Power Pivot is a feature of Microsoft Excel. It is available as an add-in in

Excel 2010 and 2013, and is included natively in Excel 2016. PowerPivot extends a local instance of Microsoft Analysis Services Tabular that

Access PDF Power Pivot For Excel

is embedded directly into an Excel Workbook. This allows a user to build a ROLAP model in PowerPivot, and use pivot tables to explore the model once it

Acces PDF Power Pivot For Excel

is built. This allows Excel to act as a Self-Service BI platform, implementing professional expression languages to query the model and calculate

PowerPivot
primarily uses
DAX (Data

Expressions)
as its
expression
language,
although the
model can be
