

## *Power To Save The World The Truth About Nuclear Energy*

Your money, and how you invest it, could help solve the global climate crisis. In *Investing to Save the Planet*, Alice Ross reveals why green investing is an untapped opportunity for you to make a positive impact on the health of the planet and your portfolio. The world is changing. The climate crisis has given rise to a wave of companies that are developing cutting-edge, technological solutions to climate change; from improving energy efficiency to engineering alternative meat. These companies, part of an increasingly-popular investment segment collectively known as Environmental, Social and Governance strategies (ESG), are helping tackle our environmental challenges and reshaping the investment landscape. Urgent and indispensable, this investor's guide will provide you with the vital information you need to build your successful ESG investment strategy to secure a positive future for you and the planet.

**Power to Save the WorldThe Truth About Nuclear EnergyVintage**

In *The Power of Existing Buildings*, academic sustainability expert Robert Sroufe, and construction and building experts Craig Stevenson and Beth Eckenrode, explain how to realize the potential of existing buildings and make them perform like new. This step-by-step guide will help readers to: understand where to start a project; develop financial models and realize costs savings; assemble an expert team; and align goals with numerous sustainability programs. *The Power of Existing Buildings* will challenge you to rethink spaces where people work and play, while determining how existing buildings can save the world. The insights and practical experience of Sroufe, Stevenson, and Eckenrode, along with the project case study examples, provide new insights on investing in existing buildings for building owners, engineers, occupants, architects, and real estate and construction professionals.

**How to use renewable energy as your alternative power suppliers!Get All The Support And Guidance You Need To Be A Success At Helping Save Power!** In today's unstable economic condition, many people have been looking for ways to cut costs and save money while protecting the environment. The poorest people in the world are those who are more affected by the devastating effects of climate change, caused by increased carbon dioxide emissions. Energy efficiency is one of the most cost effective and easiest methods to combat climate change and clean the air that we breathe. The Department of Energy is even working together with businesses, universities and national laboratories to develop innovative, energy-efficient technologies. The use of Renewable Energy has been found to be the most efficient ways to help people save power and at the same time reduce the impact on the environment. This is also an important part of the energy revolution that we need in order to curb the shattering climate change. By taking full advantage of our natural resources, saving power usage and using renewable energy, together, we can shape a better world for the future. By saving power, we are helping the environment. This will not only improve our lives, but will also help make our lives simpler, more enjoyable and happier. You can always help save the world and you can do this by saving energy. Lessen your carbon emission, enhance the health of the Earth and save the world. Inside this report, you are about to learn the following information: About Renewable Energy About Cutting Down On Power Usage See If Your Current Power Provider Has Alternatives To Go Solar Power Passive Solar Power Solar Hot Water Teach Children To Conserve Energy Saving Bulbs Etc What To Avoid The Benefits Of Saving Power

***A character-driven study of some of the darkest moments in our national history, when America failed to prevent or stop 20th-century campaigns to exterminate Armenians, Jews, Cambodians, Iraqi Kurds, Bosnians, and Rwandans.***

***For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In *The Life You Can Save*, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. *The Life You Can Save* teaches us to be a part of the solution, helping others as we help ourselves.***

***What we are thinking is what we attract and create, so this book looks at our collective consciousness to see what we have collectively been thinking and doing wrong since the beginning of time to create all of the problems in the world. Then, as we awaken, we can begin to rebuild our consciousness and world from the ground up to create a new foundation with new programs and thinking that do serve us. As we look at the role that religion and government has played, we can also arrive with a new understanding and direction of where to go from here, starting with learning to think globally and become World Citizens! We must unite with our new collective consciousness of World Peace and act accordingly, as 'The Power of Truth will save the World!'***

