*This book explores how our social and economic contexts profoundly affect our mental health and wellbeing, and how modern neuroscientific and psychodynamic research can both contribute to and enrich our understanding of these wider discussions. It therefore looks both inside and outside - indeed one of the main themes of *The Political Self* is that the conceptually discrete categories of 'inner' and 'outer' in reality constantly interact, shape, and inform each other. Severing these two worlds, it suggests, has led both to a devitalised and dissociated form of politics, and to a disengaged and disempowering form of therapy and analysis.*

*In this book, a multidisciplinary and international selection of Jungian clinicians and academics discuss some of the most compelling issues in contemporary politics. Presented in five parts, each chapter offers an in-depth and timely discussion on themes including migration, climate change, walls and boundaries, future developments, and the psyche. Taken together, the book presents an account of current thinking in their psychotherapeutic community as well as the role of practitioners in working with the results of racism, forced relocation, colonialism, and ecological damage. Ultimately, this book encourages analysts, scholars, psychotherapists, sociologists, and students to actively engage in shaping current and future political, socio-economic, and cultural developments in this increasingly complex and challenging time.*

*myths about individuality, freedom, and independence, and how might we re-imagine our vision of the United States as the "Promised Land" and "The City on the Hill" to reflect a multiculturalism that offers "the last, best hope" for the world? In a two-decades long journey through the American psyche, depth journalist Pythia Peay has asked these and many more questions of no fewer than thirty-six of the world's leading psychologists and psychoanalysts. From Robert Jay Lifton to Marion Woodman, A. Thomas McLellan to Judith V. Jordan, Mihaly Csikszentmihalyi to June Singer, and James Hillman to Mary Pipher, the thinkers in America on the Couch discuss violence, addiction, the environment, capitalism and consumerism, politics and power, and the soul of America. The result is a uniquely comprehensive, wide-ranging, and compelling kaleidoscope of insights into the psychodynamics of a hegemon in peace and at war, as it confronts the shadows of the American century and charts its way into an uncertain, multi-polar future. **"Vital signs" are, of course, the basic physiological measures of functioning which health practitioners use to assess the gravity of a patient's predicament. This anthology focuses not so much on our physical predicament, with so many of the Earth's systems severely stressed and beginning to fail - there are plenty of other places to read about this. Instead we focus on our psychological predicament, as news of the situation slowly penetrates our defences and we struggle as individuals and as a society to find an adequate response. By "vital signs" we also mean signs that such a response is beginning to take shape: signs of hope, signs of healing. We feel that ecopsychology in Britain has a distinctive voice and unique contributions to make. In doing so, we hope to facilitate debate and dialogue within the field, in the hope that this will lead eventually to more developed theory and practice.**

**Read this book if you want to be able to speak with your friends about your social and political beliefs with confidence. **with inherent features of the free press have changed the nature of the individual citizen's engagement with our elected public servants. Accountability Citizenship explains how we can restore accountability in government by accepting our personal accountability for some simple tasks we must do as individual citizens living in the age of information. The book is non-partisan. Readers are asked only to agree on the very basics-that the government of the United States is supposed to represent the people of the United States. The author makes a compelling case that changes in our information distribution technologies and business models discourage effective political participation by citizens. In the early days of our republic, information distribution was based on newspapers-subscription-based and geographically aligned with the representative structure of Congress. Over the past forty years, deregulation of television and radio along with the information technology revolution have disrupted this alignment. But we can restore accountability through the three steps of accountability citizenship: being appropriately positive, appropriately informed and appropriately engaged.**

A Peaceable Psychology encourages mental health practitioners to mine their own traditions for gifts of healing and to allow clients to bring their native ethnic or religious voice into therapy. The authors point to the life of Jesus as the foundation on which to build a therapeutic ethic, appropriating the story of his life to bring healing. This integrative work considers philosophy, ethics, theology, and cognitive science in making an argument on behalf of and for the psychological community. It will benefit psychology professors and students, Christian psychologists and psychotherapists, mental health workers, pastors, and theologians. This unique collection by leading authors explores the links between therapy and the political world, and their contribution to each other. **Based on Jung's theory of complexes, this book offers a new perspective on conflicts between groups and cultures, demonstrating how the effects of cultural complexes can be felt in the behaviour of disenfranchised groups across the world.**

