Pastor Martin began his ministry work at Crenshaw Christi an Center in Los Angeles, CA where he was Born Again in 1975. In 1977 his training was completed as a Counselor and in the years that followed, many were counseled in the Word of God, in the area of receiving Christ as savior, receiving the Holy Spirit, Assurance of Salvation and Basic Christian Doctrine. These "mini-teaching sessions were invaluable in providing a foundation of Christian stair steps to maturity." In 1980 Mr. Martin enrolled at Confrmed Word Christian Bible College and was first Ordained in 1982 at his home church in Los Angeles: Song of Solomon Ministries. As Associate Pastor and Administrator of The Evangelistic Rescue Ministries, Pastor Martin was Ordained again in 1987. A wise Evangelist advised me to get Paperwork from several organizations because you never know when you will be in a remote area of the world where people will only honor paperwork from their own, he said. In 1992 Pastor Martin worked with the regional outreach of RTV (Reclaiming the Valley) and as a team member, ordained me who sought training and supervision through RTV, at which point he was ordained again through RTV since their paperwork was recognized in many regions of the world. In the early period of the 1990's Pastor Martin was elected Chairman of the Local Concerts of Prayer, a worldwide prayer movement with a highly successful branch in Pasadena. Not long after a as Press coordinator With the March for Jesus (a worldwide march of millions), Pastor Marti n became Chairman of the Board of Harvest-Time Ministries, Inc. In Pasadena, and then Associate Pastor at Grace Community Bible Church. Pastor Martin is also a teacher-on-staff at CBI (Christian Bible Institute), a Bible teaching college with satellite campuses across Los Angeles.

Temperature affects everything. It influences all aspects of the physical environment and governs any process that involves a flow of energy, setting boundaries on what an organism can or cannot do. This novel textbook reveals the key principles behind the complex relationship between organisms and temperature, namely the science of thermal ecology. It starts providing a rigorous framework for understanding the flow of energy in and out of the organism, before describing the influence of temperature on what organisms can do and how fast they can do it. With these fundamental principles covered, the bulk of the book explores thermal ecology itself, incorporating the important extra dimension of interactions with other organisms. An entire chapter is devoted to the crucially important subject of how organisms are responding to climate change. Indeed, the threat of rapid climatic change on a global scale is a stark reminder of the challenges that remain for evolutionary thermal biologists, and adds a sense of urgency to this book's mission.

For Writing Aficionados from All Walks of Life This book is based on a simple but powerful observation: Students and young professionals who develop outstanding writing skills do so primarily by mastering a limited number of the most important writing principles, which they use over and over again. This statement begs the question: What are these recurring principles? The answer to this question is the basis of this material. "The Little Red Writing Book" is especially suitable for high school students wanting to master the basics of expository writing. It is also suitable for college students seeking a review of basic writing skills. A wealth of examples, charts, and engaging exercises makes this book an invaluable guide for anyone who wants to master those skills that will make a good writer even better. Brandon Royal is an award-winning writer whose educational authorship includes "The Little Gold Grammar Book, The Little Red Writing Book Deluxe Edition, The Little Green Math Book, The Little Blue Reasoning Book," and "Reasoning with Numbers." During his tenure working in Hong Kong for US-based Kaplan Educational Centers a Washington Post subsidiary and the largest test-preparation organization in the world Brandon honed his theories of teaching and education and developed a set of key learning principles to help define the basics of writing, grammar, math, and reasoning. A Canadian by birth and graduate of the University of Chicago's Booth School of Business, his interest in writing began after completing writing courses at Harvard University. Since then he has authored a dozen books and reviews of his books have appeared in "Time Asia" magazine, "Publishers Weekly, Library Journal of America, Midwest Book Review, The Asian Review of Books, Choice Reviews Online, Asia Times Online," and About.com. Brandon is a five-time winner of the International Book Awards, a five-time gold medalist at the President's Book Awards, as well as a winner of the Global eBook Awards, the USA Book News Best Book Awards, and recipient of the 2011 Educational Book of the Year award as presented by the Book Publishers Association of Alberta. The articulate exposition of Royal's twenty principles of writing fit neatly into 128 short, accessible (paperback) pages. I recommend this wonder to all my writing students. Perhaps one day writing committees will wisely follow suit and make this a primary text for all writing courses at their schools. --Ray Turner, B.A., MA (Communications), Writing Instructor and Former Educational Administrator, Corpus Christi TX, USA

We must take risks if we are to grow personally and professionally. Risks are a part of a fully-lived life. But in the commotion of today's fast-paced, technology-driven world, people have become disconnected from the wise counsel of their inner resources, hampering their ability to make meaningful choices. Consequently, risks are increasingly being taken in an impulsive, haphazard, and often reckless way. In Right Risk, Bill Treasurer draws on the experiences and insights of successful risk-takers (including his own experiences as a daredevil high diver) to detail ten principles that readers can use to take risks with greater intelligence and confidence. Right Risk is about taking more deliberate and intentional risks in an increasingly complex world. It aims to answer such questions as: How do I know which risks to take and which to avoid? How do I balance the need to take more risks with the need to preserve my safety? How do I muster up the courage to take risks when it is so much easier not to? How do I confront all those people who keep telling me what a mistake it would be to take the risk? And, most importantly, How do I make risk-taking less of an anxiety-provoking experience? Right Risk will help readers take risks with greater discipline, focus, and maturity-to confidently face life's challenges and take advantage of life's opportunities.

Principles of Change constitutes a new approach to evidence-based practice in psychotherapy that goes beyond the traditional and unidirectional dissemination of research, whereby clinicians are typically viewed as passive recipients of scientific findings. Based on an extensive review of literature, it first offers a list of 38 empirically based principles of change grouped in five categories: client prognostic, treatment/provider moderating, client process, therapeutic relationship, and therapist interventions. Six therapists from diverse theoretical orientations then describe, in rich and insightful detail, how they implement each of these principles. The book also offers exchanges between researchers and clinicians on several key issues, including: how similarly and differently change principles are addressed or used across a variety of treatments; and how clinicians' observations and reflections can guide future research. By presenting together these unique yet complementary experiences, Principles of Change will support synergetic advances in understanding and improving psychotherapy, laying the foundation for further collaborations and partnerships between stakeholders in mental health services.