*In We Are the Weather, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.*

*A Read with Jenna Today Show Book Club Pick! Finalist for the 2020 National Book Award (Fiction) One of Barack Obama's Summer Reads A Best Book of the Year From: The Washington Post \* Time \* NPR \* Elle \* Esquire \* Kirkus \* Library Journal \* The Chicago Public Library \* The New York Public Library \* BookPage \* The Globe and Mail \* EW.com \* The LA Times \* USA Today \* InStyle \* The New Yorker \* AARP \* Publisher's Lunch \* LitHub \* Book Marks \* Electric Literature \* Brooklyn Based \* The Boston Globe A magnetic novel about two families, strangers to each other, who are forced together on a long weekend gone terribly wrong. From the bestselling author of Rich and Pretty comes a suspenseful and provocative novel keenly attuned to the complexities of parenthood, race, and class. Leave the World Behind explores how our closest bonds are reshaped—and unexpected new ones are forged—in moments of crisis. Amanda and Clay head out to a remote corner of Long Island expecting a vacation: a quiet reprieve from life in New York City, quality time with their teenage son and daughter, and a taste of the good life in the luxurious home they've rented for the week. But a late-night knock on the door breaks the spell. Ruth and G. H. are an older couple—it's their house, and they've arrived in a panic. They bring the news that a sudden blackout has swept the city. But in this rural area—with the TV and internet now down, and no cell phone service—it's hard to know what to believe. Should Amanda and Clay trust this couple—and vice versa? What happened back in New York? Is the vacation home, isolated from civilization, a truly safe place for their families? And are they safe from one another?*

"Your book should help bridge the gap between the academic definitions and research on Matriarchy and real world initiatives." BEATA MURRELL, MATRIARCHAL SCHOLAR "When a cork is no longer held down it rises up. This is what has happened with Women." WILLIAM BOND, AUTHOR OF 'GOSPEL OF THE GODDESS' Patriarchy is destroying the planet, and everything on it. Fortunately, patriarchy is at an end. Changes have occurred, both inner and outer, to transform our society from a 'conquest domination/exploitation principle into one of 'nurturing/caring/justice.' This monumental shift is so vast, that it is not easily seen in details nor at all moments. As we look at day to day existence, male domination is everywhere. But if we look at the big picture, at statistics, studies, astute observation, and by the insight of those who have been focused on the subject, it is obvious. The book begins with the series of articles explaining that males exhibit the need to worship women, an ancient practice forbidden in patriarchy, now surfacing in secular forms. From whence is this need? Why do women show no need to conversely, worship males? This and more are all explained here.

We got ourselves into this. Here's how we can get ourselves out. We know the problem: the amount of biodiversity loss, the scale of waste and pollution, the amount of greenhouse gas we pump into the air... it's unsustainable. We have to do something. And we are resourceful, adaptable and smart. We have already devised many ways to reduce climate change - some now proven, others encouraging and craving uptake. Each one is a solution to get behind. In 39 Ways to Save the Planet, Tom Heap reveals some of the real-world solutions to climate change that are happening around the world, right now. From tiny rice seeds and fossil fuel free steel to grazing elk and carbon-capturing seagrass meadows, each chapter reveals the energy and optimism in those tackling the fundamental problem of our age. Accompanying a major BBC Radio 4 series in collaboration with the Royal Geographical Society, 39 Ways to Save the Planet is a fascinating exploration of our attempt to build a better future, one solution at a time. A roadmap to global action on climate change, it will encourage you to add your own solutions to the list.

An innovative history of how volunteers helped build a global consensus that Western

development intervention across the Global South was desirable, even as critics in aid-recipient nations suggested it was a form of neocolonialism. It will benefit scholars and students of history, development studies and international relations.

The climate crisis is the biggest challenge of our time, and we all have a unique role to play. Start here and now with this book. In this revolutionary call to action, unlock your superpower through a daily practice of sustainability. Noted environmentalist Heather White offers an easy-to-follow guide for climate action while brilliantly weaving together warm and funny stories from her childhood in East Tennessee, anecdotes from 20+ years of environmental advocacy, and scenes from parenting two GenZ daughters in Bozeman, Montana. In *One Green Thing*, White shows you how to contribute to the climate movement through self-discovery - your personality, interests, and strengths. First, you'll take the Service Superpower Profile Assessment, which will reveal your special gifts in service to others and the planet. Based on your profile, you'll then be equipped to: Begin your adventure with a 21-Day Kickstarter Plan that shares specific actions you can take Use the Eco-Impact Top Ten-the primary areas that can affect positive, lasting change-to develop an individualized Eco-Action Plan Log the mental health benefits and measure your progress with the Joy Tracker Write about your journey and your "why" for taking action with exercises and journal prompts that encourage you to reflect Listen and talk with members of Gen Z about their climate anxiety Commit to being an awesome ancestor for future loved ones as you inspire your family, friends, and community to work toward a regenerative, sustainable world Setting the intention each day to take a small step- a "one green thing" to care for the planet--can help ease your eco-anxiety, push the culture toward climate solutions, and create a sense of joy.

