solutions which respond to that

opportunity. How this is tackled varies depending on the context, and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for. The chapters cover user needs and transport, design and the transport system, transport design case studies, and the case for the automobile. A conclusion briefly signals what the future for transport design might be. Lavishly illustrated throughout in four-colour, *Design for Transport*, is an imaginative and rigorous guide to how designers can take a user-centred and socially responsible approach to tackling a range of types of transport, from systems to products and from bicycles to automobiles, demonstrating a rich array of

Quality Management Practices for Global Excellence
The Temporal Turn in Contemporary Art
Healing Capitalism

The global response from business to social and environmental issues during the past decade has created a corporate responsibility movement. But what has been the impact of this movement? The financial crisis that began in 2007 has led more and more people to question the fundamentals of our economic system. Now, some within the corporate responsibility movement are developing a

vision and practice of a new form of capitalism, one that will require collective action to achieve. Bendell and Doyle draw on Lifeworth's annual reviews of corporate responsibility and explain how business leaders, stakeholders and related academe now need to experiment with new models that address the fundamental flaws of contemporary capitalism, including monetary systems, enterprise ownership, and regulation. This book will be a fantastic resource for business libraries, as it records

and analyses key events, issues and trends in corporate responsibility during the first decade of the 21st century. It is a sequel and companion to Bendell's previous work, The Corporate Responsibility Movement.

The term 'temporality' often refers to the traditional mode of the way time is: a linear procession of past, present and future. As philosophers will note, this is not always the case. Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of

contemporary art: films, video installations, sculpture and performance works. Ross first provides an interdisciplinary overview of contemporary studies on time, focusing on findings in philosophy, psychology, sociology, communications, history, postcolonial studies, and ecology. She then illustrates how contemporary artistic practices play around with what we consider linear time. Engaging the work of artists such as Guido van der Werve, Melik Ohanian, Harun Farocki, and Stan Douglas, allows investigation though the

art, as opposed to having art taking an ancillary role. The Past is the Present; It's the Future Too forces the reader to understand the complexities of the significance of temporal development in new artistic practices.

From the use of the Peladita and the Peladito as stock characters who criticized various aspects of the Mexican government in the 1920s and 1930s to contemporary performance art by María Elena Gaitán and Dan Guerrero, which yields a feminist and queer-studies interpretation, Rita Urquijo-Ruiz emphasizes the transnational capitalism at play in these comic voices. figures in the United States. The result is a historically grounded, interdisciplinary approach that reimagines the limitations of nation-centered thinking and reading. Beginning with Daniel Venegas's 1928 novel, Las aventuras de don Chipote o Cuando los pericos mamen, Rita Urquijo-Ruiz's Wild Tongues demonstrates early uses of the Peladito to call attention to the brutal physical demands placed on the undocumented Mexican laborer. It explores Teatro de Carpa (tent theater) in-depth as well, bringing to light the experience of Mexican Peladita Amelia Wilhelmy, whose "La Willy" was famous for portraying a cross-dressing male soldier who criticizes the failed Revolution. In putting forward a ‘strategy’, we draw on many disciplines and cultural perspectives on a problem that is fundamentally a multidisciplinary and global issue. At the same time, the contributing researchers remain aware that such a strategy is always subject to local contextual factors and influences, indigenous and local knowledge and culture, and is regarded as a tool for planning, always subject to change.

In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technology across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century.
