The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy.

Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their

innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and

service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a

Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended

successful feature film. In the latter part of the century, however, the two forms merged on occasion, and mockumentaries (fictional works in a documentary format) and docudramas (reality-based works in a fictional format) became part of the film and television landscape. The 18 essays here examine the relationships between narrative fiction films and documentary filmmaking, focusing on how each influenced the other and how the two were merged in such diverse films and shows as *Citizen Kane*, *M*A*S*H*, *This Is Spinal Tap*, and *Destination Moon*. Topics include the docudrama in early cinema, the industrial film as faux documentary, the fear evoked in 1950s science

The word innovation is often used today regarding China, as if the concept were new to the Eastern country. Most people know, however, that China was a juggernaut in creating new technologies and at one time was the innovation king of the world- but that was at least seven centuries ago! Today, the great oriental power is attempting once again to take the throne of innovation for its own.

This desire to usurp the throne, which

had been diligently taken by the West during the Scientific Revolution, has placed an almost unrealistic emphasis on innovation. In *Innovation in China: The Tail of the Dragon*, the author explores the issues and actors involved in making innovation the emphasis in China. He uses a simple systems model of innovation and various perceptual lenses. The lenses are aimed at the historical, economic, political, legal, educational and cultural elements of an innovation-based society. After reading the book the reader will understand more about how innovation is happening in China and by whom. More importantly, the reader will begin a journey of learning more about where the country is going as it relentlessly continues its drive to create an