**'Becoming: An Introduction to Jung's Concept of Individuation' explores the ideas of Carl Gustav Jung. His idea of a process called individuation has sustained Deldon Anne McNeely's dedication to a lifelong work of psychoanalysis, which unfortunately has been dismissed by the current trends in psychology and psychiatry. Psychotherapists know the value of Jung's approach through clinical results, that is, watching people enlarge their consciousness and change their attitudes and behavior, transforming their suffering into psychological well-being. However, psychology's fascination with behavioral techniques, made necessary by financial concerns and promoted by insurance companies and pharmaceutical companies, has changed the nature of psychotherapy and has attempted to dismiss the wisdom of Jung and other pioneers of the territory of the unconscious mind. For a combination of unfortunate circumstances, many of the younger generation, including college and medical**

students, are deprived of fully understanding their own minds. Those with a scientific bent are sometimes turned away from self-reflection by the suggestion that unconscious processes are metaphysical mumbo-jumbo. Superficial assessments of Jung have led to the incorrect conclusion that one must be a spiritual seeker, or religious, in order to follow Jung's ideas about personality. 'Becoming' is an offering to correct these misperceptions. Many university professors are not allowed to teach Jungian psychology. Secular humanism and positivism have shaped the academic worldview; therefore, investigation into the unknown or unfamiliar dimensions of human experience is not valued. But this attitude contrasts with the positive reputation Jung enjoys among therapists, artists of all types, and philosophers. Those without resistance to the unconscious because of their creativity, open-mindedness, or personal disposition are more likely to receive Jung's explorations without prejudice or ideological resistance. There is a lively conversation going on about Jung's ideas in journals and conferences among diverse groups of thinkers which does not reach mainstream psychology. 'Becoming' is for those whose minds are receptive to the unknown, and to help some of us to think-more with respect than dread-of the

**possibility that we act unconsciously.**

**Sacral Revolutions is a unique project reflecting the contribution that Andrew Samuels has made to the general field of psychoanalysis and Jungian analysis in both clinical and academic contexts. Gottfried Heuer has brought together an international array of authors – friends and colleagues of Samuels – to honour his 60th Birthday. As a result, the collection provides a creative and cutting-edge overview of a fragmented field. The chapters demonstrate the profound sense of social responsibility of these analysts and academics whose concerns include the mysteries and hidden meanings in social and political life. This open and engaging volume includes a previously unpublished interview with C. G. Jung, adding to its usefulness as an essential companion for academics, analysts, therapists and students. Torture, Psychoanalysis and Human Rights contributes to the development of that field of study called ‘psycho-social’ that is presently more and more committed to providing understanding of social phenomena, making use of the explicative perspective of psychoanalysis. The book seeks to develop a concise and integrated framework of understanding of torture as a socio-political phenomenon based on psychoanalytic thinking, through which**

different dimensions of the subject of study become more comprehensible. Monica Luci argues that torture performs a covert emotional function in society. In order to identify what this function might be, a profile of 'torturous societies' and the main psychological dynamics of social actors involved – torturers, victims, and bystanders – are drawn from literature.

Accordingly, a wide-ranging description of the phenomenology of torture is provided, detecting an inclusive and recurring pattern of key elements. Relying on psychoanalytic concepts derived from different theoretical traditions, including British object relations theories, American relational psychoanalysis and analytical psychology, the study provides an advanced line of conceptual research, shaping a model, whose aim is to grasp the deep meaning of key intrapsychic, interpersonal and group dynamics involved in torture. Once a sufficiently coherent understanding has been reached, Luci proposes using it as a groundwork tool in the human rights field to re-think the best strategies of prevention and recovery from post-torture psychological and social suffering. The book initiates a dialogue between psychoanalysis and human rights, showing that the proposed psychoanalytic understanding is a viable conceptualisation for expanding thinking of

