In-depth interviews examine the role of the law in the lives of LGBT parents The decision to have a child is seldom a simple one, often fraught with complexities regarding emotional readiness, finances, marital status, and compatibility with life and career goals. Rarely, though, do individuals consider the role of the law in facilitating or inhibiting their ability to have a child or to parent. For LGBT individuals, however, parenting is saturated with legality - including the initial decision of whether to have a child, how to

have a child, whether one's relationship with their child will be recognized, and everyday acts of parenting. Through interviews with 137 LGBT parents, Amanda K. Baumle and D'Lane R. Compton examine the role of the law in the lives of LGBT parents and how individuals use the law when making decisions about family formation or parenting. Baumle and Compton explore the ways in which LGBT parents participate in the process of constructing legality through accepting, modifying, or rejecting legal meanings about their families. They conclude that legality is constructed through a complex interplay of legal context, social networks, individual characteristics, and familial desires. Ultimately, the stories of LGBT parents in this book reflect a rich and varied relationship between the law, the state, and the private family goals of individuals.

Drawing on a landmark study involving more than one hundred pregnant women and mothers, a renowned OB/GYN synthesizes the secrets to a good birth—medically and emotionally. Most doctors are trained to think of a “good” birth only in terms of its medical success. But Dr. Anne Lyerly knows firsthand that there are many other important elements that often get overlooked. Her three-year study of a diverse group of over one hundred expectant moms asked what matters most to women during childbirth. The results, presented to the public

for the first time in *A Good Birth*, show what really matters goes beyond the clinical outcome or even the usual questions of hospital versus birthing center, and reveal universal needs of women, like the importance of feeling connected, safe, and respected. Bringing a new perspective to childbirth, the book's wisdom is drawn from in-depth interviews with women with a wide variety of backgrounds and experiences, and whose birth stories range from quick and simple to complicated and frightening. Describing what went well, what didn't, and what they'd do differently next time, these mothers give voice to the complete experience of childbirth, helping both women and their healthcare providers develop strategies to address the emotional needs of the mother, going beyond the standard birth plans and conversations. Transcending the "medical" versus "natural" childbirth debate, *A Good Birth* paves the entryway to motherhood, turning our attention to the deeper and more important question of what truly makes for the best birth possible.

At age eight, Ramona Treviño climbed to the top of a roof and begged God to let her know he was real. After receiving a sign, she made a pact with herself to follow him always. But family difficulties and growing pains made it hard for her to continue on that path. Pregnant at 16, she dropped out of high school and entered an abusive marriage, which ended in divorce. Wanting to make a difference and to help girls in similar tough situations, she accepted a job as the manager of a Planned Parenthood facility in Sherman, Texas. Over time, however, Ramona began to grapple with whether she was doing women more harm than good, setting her

on a path to seek the truth, no matter where it might lead. Realizing she could no longer refer women for abortions or provide them with false assurances of risk-free sex, Ramona took a leap of faith and left the financial security of her job. Her ultimate conversion involved a full return to the Catholic faith of her childhood and a new role as a pro-life advocate and speaker. This compelling story tells of Ramona's struggle to reconcile her identity as a daughter of God with a world that sends conflicting messages concerning the source of our dignity and happiness. It is the honest and heartfelt account of a woman who, with the help of grace, strove to overcome the wounds of her own past while becoming an agent of healing for others.

Life is a hot mess. There's the bedlam of getting out the door in the morning. The constant breaking down of our homes and bodies and the cars we drive. And the institutions that promise help are often no better. We are surrounded by the constant disorder of governments and disappointed by "organized" religion, the very entities that tell us they can provide us sanity and security. Instead, they leave us scratching our heads or licking our wounds. Chaos surrounds us, and at times, it seems rule our souls, our families, and our world. But does chaos always end in failure or flaw? What if chaos was more than the check engine light of lost causes? What if chaos was the raw material out of which God creates? In the beginning God brought order from chaos, filling the chaos with a beautiful creation, and he's been doing it ever since. Where you and I may experience confusion and disorder, God sees an opportunity for something new--for a rebirth, a renewal, and a renovation. God did this in the beginning, he did it again at the cross, and with renewed vision for our disordered world today, we look to God to do it again. Inspired by the powerful picture of creation in Genesis 1:

author Jessica LaGrone challenges the hope-destroying belief that God has abandoned us in our broken relationships, our pain, and our grief. In the midst of our out-of-control lives, God is there, and he specializes in making new things from the chaos threatened to drown us. When we experience chaos in our own lives and everything feels like it is falling apart, God is just getting started. When the Spirit of God hovers, chaos can give birth to hope.

I hired Daniel to have a baby. I am the only female billionaire in Louisiana. I want nothing but a child ... and the right man. Finding a good man, however, is tough. So I'll settle for a baby. At least then I'll have someone who loves me. A discreet advertisement is the solution: One million dollars for a healthy male to stay with me long enough to get me pregnant. Then he walks away, giving up all paternity rights. It's a sweet deal. Of course, I have a lot of suitors. However, charming, smoking-hot Daniel Fontaine is the only one I want. So, Daniel and his daughter Caroline move into my mansion outside of Baton Rouge. I thought losing my virginity would hurt. Instead, he turns it into a night to commit to memory. And he does the same every night after. It's taking a long time for me to get pregnant ... but I don't mind. Sleeping with Daniel is a perk by itself. It's not easy to keep from falling for him. But can I trust him to be anything more than my baby daddy?

A Guide for Essential Practice

Within the continuum of reproductive health care, antenatal care provides a platform for important health-care functions, including health promotion, screening and diagnosis, and disease prevention. It has been established that, by implementing timely and appropriate evidence-based practices, antenatal care can save lives. Endorsed by the United Nations Secretary-General, this is a comprehensive WHO guideline on routine antenatal care for pregnant women and adolescent girls. It aims to complement existing WHO guidelines on the management of specific pregnancy-related complications. The guidance captures the complex nature of the antenatal care issues surrounding healthcare practices and delivery, and prioritizes person-centered health and well-being --- not only the prevention of death and morbidity --- in accordance with a human rights-based approach. The World Health Organization's comprehensive antenatal care (ANC) guideline WHO recommendations on antenatal care for a positive pregnancy experience was first published in 2016 with the objective of improving the quality of routine health care that all women and adolescent girls receive during pregnancy. The overarching principle - to provide pregnant service users with a positive pregnancy experience - aims to encourage countries to expand their health-care agendas beyond survival, with a view to maximizing health, human rights and the potential of their populations. relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.

Abstract The aim of this project is to improve the care for patients experiencing pregnancy loss in the emergency department (ED). Objectives are to enhance understanding of staff about the patients' experience and their knowledge on how to best care for emotional needs, thus improving quality of patient care, work satisfaction, knowledge, confidence and comfort levels, while decreasing experienced stress. The project was implemented in a mid-sized community hospital with 117 beds, which discharged 74 patients with 0 – interrupted pregnancies + over the previous year from the ED. The project was directed toward nurses, doctors, care partners, chaplains, and social workers. The implementation method included introductions at shift and unit meetings, and delivering an educational module to three social workers, two ED nurses and a chaplain. Using pre-existing materials and staff input, a PowerPoint presentation was created. It described the

development of a position paper on the care of pregnancy loss in the ED and suggestions for implementation of some of the multidisciplinary guidelines posted in the paper and translation into best practices. Implementation proved challenging due to an external disaster affecting the hospital. A pre- and post-intervention questionnaire showed an increase in confidence and knowledge levels and the need for pregnancy loss specific training. Given the positive response to this first PDSA cycle, the recommendation is to continue offering the presentation to ED personnel.
