**Matter: Physical Science
for Kids from the Picture
Book Science series gets
kids excited about**

science! What's the

matter? Everything is matter! Everything you can touch and hold is made up of matter—including you, your dog, and this book! Matter is stuff that you can weigh and that takes up space, which means pretty much everything in the world is made of matter. In Matter: Physical Science for Kids, kids ages 5 to 8 explore the definition of matter and the different states of matter, plus the stuff in our world that isn't matter, such as sound

and light! In this nonfiction picture book, children are introduced to physical science through detailed illustrations paired with a compelling narrative that uses fun language to convey familiar examples of real-world science connections. By recognizing the basic physics concept of matter and identifying the different ways matter appears in real life, kids develop a fundamental understanding of physical science and are

impressed with the idea that science is a constant part of our lives and not limited to classrooms and laboratories. Simple vocabulary, detailed illustrations, easy science experiments, and a glossary all support exciting learning for kids ages 5 to 8. Perfect for beginner readers or as a read aloud nonfiction picture book! Part of a set of four books in a series called Picture Book Science that tackles different kinds of physical science (waves, forces,

***energy, and matter),
Matter offers beautiful
pictures and simple
observations and
explanations. Quick
STEM activities such as
weighing two balloons to
test if air is matter help
readers cross the bridge
from conceptual to
experiential learning and
provide a foundation of
knowledge that will prove
invaluable as kids
progress in their science
education. Perfect for
children who love to ask,
“Why?” about the world
around them, Matter***