Traces the political career of the United Nations humanitarian who lost his life in the 2003 terrorist attack on the UN Headquarters in Iraq, citing his role in the peace negotiations in post-invasion Lebanon and the cease-fire talks in Bosnia.

Stories to Save the World

**This should be prescribed reading for Christians in the Western world...'** From the foreword by Sinclair B. Ferguson, First Presbyterian Church, Columbia, South Carolina **'Bob Davey is to be deeply thanked for this succinct, deeply helpful overview of the progress of Christianity in China.'** Dr Michael A. G. Haykin - Professor of Church History and Biblical Spirituality **In The Power to Save, Bob Davey traces the unconquerable power of the gospel through the years in China. This thrilling account encourages us to pray again for such mighty acts of God even here in the West.'** Faith Cook - writer and daughter of OMF missionaries to China **'It will inform and encourage believers...'** Joel R. Beeke - President, Puritan Reformed Theological Seminary

**A spy is suddenly aware she's being stalked through the streets of an overseas city. A special ops soldier intuitively recognizes something's "off" during a high-risk mission. In these life-threatening situations experts know exactly how to use their senses and what actions to take. At the intersection of *The Gift of Fear* and *Make Your Bed*, *The Power of Awareness* will make sure you will, too. In his empowering book, Dan Schilling shares how to identify and avoid threats using situational awareness and intuition just like the pros. Told with wit and wisdom, this compelling guide uses harrowing stories from Dan's special operations career and those of other experts to outline six easily implemented rules you can apply anywhere to improve your personal safety. It incorporates exercises to understand how situational awareness works in real life, how to better listen to your intuition, and when confronted by a criminal how to make a plan and take action with confidence--so you can escape the threat before it's too late. He also includes tools on how to secure your home or hotel room, use public transportation, plan international travel, and reduce your criminal target appeal and exposure, in addition to how to escape an active shooter situation. As a bonus, you'll even learn how to survive a date without getting murdered. By the last page you'll know that your own Power of Awareness can save your life.**

**Big cities don't have to mean a dystopian future. They can be turned around to be powerhouses of well-being and environmental sustainability - if we empower women. This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering city mayors, key voices in the environmental and feminist movements, and academics. The essays collectively demonstrate both the need for women's empowerment for climate action and the powerful change it can bring. A rallying call - for the planet, for women, for everyone.**

**Now a Netflix biopic, with *Narcos* star Wagner Moura playing diplomat Sergio Vieira de Mello. "The best way to understand today's messy world is to read about the inspiring life and diplomatic genius of Sergio Vieira de Mello."** -Walter Isaacson Originally published as *Chasing the Flame*. Before his death in 2003 in Iraq's first major suicide bomb attack, Sergio Vieira de Mello--a humanitarian and peacemaker with the United Nations--placed himself at the center of the most significant geopolitical crises of the last half-century. He cut deals with the murderous Khmer Rouge in Cambodia, forcibly confronted genocidal killers from Rwanda, and used his intellect and charisma to try to tame militant extremists in Lebanon, Afghanistan, and Iraq. Known as a "cross between James Bond and Bobby Kennedy," Vieira de Mello managed to save lives in the world's most dangerous places, while also pressing the world's most powerful countries to join him in grappling with such urgent dilemmas as: When should killers be engaged, and when should they be shunned? When is military force justified? How can outsiders play a role in healing broken people and broken places? He did not have the luxury of merely posing these questions; Vieira de Mello had to find answers, apply them, and live

**with the consequences. With Sergio, Pulitzer Prize winner and author of The Education of an Idealist Samantha Power offers a profile in courage and humanity--and an unforgettable meditation on how best to manage the deadly challenges of the twenty-first century.**

