The packaging industry is under pressure from regulators, customers and other stakeholders to improve packaging's sustainability by reducing its environmental and societal impacts. This is a considerable challenge because of the complex interactions between products and their packaging, and the many roles that packaging plays in the supply chain. Packaging for Sustainability is a concise and readable handbook for practitioners who are trying to implement sustainability strategies for packaging. Industry case studies are used throughout the book to illustrate possible applications and scenarios. Packaging for Sustainability draws on the expertise of researchers and industry practitioners to provide information on business benefits, environmental issues and priorities, environmental evaluation tools, design for environment, marketing strategies, and challenges for the future.

*This book elucidates the radiation therapy protocols and procedures for the management of adult patients presenting with primary benign and malignant central nervous system tumors. With the development of new treatment strategies and rapid advancement of radiation*

*technology, it is crucial for radiation oncologists to maintain and refine their knowledge and skills. Dedicated exclusively to adult CNS radiation oncology, this textbook explores CNS tumors ranging from the common to the esoteric as well as secondary cancers of metastatic origin. The first half of the book is organized anatomically: tumors of the brain, spinal cord, leptomeninges, optic pathway, ocular choroid, and skull base. The second half covers primary CNS lymphoma, rare CNS tumors, metastatic brain disease, vascular conditions of the CNS, radiation-associated complications, and radiation modalities. Each chapter provides guidance on treatment field design, target delineation, and normal critical structure tolerance constraints in the context of the disease being treated. Learning objectives, case studies, and Maintenance of Certification Self-Assessment Continuing Medical Education-style questions and answers are incorporated throughout the book. This is an ideal guide for radiation oncologists, residents, and fellows, but medical students may also find value in the text.*

Mamluk Art

Meyerhold on Theatre

The first comprehensive examination of the painter's formative years, tracing the evolution of Monet's early style and personal ambitions that drove the rest of his career. This elegant volume is the first to be devoted to the young genius of Claude Monet (1840-1926). Bringing together the greatest paintings from his early career including his first Salon-exhibited work, the Kimbell Art Museum's "La Pointe de la Heve at Low Tide"; "Dejeuner sur l'Herbe (Luncheon on the Grass)" and "The Magpie" from the Musee d'Orsay; and "The Green Wave" and "La Grenouillere" from the Metropolitan Museum of Art. It features essays by distinguished scholars, focusing on the evolution of Monet's own distinctive mode of painting. Through the 1860s, the

young painter absorbed and transformed a variety of influences, from the lessons of the Barbizon school and his mentor Boudin to the challenges posed by his friends Manet, Pissarro, Renoir, and Sisley. Artistic innovation and personal ambition shaped the work of the celebrated impressionist painter from the very start of his long and illustrious career."
