argument and what he means by the notion of "market society". I will proceed in three steps: first, I will explore the different roles that the economy, according to Polanyi, plays in capitalist and pre-capitalist societies; I will look then at the

historical processes
that led to the rise of
a "market society".

Finally, I will discuss
the political
reactions to these
processes which
can be
characterized, in
Polanyi's view, by a
"double movement".
As Polanyi is one of
the most important

helpful to compare

the fundamental
difference seems to

be that Polanyi does not give a positive account of modernization. This leads to the question, how Polanyi's theories can improve our understanding of development today. I will mainly argue that although Polanyi gives an