crucial issues regarding torture, which might be relevant to human rights and legal doctrine, such as the responsibility of perpetrators, the reparation of victims and the question of 'truth'. **Torture, Psychoanalysis and Human Rights** is the first book to build a psychoanalytic theory of torture from which psychological, social and legal reflections, as well as practical aspects of treatment, can be mutually derived and understood. It will appeal to psychoanalysts, psychoanalytic psychotherapists and Jungians, as well as scholars of politics, social work and justice, and human rights and postgraduate students studying across these fields. Most social scientific work on intimate relationships has assumed a monogamous structure, or has considered anything other than monogamy only in the context of 'infidelity'. Yet, in recent years there has been a growing interest among researchers and the public in exploring various patterns of intimacy that involve open non-monogamy. This volume gathers contributions from academics, activists, and practitioners throughout the world to explore non-monogamous relationships. Featuring both empirical and theoretical pieces, contributors examine the history and cultural basis of various forms of non-monogamy, experiences of non-monogamous living,

**psychological understandings of relationship patterns, language and emotion, the discursive construction of mono-normativity as well as issues of race, class, disability, sexuality and gender. This volume will be of interest to academics and practitioners working in the social sciences and anyone who is seeking greater insight into the intricacies of non-monogamous relationships.**

Do political concerns belong in psychodynamic treatment? How do class and politics shape the unconscious? The effects of an increasingly polarized, insecure and threatening world mean that the ideologically enforced split between the political order and personal life is becoming difficult to sustain. This book explores the impact of the social and political domains at the individual level. The contributions included in this volume describe how issues of class and

politics, and the intense emotions they engender, emerge in the clinical setting and how psychotherapists can respectfully address them rather than deny their significance. They demonstrate how clinicians need to take into account the complex convergences between psychic and social reality in the clinical setting in order to help their patients understand the anxiety, fear, insecurity and anger caused by the complex relations of class and power. This examination of the psychodynamics of terror and aggression and the unconscious defences employed to deny reality offers powerful insights into the microscopic unconscious ways that ideology is enacted and lived. *Psychoanalysis, Class and Politics* will be of interest to all mental health professionals interested in improving their understanding of the ideological factors that impede or facilitate critical and engaged citizenship. It has a valuable contribution to make to the psychoanalytic enterprise, as well as to related scholarly and professional disciplines. Thomas Singer presents a unique collection which examines cultural complexes in four parts of East Asia: China, Japan, Korea, and Taiwan. From ancestor worship in China to the "kimchi bitch" meme of South Korea, the wounded feminine in Taiwan and hikikomori in Japan, the contributors take a Jungian lens to aspects of

culture and shine a light on themes including gender, archetypes, consciousness, social roles, and political relations. This insightful and timely book will be essential reading for academics and students of Jungian and post-Jungian ideas, politics, sociology, and Asian studies. It will also be of great interest to Jungian analysts in practice and in training.

This is a history of how twentieth-century Britons came to view themselves and their world in psychological terms, and how this changed over time. It examines the extent to which psychological thought and practice could mediate, not just understanding of the self, but also a wide range of social and economic, political, and ethical issues that rested on assumptions about human nature. In doing so, it brings together high and low psychological cultures; it focuses not just on health, but also on education, economic life, and politics; and it reaches from the start of the century right up to the 1970s. Mathew Thomson highlights the intense excitement surrounding psychology at the start of the century, and its often highly unorthodox expression in thought and practice. He argues that the appeal of psychological thinking has been underestimated in the British context, partly because its character has been misconstrued. Psychology found a role because,

rather than shattering values, it offered them new life. The book considers the extent to which such an ethical and social psychological subjectivity survived the challenges of an industrial civilization, a crisis in confidence regarding human nature wrought by war and political extremism, and finally the emergence of a permissive society. It concludes that many of our own assumptions about the route to psychological modernity - centred on the rise of individualism and interiority, and focusing on the liberation of emotion, and on talk, relationships, and sex - need substantial revision, or at least setting alongside a rather different path when it comes to the Britain of 1900-70.

