systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder, and fear of crime—as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Time is an abducted child's worst enemy. Seventy-four percent of abducted children who are murdered are killed within three hours of their abduction. It takes, on the average, two hours for a parent to report a child missing. This gives responders only one hour to get an investigation up and running in an attempt to locate and recover the child alive.

The book provides law enforcement agencies with the most current information available to guide them through a missing or runaway child dispatch. It is designed to help investigators respond quickly, expeditiously evaluate the situation, conduct an Endangerment Risk Assessment (ERA) of the child, and commence a thorough, organized investigation—starting from the moment the police are contacted. By following the guidelines in this

book, those tasked with these cases can make the best possible decisions in the shortest amount of time. The protocols and methodologies presented are based on personal police experience and statistical evidence from research and studies gathered from thousands of runaway and missing children cases. Details on those studies and their findings are provided in the appendix. Time is of the essence in missing children cases. Make every second count.
