The Freakonomics of social psychology' - The Times

The acclaimed New York Times and Wall Street Journal bestseller from Robert Cialdini—"the foremost expert on effective persuasion" (Harvard Business Review)—explains how it's not necessarily the message itself that changes minds, but the key moment before you deliver that message. What separates effective communicators from truly successful persuaders? With the same rigorous scientific research and accessibility that made his Influence an iconic bestseller, Robert Cialdini explains how to prepare people to be receptive to a message before they experience it. Optimal persuasion is achieved only through optimal pre-suasion. In other words, to change "minds" a persuader must also change "states of mind." Named a "Best Business Books of 2016" by the Financial Times, and "compelling" by The Wall Street Journal, Cialdini's Pre-Suasion draws on his extensive experience as the most cited social psychologist of our time and explains the techniques a person should implement to become a master persuader. Altering a listener's attitudes, beliefs, or experiences isn't necessary, says Cialdini—all that's required is for a communicator to redirect the audience's focus of attention before a relevant action. From studies on advertising imagery to treating opiate addiction, from the annual letters of Berkshire Hathaway to the annals of history, Cialdini outlines the specific techniques you can use on online marketing campaigns and even effective wartime propaganda. He illustrates how the artful diversion of attention leads to successful pre-suasion and gets your targeted audience primed and ready to say, "Yes." His book is "an essential tool for anyone serious about science based business strategies...and is destined to be an instant classic. It belongs on the shelf of anyone in business, from the CEO to the newest salesperson" (Forbes).

Pre-Suasion by Robert Cialdini | Book Summary The buying and selling of goods and services has grown at an alarming rate in recent years. With this growth comes an increase in the number of salespeople and people aspiring to become salespeople. This explosion of trade markets means that for anyone to make it, they will need to have the best skills in this field. The aim of any salesperson is to persuade a customer to buy a product from them. In this book, Robert Cialdini, a leading pioneer in research of the application of psychology and influence, talks about persuasion. Persuasion is a form of influence; with it, one can influence other people's beliefs, attitudes, intentions, and even behavior. The mastery of persuasion increases the probability of a salesperson getting an assent from a client, and brings an end to consumers falling for sales tricks designed to get them to buy stuff they don't need in the first place. Persuasion will make life better for most people by making them better suited to take advantage of life's opportunities, like convincing an interviewing panel that you are the right person for a certain job. The secrets to persuading anyone, at work and in life, from a top communication strategist. In the post-fact, deeply divided world we live in, true persuasion is rare. Engaging with people holding differing opinions is rarer still. But for progress to take place, persuasion must happen. Whether it's convincing an employer you are right for the job, a customer that your product is the best, or your closed-minded uncle that good people can disagree, it takes the art--and science--of persuasion to move forward. So, how do you change someone's mind--or at least advance the conversation--when everyone is entrenched in their own points of view? Communication expert Lee Hartley Carter has spent nearly twenty years advising and helping the world's most well-known companies do just that. Among the counterintuitive secrets you'll learn: * It's not enough to understand the person you're talking to--you must truly empathize with them (yes, even them). * Logic alone doesn't work. Stories and emotions are what move us most. *

When communicating in a crisis, our first instinct is almost always wrong. Filled with deeply researched insights into how we make up--and change--our minds, as well as colorful real-world examples and actionable recommendations, Persuasion will help you hone your message and craft your narrative in order to get heard and get results.

Presents information from scientific studies and interviews with experts in several fields that suggests that delaying responses when making a decision can improve the decision quality, even in situations where time is in short supply.

In the second edition of this witty and infectious book, Madsen Pirie builds upon his guide to using - and indeed abusing - logic in order to win arguments. By including new chapters on how to win arguments in writing, in the pub, with a friend, on Facebook and in 140 characters (on Twitter), Pirie provides the complete guide to triumphing in altercations ranging from the everyday to the downright serious. He identifies with devastating examples all the most common fallacies popularly used in argument. We all like to think of ourselves as clear-headed and logical - but all readers will find in this book fallacies of which they themselves are guilty. The author shows you how to simultaneously strengthen your own thinking and identify the weaknesses in other people arguments. And, more mischievously, Pirie also shows how to be deliberately illogical - and get away with it. This book will make you maddeningly smart: your family, friends and opponents will all wish that you had never read it. Publisher's warning: In the wrong hands this book is dangerous. We recommend that you arm yourself with it whilst keeping out of the hands of others. Only buy this book as a gift if you are sure that you can trust the recipient.

Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly

obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them.

When it comes to persuasion, success can begin before you say a word. 'An instant classic.' Forbes 'Utterly fascinating.' Adam Grant, author of Originals and Give and Take 'Shockingly insightful.' Chip Heath, co-author of Switch and Made to Stick NEW YORK TIMES BESTSELLER In his global bestseller Influence, Professor Robert Cialdini transformed the way we think about the craft of persuasion. Now he offers revelatory new insights into the art of winning people over: it isn't just what we say or how we say it that counts, but also what goes on in the moments before we speak. This is the world of 'pre-suasion', where subtle turns of phrase, seemingly insignificant visual cues, and apparently unimportant details of location can prime people to say 'yes' even before they are asked. And as Cialdini reveals, it's a world you can master. If you understand the tools of pre-suasion, you will better placed to win a debate, get support for an idea or cause, promote a campaign - even persuade yourself to do something you find difficult. Drawing on the latest research, and packed with fascinating case studies, Pre-Suasion is a masterclass in enhancing your powers of influence. 'Mind-blowing.' Management Today 'Accessible and intellectually rigorous.' Books of the Year, The Times 'Fascinating, fluent and original.' Tim Harford, author of The Undercover Economist Strikes Back

At some point today you will have to influence or persuade someone - your boss, a co-worker, a customer, client, spouse, your kids, or even your friends. What is the smallest change you can make to your request, proposal or situation that will lead to the biggest difference in the outcome? In The small BIG, three heavyweights from the world of persuasion science and practice -- Steve Martin, Noah Goldstein and Robert Cialdini -- describe how, in today's information overloaded and stimulation saturated world, increasingly it is the small changes that you make that lead to the biggest differences. In the last few years more and more research - from fields such as neuroscience, cognitive psychology, social psychology, and behavioral economics - has helped to uncover an even greater understanding of how influence, persuasion and behavior change happens. Increasingly we are learning that it is not information per se that leads people to make decisions, but the context in which that information is presented. Drawing from extensive research in the new science of persuasion, the authors present lots of small changes (over 50 in fact) that can bring about momentous shifts in results. It turns out that anyone can significantly increase his or her ability to influence and persuade others, not by informing or educating people into change but instead by simply making small shifts in approach that link to deeply felt human motivations.