Everyone who aspires to more effective public service should read this book. It provides a compelling antidote to the managerial focus of theory and practice in public administration. Written with the aim of inspiring and rekindling a mission for public service, *Transformational Public Service* weaves together theory and stories from actual practice to show that public service can (and does) advance the goals of democracy, inclusiveness, and social and economic justice. Eight practitioners from government and non-governmental organizations at all levels - from the street to the executive office - tell their personal stories of

transformational public service. Theory, poetry, and popular culture references are woven around the stories. Both students and practitioners will discover new ways of thinking in this book that will enable them to transform their own administrative practices. As the authors note in their prologue: "As we listened to these stories, we heard people say that public service can be and is transformational (transforms institutions, practices, and people's lives and experiences) in ways that serve democracy, engagement, and social and economic justice. The public service they practice is collaborative, humanistic, emancipatory, inclusive, and diverse."

What is the best way to understand the narratives of self-identity at the beginning of the 21st century? This interdisciplinary collection brings together perspectives from analytical psychology, sociology, psychiatry, psychosocial studies, and psychoanalysis to consider questions about individuation and freedom in our unhinged world. The contributors discuss the meaning of, and need for, individuation in individualized and liquid societies. The book begins with a comparison of three approaches: C.G. Jung's individuation, Ulrich Beck's individualization, and Zygmunt Bauman's liquidity. This sets the tone for further

which analytical psychology draws on concepts found in German classical aesthetics. It aims to place analytical psychology in the German-speaking tradition of Goethe and Schiller, with which Jung was well acquainted. *Analytical Psychology and German Classical Aesthetics* argues that analytical psychology appropriates many of its central notions from German classical aesthetics, and that, when seen in its intellectual historical context, the true originality of analytical psychology lies in its reformulation of key tenets of German classicism. Although the importance for Jung of German thought in general, and of Goethe and Schiller in particular, has frequently been acknowledged, until now it has never been examined in any detailed or systematic way. Through an analysis of Jung's reception of Goethe and Schiller, *Analytical Psychology and German Classical Aesthetics* demonstrates the intellectual continuity within analytical psychology and the filiation of ideas from German classical aesthetics to Jungian thought. In this way it suggests that a rereading of analytical psychology in the light of German classical aesthetics offers an intellectually coherent understanding of analytical psychology. By uncovering the philosophical sources of analytical psychology, this first volume returns Jung's thought to its core intellectual tradition, in the light of which analytical psychology gains new critical impact and fresh relevance for modern thought. Written in a scholarly yet accessible style, this book will interest students and scholars alike in the areas of analytical psychology, comparative literature, and the history of

This book offers a comprehensive overview of the overlap between personal and political aspects of life within the context of psychotherapy. It sketches out a clear and detailed narrative of the complex interrelations between psychotherapy, society, and politics. It articulates a theoretical basis for politically conscious and socially responsible therapy work, as well as the guiding principles in implementing this position. Many psychotherapists find themselves struggling when faced with political issues that come up in treatment, both overtly and covertly. Many of them find value in clarifying political aspects of clients' lives and psychotherapy itself, but are hesitant to touch upon this loaded issue or do not know how to approach it. Nissim Avissar ' s book opens up new possibilities of thinking afresh on psychotherapy, in a way that takes into account real life conditions and the effects of professional work on the social environment.

This book demonstrates for the first time the significance of Jung ' s work to the humanities, and to those areas where the humanities and sciences share borders. More radically, it shows that Jung was a writer of myth, alchemy, narrative, and poetics, as well as on them. Jung ' s core concepts are introduced, their ongoing relevance is championed. The book also addresses Jung ' s sometimes questionable judgment on politics and gender, and previews contemporary extensions of Jungian theory. By privileging the creative psyche and exploring the connections between individual, natural environment,

and social/psychological collective, Jung anticipates the new holism, offering the promise of reconciling the sciences with the arts, humanity with nature.

What transformation would happen if we could combine the best of liberal politics with psychology? *Awakening our Faith in the Future* investigates the avenues for creating a new branch of psychology, a transformative political psychology. In the past, political psychology has focused directly on analysis and knowledge acquisition, rather than on interventions that transform self and culture. A transformative political psychology combines the best of traditional social science with the transformative intent of clinical psychology in order to create a new political culture. Peter T. Dunlap suggests that while liberals focus intently outside of themselves on changing the world, those with psychological interests focus much more internally on changing themselves. In this book, he argues that by combining political liberalism and psychology, and encouraging psychologists to develop cultural learning practices based on ideas of self-knowledge, there is opportunity to transform our political culture. Divided into five parts, this book explores: stories of political destiny questions of development opportunities for political development a speculative theory of cultural evolution practices of a political psychologist. This scholarly text uses personal experiences and the stories of progressive political leaders as pathways for addressing political problems, making it ideal reading for professionals and students in the fields of both politics and