**#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.**

Recent books have raised the public consciousness about the dangers of global warming and climate change. This book is intended to convey the message that there is a solution. The solution is the rapid development of hydrogen fusion energy. This energy source is inexhaustible and, although achieving fusion energy is difficult, the progress made in the past two decades has been remarkable. The physics issues are now understood well enough that serious engineering can begin. The book starts with a summary of climate change and energy sources, trying to give a concise, clear, impartial picture of the facts, separate from conjecture and sensationalism. Controlled fusion -- the difficult problems and ingenious solutions -- is then explained using many new concepts. The bottom line -- what has yet to be done, how long it will take, and how much it will cost -- may surprise you. Francis F. Chen's career in plasma has extended over five decades. His textbook Introduction to Plasma Physics has been used worldwide continuously since 1974. He is the only physicist who has published significantly in both experiment and theory and on both magnetic fusion and laser fusion. As an outdoorsman and runner, he is deeply concerned about the environment. Currently he enjoys bird photography and is a member of the Audubon Society.

After learning of atomic physics, H. G. Wells began to think of its potential impact on human society. In *The World Set Free*, atomic energy causes massive unemployment, shaking the already fragile social order. The ambitious powers of the world decide to seize the opportunity to compete for dominance, and a world war breaks out, echoing the looming Great War about to ignite in 1914. Waking to the catastrophe, humanity begins the hard search for a way into a better future. The novel traces a soldier, an ex-king, a despot, and a sage through a profound transformation of human society, and we gain a window into Wells' own thoughts and hopes along the way. With one prophetic stroke, Wells gives the first detailed depiction of atomic energy and its potential destructive power, and predicts the use of the air power in modern warfare. He may have even directly influenced the development of nuclear weapons, as the physicist Leó Szilárd, shortly after reading the novel in 1932, then conceived of harnessing the neutron chain reaction critical to the development of the atom bomb. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

**NATIONAL BESTSELLER • Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. “A powerful read that fills one with, dare I say . . . hope?”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE** There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. *All We Can Save* illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, the book is a collection and celebration of visionaries who are leading us on a path toward all we can save. With essays and poems by: Emily Atkin • Xiye Bastida • Ellen Bass • Colette Pichon Battle • Jainey K. Bavishi • Janine Benyus • adrienne maree brown • Régine Clément • Abigail Dillen • Camille T. Dungy • Rhiana Gunn-Wright • Joy Harjo • Katharine Hayhoe • Mary Annaïse Heglar • Jane Hirshfield • Mary Anne Hitt • Ailish Hopper • Tara Houska, Zhaabowekwe • Emily N. Schwartz • Patricia Smith • Emily Stengel • Sarah Stillman • Leah Cardamore Stokes • Amanda Sturgeon • Maggie Thomas • Heather McTeer Toney • Alexandria Villaseñor • Alice Walker • Amy Westervelt • Jane Zelikova

Within every company, there lies a sleeping giant. Companies have long been viewed as either the primary cause of environmental destruction, or as a deep-pocketed funding source for people trying to confront it. But with their access to innovation, new technology, and intellectual firepower, most companies are built to tackle the challenges our planet faces in a way smaller organizations and foundations can't. What would happen if executives stopped looking at sustainability as a side project for the PR team and saw it instead as a way to benefit the planet and their profits? The giant would be awakened--and the world would never be the same. ? Jake Kheel wrote *Waking the Sleeping Giant* to help unlock your company's hidden power to save the planet. He offers an action-driven, common sense approach to sustainability supported by real-life examples from his work in the Dominican Republic that demonstrate how companies can become a potent force for sustainability. This book offers up tangible ways everyone--from executives to employees--can make a difference and demonstrate the value of sustainability beyond the bottom line.

