This book is the most comprehensive book you will find on AutoCAD 2019 – 2D Drafting.

Covering all of the 2D concepts, it uses both metric and imperial units to illustrate the myriad drawing and editing tools for this popular application. Use the companion disc to set up drawing exercises and projects and see all of the

book's figures in color. AutoCAD 2019 Beginning and Intermediate includes over 100 exercises or "mini-workshops," that complete small projects from concept through actual plotting. Solving all of the workshops will simulate the creation of three projects (architectural and mechanical) from beginning to end, without overlooking any of the basic commands and functions in AutoCAD 2019. Features:

- Designed for novice users of AutoCAD 2019. Most useful for "teach yourself" or instructor-led AutoCAD training in Level 1 or 2. No previous CAD experience is required***
- New chapter on the "Drawing Compare" function***
- Companion files featuring drawings, practice and finished plots, 4-color figures, etc.***
- Includes over 100 "mini-workshops" and hundreds of figures that complete small projects***
- Uses both English and metric units in examples, exercises, projects, and descriptions***
- Covers three full projects (metric and imperial) for architectural and mechanical designs***
- Helps you to prepare for the AutoCAD Certified Professional exam***
- Exercises and instructor's resources available for use as a textbook***

Learn to calculate dosages accurately and administer drugs safely! Gray Morris's Calculate with Confidence, Second Canadian Edition uses a clear, step-by-step approach to make drug

dosage calculations easy. More than 2,000 practice questions help you review basic math and then master the three standard methods of dosage calculation: ratio and proportion, formula, and dimensional analysis. With the increasing responsibility of the nurse in mind, emphasis is placed on critical thinking and clinical reasoning in preventing medication errors. Reflecting current practice in Canadian health care, this book also provides excellent preparation for Canadian licensure exams! SI measurement units and generic/Canadian drug names are included throughout the text. Practice problems and real-world examples help students master correct dosage calculations and safe medication administration, with rationales included in practice problem answers to enhance the understanding of principles. Tips for Clinical Practice boxes summarize information critical to math calculation and patient safety. Safety Alert! boxes highlight common medication errors and identify actions that must be taken to avoid calculation errors. Chapter Review problems test student knowledge of all major topics presented in the chapter. Pre-Test review includes practice problems to help students assess their basic math skills and identify their strengths and weaknesses, covering fractions, decimals, percentages, and ratio and proportion. Post-Test

in Unit One allows students to assess and evaluate their understanding after completing the chapters on basic math. Comprehensive Post-Test at the end of the book covers dosage calculations and conversions, using real-life drug labels and situations. NCLEX® exam-style questions on Evolve help students prepare for the type of questions seen on the NCLEX-RN® Examination. NEW! Next Generation NCLEX-RN® exam-style case studies on the Evolve website provide drug calculation practice for the Next Generation NCLEX Examination. NEW! Increased number of Clinical Reasoning exercises builds students' critical thinking skills, with a focus on preventing medication errors. NEW! Thoroughly updated content includes the latest Health Canada-approved medications, current drug labels, the latest research, Canadian statistics, commonly used abbreviations, and recommended practices related to medication errors and their prevention. NEW! A-Z medication index references the page numbers where drug labels can be found. NEW! Tips for Clinical Practice from the text are now available on Evolve in printable, easy-reference format. Support students as they build their conceptual knowledge and prepare for the STAAR Mathematics test through higher-level thinking problems and graphical representations from

TIME For Kids. This resource provides practice problems across a wide range of question formats, including multistep problems, analytical charts and graphs, and griddable questions designed to demonstrate student understanding. With regular practice, test-taking anxiety can be reduced and students can build the following skills: express understanding of concepts, showcase mathematical thinking, generalize mathematical concepts, apply formulas and theories learned in the classroom to real-world problems, build problem-solving strategies, use multiple mathematics tools, and reflect on mathematical concepts learned. This must-have resource is perfect to help promote the use of skills needed for success in the 21st century.

A thorough understanding of biology, no matter which subfield, requires a thorough understanding of statistics. As in previous editions, Havel and Hampton (with new co-

author Scott Meiners) ground students in all essential methods of descriptive and inferential statistics, using examples from different biological sciences. The authors have retained the readable, accessible writing style popular with both students and instructors. Pedagogical improvements new to this edition include concept checks in all chapters to assist students in active learning and code samples showing how to solve many of the book's examples using R.
