Speed read people, decipher body language, detect lies, and understand human nature. Is it possible to analyze people without them saying a word? Yes, it is. Learn how to become a "mind reader" and forge deep connections. How to get inside people's heads without them knowing. Read People Like a Book isn't a normal book on body language of facial expressions. Yes, it includes all of those things, as well as new techniques on how to truly detect lies in your everyday life, but this book is more about understanding human psychology and nature. We are who we are because of our experiences and pasts, and this guides our habits and behaviors more than anything else. Parts of this book read like the most interesting and applicable psychology textbook you've ever read. Take a look inside yourself and others! Understand the subtle signals that you are sending out and increase your emotional intelligence. Patrick King is an internationally bestselling author and social skills coach. His writing draws of a variety of sources, from scientific research, academic experience, coaching, and real life experience. Learn the keys to influencing and persuading others. •What people's limbs can tell us about their emotions. •Why lie detecting isn't so

reliable when ignoring context. •Diagnosing personality as a means to understanding motivation. •Deducing the most with the least amount of information. •Exactly the kinds of eye contact to use and avoid Find shortcuts to connect quickly and deeply with strangers. The art of reading and analyzing people is truly the art of understanding human nature. Consider it like a cheat code that will allow you to see through people's actions and words. Decode people's thoughts and intentions, and you can go in any direction you want with them.

JAMES II was Britain's last Catholic king. The spectacular collapse of his regime in 1688 and the seizure of his throne by his nephew William of Orange are the best-known events of his reign. But what of his life after this? What became of him during his final exile? John Callow's groundbreaking study focuses on this hitherto neglected period of his life: the twelve years he spent attempting to recover his crown through war, diplomacy, assassination and subterfuge. This is the story of the genesis of jacobitism; of the devotion of the fallen king's followers, who shed their blood for him at the battle of the Boyne and the massacre at Glencoe, gave up estates and riches to follow him to France, and immortalised his name in artworks, print, and song. Yet, this first 'King Over the Water' was far more than a figurehead. A grim, inflexible warrior and a maladroit politician, he was also a man of undeniable principle, which he pursued regardless of the cost to either himself or his subjects. He was an author of considerable talent, and a monarch capable of successive reinventions. Denied his earthly kingdoms, he finally settled upon attaining a heavenly crown and was venerated by the Jacobites as a saint. This powerful, evocative and original book will appeal to anyone interested in Stuart history, politics, culture and military studies.

Extensively Annotated Bibliography and Sourcebook

In nineteenth-century Britain, learned societies and clubs became contested sites in which a new kind of identity was created: the charisma and persona of the scholar, of the intellectual.

This second volume of James Clerk Maxwell's correspondence and manuscript papers begins in mid-1862 with his first reference reports for the Royal Society, and concludes in December 1873 shortly before the formal inauguration of the Cavendish Laboratory. The documents describe his involvement with the wider scientific community in Victorian Britain, and the period of his scientific maturity. In the years 1862-73 Maxwell wrote the classic works on statistical molecular theory and field physics, including the Treatise on Electricity and Magnetism, which established his unique status in the history of science. His letters and drafts of this period provide unique insight into this work, which remains fundamental to modern physics. Few of the manuscripts reproduced here have received prior publication in other than truncated form, and the volume includes Maxwell's correspondence with G.G. Stokes, Lord Kelvin and P.G. Tait. The edition is annotated with a full historical commentary and will be fascinating reading for anyone interested in the history of science or physics.

The three-volume set of LNCS 12532, 12533, and 12534 constitutes the proceedings of the 27th International Conference on Neural Information Processing, ICONIP 2020, held in Bangkok, Thailand, in November 2020. Due to COVID-19 pandemic the conference was held virtually. The 187 full papers presented were carefully reviewed and selected from 618 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The first volume, LNCS 12532, is organized in topical sections on human-computer interaction; image processing and computer vision; natural language processing.

Includes a statistical series section which provides economic information on the Nation's savings and homefinancing industry.

Jennie of "the Prince's."

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Within LeBron James' story are lessons that echo from the years when he and his mother struggled to survive. He faced his share of naysayers and skeptics, but he silenced all doubters with his stellar rookie performance during his first NBA season. Despite his new wealth and fame, the lessons he learned as a young player keep him focused and grounded.

This study reports on one of the largest and best dated assemblages of clay pipes recovered from the site of Port Royal in Jamaica. Many of the pipes came from Bristol and date to the 17th century AD. Recovered during excavations at Port Royal between 1981 and 1990, many of the pipes came from sealed contexts and their distribution could be mapped in detail. Georgia Fox's study discusses her methodology and the excavations, and includes a large catalogue and typology and raises questions and issues which are of relevance on a much wider scale for the study of clay pipes in Northwest Europe in general.