The phenomenal growth of gaming has inspired plenty of hand-wringing since its inception--from the press, politicians, parents, and everyone else concerned with its effect on our brains, bodies, and hearts. But what if games could be good, not only for individuals but for the world? In *Power Play*, Asi Burak and Laura Parker explore how video games are now pioneering innovative social change around the world. As the former executive director and now chairman of Games for Change, Asi Burak has spent the last ten years supporting and promoting the use of video games for social good, in collaboration

with leading organizations like the White House, NASA, World Bank, and The United Nations. The games for change movement has introduced millions of players to meaningful experiences around everything from the Israeli-Palestinian conflict to the US Constitution. Power Play looks to the future of games as a global movement. Asi Burak and Laura Parker profile the luminaries behind some of the movement's most iconic games, including former Supreme Court judge Sandra Day O'Connor and Pulitzer-Prize winning authors Nicholas Kristof and Sheryl WuDunn. They also explore the promise of virtual reality to address social and political issues with unprecedented immersion, and see what the next generation of game makers have in store for the future.

*No is perhaps the most important and certainly the most powerful word in the language. Every day we find ourselves in situations where we need to say No—to people at work, at home, and in our communities—because No is the word we must use to protect ourselves and to stand up for everything and everyone that matters to us. But as we all know, the wrong No can also destroy what we most value by alienating and angering people. That's why saying No the right way is crucial. The secret to saying No without destroying relationships lies in the art of the Positive No, a proven technique that anyone can learn. This indispensable book gives you a simple three-step method for saying a Positive No. It will show you how to assert and defend your key interests; how to make your No firm and strong; how to resist the other side's aggression and manipulation; and how to do all this while still getting to Yes. In the end, the Positive No will help you get not just to any Yes but to the right Yes, the one that truly serves your interests. Based on William Ury's celebrated Harvard University course for managers and professionals, The Power of a Positive No offers concrete advice and practical examples for saying No in virtually any situation. Whether you need to say No to your customer or your coworker, your employee or your CEO, your child or your spouse, you will find in this book the secret to saying No clearly, respectfully, and effectively. In today's world of high stress and limitless choices, the pressure to give in and say Yes grows greater every day, producing overload and overwork, expanding e-mail and eroding ethics. Never has No been more needed. A Positive No has the power to profoundly transform our lives by enabling us to say Yes to what counts—our own needs, values, and priorities. Understood this way, No is the new Yes. And the Positive No may be the most valuable life skill you'll ever learn!*

*How solar could spark a clean-energy transition through transformative innovation—creative financing, revolutionary technologies, and flexible energy systems. Solar energy, once a niche application for a limited market, has become the cheapest and fastest-growing power source on earth. What's more, its potential is nearly limitless—every hour the sun beams down more energy than the world uses in a year. But in Taming the Sun, energy expert Varun Sivaram warns that the world is not yet equipped to harness erratic sunshine to meet most of its energy needs. And if solar's current surge peters out, prospects for replacing fossil fuels and averting catastrophic climate change will dim. Innovation can brighten those prospects, Sivaram explains, drawing on firsthand experience and original research spanning science, business, and government. Financial innovation is already enticing deep-pocketed investors to fund solar projects around the world, from the sunniest deserts to the poorest villages. Technological innovation could replace today's solar panels with coatings as cheap as paint and employ artificial photosynthesis to store intermittent sunshine as convenient fuels. And systemic innovation could add flexibility to the world's power grids and other energy systems so they can dependably channel the sun's unreliable energy. Unleashing all this innovation will require visionary public policy: funding researchers developing next-generation solar technologies, refashioning energy systems and economic markets, and putting together a diverse clean energy portfolio. Although solar can't power the planet by itself, it can be the centerpiece of a global clean energy revolution. A Council on Foreign Relations Book*

*120 inspiring visual stories on environmentalism from key figures, charities, activists, and artists. The Most Important Comic Book On Earth is a global collaboration for planetary change, bringing together a diverse team of 300 leading environmentalists, artists, authors, actors, filmmakers, musicians, and more to present over 120 stories to save the world. Whether it's inspirational tales from celebrity names such as Cara Delevingne and Andy Serkis, hilarious webcomics from War and Peas and Ricky Gervais, artworks by leading illustrators David Mack and Tula Lotay, calls to action from activists George Monbiot and Jane Goodall, or powerful stories by Brian Azzarello and Amy Chu, each of the comics in this anthology will support projects and organizations fighting to save the planet and Rewrite Extinction.*