The fifteen essays set Jung in the context of his own time, outline the current practice and theory of Jungian psychology and show how Jungians continue to question and evolve his thinking and apply it to aspects of modern culture and psychoanalysis. *The ideas of psychoanalyst Otto Gross (1877-1920) have had a seminal influence on the development of psychoanalytic theory and clinical practice and yet his work has been largely overlooked. For Freud, he was one of only two analysts 'capable of making an original contribution' (Jung was the other), and Jung called Gross 'my twin brother' in the course of their mutual analysis. This is a major interdisciplinary enquiry into the history, nature and plausibility of the idea of a 'sexual revolution', drawing also on the related fields of history, law, criminology, literature, sociology and philosophy. Divided into four parts and offering an interdisciplinary and international range of contributors, areas of discussion include: a contemporary perspective on sexual revolutions the broad influence of Otto Gross the father/son conflict a Jungian perspective on history. Sexual Revolutions introduces Gross' work to the academic and clinical fields of psychoanalysis and Jungian analysis. Although most people associate the term with the 1960s, its foundations lie in the long-neglected but sensational work of the early*

*psychoanalyst Otto Gross. This book will be essential reading for all psychoanalysts and Jungian analysts with an interest in learning more about his work.*

*In this book the editors have solicited the unique and unmediated voices of fifteen leading psychotherapists, who share intimate and revealing stories from their clinic of professional incidents that shook the therapeutic bond and left a scar in both parties. The contributors courageously agreed to revisit the cases that still burn inside of them, attempting to conceptualise these and give them words, and to demonstrate the mutual vulnerability inherent within the psychoanalytic and psychotherapeutic endeavour. While failure is recognised as developmentally necessary and a cornerstone in the formation and maintenance of attachment relationships, stories of therapeutic failures are seldom told in our profession. Can we fully recognise our failures without shaming ourselves and others? Can we bear it while attending to our narcissistic wounds and rescue fantasy? This book addresses all of these concerns, while examining what relational theory and practice has to contribute to the understanding of, and working with,*

*This is an accessible, lucid and stimulating account of the hidden psychology of politics and the hidden politics of the psyche. It is packed with original and imaginative ideas on economics, nationalism, "good-enough" leadership, the citizen and the state, women and men, fatherhood, and the citizen as a "therapist of the world". The author offers trenchant and timely critiques of the crisis in contemporary politics. The book will be important for politicians, people in management studies and the media, members of the therapy world, and all political activists.*

*This anthology of contemporary classics in analytical psychology bring together academic, scholarly and clinical writings by contributors who constitute the "post-Jungian" generation. Carpani brings together important contributions from the Jungian world to establish the "new ancestors" in this field, in order to serve future generations of Jungian analysts, scholars, historians and students. This generation of clinicians and scholars has shaped the contemporary Jungian landscape and their work continues to inspire discussions on key topics including archetypes, race, gender, trauma and*

Each contributor has selected a piece of their work which they feel best represents their research and clinical interests, each aiding the expansion of current discussions on Jung and contemporary analytical psychology studies. Spanning two volumes, which are also accessible as standalone books, this essential collection will be of interest to Jungian analysts and therapists, as well as academics and students of Jungian and post-Jungian studies.*

frameworks can be effectively implemented to maximize Indigenous students' engagement, learning, and academic achievement. Based on six years of empirical research, Kanu offers insights from youths, instructors, and school administrators, highlighting specific elements that make a difference in achieving positive educational outcomes. Drawing on a wide range of disciplines, from cognitive psychology to civics, her findings are widely applicable across both pedagogical subjects and diverse cultural groups. Kanu combines theoretical analysis and practical recommendations to emphasize the need for fresh thinking and creative experimentation in developing curricula and policy. Amidst global calls to increase school success for Indigenous students, this work is a timely and valuable addition to the literature on Aboriginal education.