*\*Foreword by Robert Macfarlane, bestselling author of The Lost Words.\* If you're worried about climate change, this book is an essential and reassuring read. We often feel like we don't have the power to make real change. But our small changes can add up to something BIG. Packed with reassuring step by step actions and easy to follow DIY activities, How You Can Save The Planet is the perfect gift for young activists who want to make a difference. With simple explanations, practical tips and stories from children across the world, this guide is ideal for young people who are worried about climate change and want to help our planet! Crafted by Hendrikus van Hensbergen, whose work is featured on BBC*

*Bitesize[JP2] , this inspiring read is perfect for children at KS2. 'Every young person in the country should be given this book' Sir Tim Smit, Founder of The Eden Project 'It's enlightening, inspiring and empowering' Kate Humble, TV presenter 'Wonderfully informative, fun and practical [. . .] A great source of inspiration' The Rich Brothers, TV presenters*

*A guided tour of a revolution in the making that promises to change our lives Global warming, rolling black outs, massive tanker spills, oil dependence: our profligate ways have doomed us to suffer such tragedies, right? Perhaps, but Vijay Vaitheeswaran, the energy and environment correspondent for The Economist, sees great opportunity in the energy realm today, and Power to the People is his fiercely independent and irresistibly entertaining look at the economic, political, and technological forces that*

are reshaping the world's management of energy resources. In it, he documents an energy revolution already underway—a revolution as radical as the communications revolution of the past decades.

Investing to Save the Planet

**"An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet." —Jedediah Purdy, New Republic** In his most urgent book to date, Pulitzer Prize-winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), *Half-Earth* argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).

The James Beard Award-winning founder of Milk Bar and host of *Bake Squad* shares her personal stories and wisdom for igniting passion, following your joy, and creating a satisfying life. *Dessert* connects us heart-to-heart like almost nothing else. It brings us together in good times and bad, celebration and solace. It marks big and small milestones and creates memories of comfort and joy. And Christina Tosi, the founder and CEO of Milk Bar, believes it can save the world. Does the combination of sugar, flour, and butter have some magical ability to fix all the craziness of our modern existence? Of course not. Tosi knows a cookie is just a cookie—but bringing the joy a cookie holds into every area of your life most definitely can. The spirit of dessert—the relentless, unflinching commitment to finding or creating joy even when joy feels hard to come by—is what can save us. And then we, in turn, can each save the world. Tosi shares the wisdom she learned growing up surrounded by strong women who showed her baking's ability to harness love and create connection, as well as personal stories about succeeding in the highly competitive food world by unapologetically being her true self. Studded with personal and unorthodox recipes, *Dessert Can Save the World* reveals the secret ingredients for transforming our outlooks, our relationships, our work, and our entire collective existence into something boldly optimistic and stubbornly joyful.

Examines the history and purpose of political rituals, discusses examples from Aztec cannibal rites to presidential inauguration, and argues that the use of ritual determines the success of political groups.

An optimistic--but realistic and feasible--action plan for fighting climate change while creating new jobs and a healthier environment: electrify everything. Climate change is a planetary emergency. We have to do something now—but what? Saul Griffith has a plan. In *Electrify*, Griffith lays out a detailed blueprint—optimistic but feasible—for fighting climate change while creating millions of new jobs and a healthier environment. Griffith's plan can be summed up simply: electrify everything. He explains exactly what it would take to transform our infrastructure, update our grid, and adapt our households to make this possible. Billionaires may contemplate escaping our worn-out planet on a private rocket ship to Mars, but the rest of us, Griffith says, will stay and fight for the future. Griffith, an engineer and inventor, calls for grid neutrality, ensuring that households, businesses, and utilities operate as equals; we will have to rewrite regulations that were created for a fossil-fueled world, mobilize industry as we did in World War II, and offer low-interest "climate loans." Griffith's plan doesn't rely on big, not-yet-invented innovations, but on thousands of little inventions and cost reductions. We can still have our cars and our houses—but the cars will be electric and solar panels will cover our roofs. For a world trying to bounce back from a pandemic and economic crisis, there is no other project that would create as many jobs—up to twenty-five million, according to one economic analysis. Is this politically possible? We can change politics along with everything else.

**NATIONAL BESTSELLER** "When you wake up and you see that the Earth is not just the environment, the Earth is us, you touch the nature of interbeing. And at that moment you can have real communication with the Earth... We have to wake up together. And if we wake up together, then we have a chance. Our way of living our life and planning our future has led us into this situation. And now we need to look deeply to find a way out, not only as individuals, but as a collective, a species." -- Thich Nhat Hanh We face a potent intersection of crises: ecological destruction, rising inequality, racial injustice, and the lasting impacts of a devastating pandemic. The situation is beyond urgent. To face these challenges, we need to find ways to strengthen our clarity, compassion, and courage to act. Beloved Zen Master Thich Nhat Hanh is blazingly clear: there's one thing we all have the power to change, which can make all the difference, and that is our mind. Our way of looking, seeing, and thinking determines every choice we make, the everyday actions we take or avoid, how we relate to those we love or oppose, and how we react in a crisis. Mindfulness and the radical insights of Zen meditation can give us the strength and clarity we need to help create a regenerative world in which all life is respected. Filled with Thich Nhat Hanh's inspiring meditations, Zen stories and experiences from his own activism, as well as commentary from Sister True Dedication, one of his students *Zen and the Art of Saving the Planet* shows us a new way of seeing and living that can bring healing and harmony to ourselves, our relationships, and the Earth.

*Daily news of systemic injustice has caused activist rhetoric to balloon. Tyler Wigg-Stevenson hopes to slow this trend, suggesting that our complex global situation is forcing us to see our limits as world-changers. He calls Christians to leave aside the heady pursuit of causes and take their rightful place as standard-bearers of God's peace.*

*"The world is changing, but innovative answers can be found in tradition. Badre offers comprehensive outlines as to how finance is the key to ensuring a sustainable future, ripe with growth, eradication of poverty and modernization"--*

*A paradigm-shifting book in the vein of Sapiens that brings a crucial Indigenous perspective to historical and cultural issues of history, education, money, power, and sustainability—and offers a new template for living. As an indigenous person, Tyson Yunkaporta looks at global systems from a unique perspective, one tied to the natural and spiritual world. In considering how contemporary life diverges from the pattern of creation, he raises important questions. How does this affect us? How can we do things differently? In this thoughtful, culturally rich, mind-expanding book, he provides answers.*

*Yunkaporta's writing process begins with images. Honoring indigenous traditions, he makes carvings of what he wants to say, channeling his thoughts through symbols and diagrams rather than words. He yarns with people, looking for ways to connect images and stories with place and relationship to create a coherent world view, and he uses sand talk, the Aboriginal custom of drawing images on the ground to convey knowledge. In Sand Talk, he provides a new model for our everyday lives. Rich in ideas and inspiration, it explains how lines and symbols and shapes can help us make sense of the world. It's about how we learn and how we remember. It's about talking to everyone and listening carefully. It's about finding different ways to look at things. Most of all it's about a very special way of thinking, of learning to see from a native perspective, one that is spiritually and physically tied to the earth around us, and how it can save our world. Sand Talk include 22 black-and-white illustrations that add depth to the text.*

*The sequel to the #1 New York Times bestseller Princesses Wear Pants by TODAY's Savannah Guthrie and parent educator Allison Oppenheim Princess Penelope Pineapple is back and ready to save the day! When she receives an SOS from Princess Sabrina Strawberry, Princess Penny learns that the Strawberry Kingdom's bees have disappeared. Without bees, how will they enjoy their most precious fruit? Penny knows the power of teamwork, so she calls a meeting of the Fruit Nations! And princesses from around the land—from Princess Beatrice Blueberry to Princess Kira Kiwi—answer the call to help a friend in need. With a little creative thinking and a whole lot of girl power, the princesses work together for bee-utiful results. TODAY's beloved coanchor Savannah Guthrie and educator Allison Oppenheim have crafted another irresistible tale that celebrates how nothing is sweeter than friendship. An informed look at the myths and fears surrounding nuclear energy, and a practical, politically realistic solution to global warming and our energy needs. Faced by the world's oil shortages and curious about alternative energy sources, Gwyneth Cravens skeptically sets out to find the truth about nuclear energy. Her conclusion: it is a totally viable and practical solution to global warming. In the end, we see that if we are to care for subsequent generations, embracing nuclear energy is an ethical imperative.*
