

# Present

This book is divided into five parts and covers: representation; subjectivity; form, structure and system; history and society; morality, class and ideology. Each part contains several thematic sections in which extracts from different writers and periods are juxtaposed. The study of literary theory has tended to concentrate on very recent developments. This volume, however, establishes both a sense of the continuities from Plato to the present day as well as the discontinuities. These are presented through comparisons and contrasts across the entire field of critical history.

Ghosts? A mysterious plant? Something even more sinister? This spooky mystery (inspired by a real kid's idea) doubles as a creative writing guide for young writers! Eliza loves hunting ghosts — too bad she's spending the summer helping her scientist mother study weird plants instead. But when a mysterious plant goes missing, things go from strange to downright spooky. Eliza is convinced something—or someone—is haunting the plant shop. Is she digging into dangerous ground? Like *Stuck in the Stone Age*, the first in the *Story Pirates Present* series, this spine-tingling mystery doubles as an introduction to the basics of creative writing. With the help of *Story Pirate Captain Vincent Rolo* and the *Mystery Creation Zone*, kids can use this kid-generated story as inspiration to create their OWN great mysteries! "What a fantastically fun way to learn about writing a story!" — Chris Grabenstein, #1 New York Times bestselling author

*This book places current and future work team practices in historical context. Researchers from 10 countries have contributed chapters that represent developments specific to their regions and that illustrate the way ideas spread around the world. Some principles of effective teaming were independently discovered in different countries, and some principles emerged from the work of researchers like Trist, Emery, and Lewin and spread around the world. But all of the practices were driven by the dynamic tension between the psychology of the employee and business necessities. Theories and cases describe autonomous work groups, self-managed work teams, cell teams, and other collaborative work structures. Contributions to the design of such structures came from psychology, management, sociology, industrial engineering, and manufacturing. Because of the*

challenges inherent in reorganising work around teams instead of individuals, organizations are at different stages in evolving into 21st century work systems.

"An irresistible book about Grub Street, authorship and the literary marketplace."—Washington Post Book World Jason Epstein has led arguably the most creative career in book publishing during the past half-century. He founded Anchor Books and launched the quality paperback revolution, cofounded the New York Review of Books, and created of the Library of America, the prestigious publisher of American classics, and The Reader's Catalog, the precursor of online bookselling. In this short book he discusses the severe crisis facing the book business today—a crisis that affects writers and readers as well as publishers—and looks ahead to the radically transformed industry that will revolutionize the idea of the book as profoundly as the introduction of movable type did five centuries ago.

*timeless, simple truths have changed the work and lives of millions of readers around the world. Now comes an insightful new tale of inspiration and practical guidance for these turbulent times. Good Things Happen To Those Who Open The Present The Gift That Makes Your Work And Life Better Each Day! For over two decades, Spencer Johnson has been inspiring and entertaining millions with his simple yet insightful stories of work and life that speak directly to the heart and soul. The Present is an engaging story of a young man's journey to adulthood, and his search for The Present, a mysterious and elusive gift he first hears about from a great old man. This Present, according to the old man, is "the best present a person can receive." Later, when the young boy becomes a young man, disillusioned with his work and his life, he returns to ask the old man, once again, to help him find The Present. The old man responds, "Only you have the power to find The Present for yourself." So the young man embarks on a tireless search for this magical gift that holds the secret to his personal happiness and business success. It is only after the young man has searched high and low and given up his relentless pursuit that he relaxes and discovers The Present—and all of the promises it offers. The Present will help you focus on what will make you happier and more successful in your work and in your personal life, today! Like the young man, you may find that it is the best gift you can give yourself. [www.ThePresent.com](http://www.ThePresent.com)*

Reader's Guide available. Reprint.

In your hands you are holding an incredible little story about the ultimate secret of human happiness.

Author Dr Spencer Johnson's unique allegory tells the story of a young child who learns about the fabulous "Precious Present" and then spends a lifetime searching for the mysterious gift.

In recent years, growing attention has been focussed on real estate education. The objective of Real Estate Education Throughout The World: Past, Present and Future is to document the current status and perspectives of real estate education and the underlying research throughout the world. The intent is to inform students, academics and practitioners about the situation in the widest possible range of countries and to provide a foundation for the future of the real estate discipline.

The structure of this monograph follows the organisation of the world-wide network of real estate societies. In Part 1, Stephen E. Roulac sets the framework for the other contributions. Part 2 contains 20 chapters that examine real estate education in Europe. Part 3 consists of two articles covering North America. Part 4 includes two chapters dealing with Latin America. In Part 5, 8 countries in Asia are examined. Part 6 contains two chapters covering the Pacific Rim. Finally, Part 7 focuses on Africa. This collection of papers is unique, in the sense that 50 authors have contributed to the monograph and 37 countries or regions in total are covered. The editor does not know of any comparable book.

Being Present

What Is the Present?

In this book, psychotherapist David Richo explores how we replay the past in our present-day relationships—and how we can free ourselves from this destructive pattern. We all have a tendency to transfer potent feelings, needs, expectations, and beliefs from childhood or from former relationships onto the people in our daily lives, whether they are our intimate partners, friends, or acquaintances. *When the Past Is Present* helps us to become more aware of the ways we slip into the past so that we can identify our emotional baggage and take steps to unpack it and put it where it belongs. Drawing on decades of experience as a psychotherapist, Richo helps readers to:

- Understand how the wounds of childhood become exposed in adult relationships—and why this is a gift
- Identify and heal the emotional wounds we carry over from the past so that they won't sabotage present-day relationships
- Recognize how strong attractions and aversions to people in the present can be signals of own own unfinished business
- Use mindfulness to stay in the present moment and cultivate authentic intimacy

Music moves through time; it is not static. In order to appreciate music we must remember what sounds happened, and anticipate what sounds might come next. This book takes you on a journey of music from past to present, from the Middle Ages to the Baroque Period to the 20th century and beyond!

This book presents an analysis of how speakers of typologically diverse languages report present-time situations. It begins from the assumption that there is a restriction on the use of the present tense to report present-time dynamic/perfective situations, while with stative/imperfective situations there are no such alignment problems. Astrid De Wit brings together cross-linguistic observations from English, French, the English-based

creole language Sranan, and various Slavic languages, and relates them to the same phenomenon, the 'present perfective paradox'. The proposed analysis is founded on the assumption that there is an epistemic alignment constraint preventing the identification and reporting of events in their entirety at the time of speaking. This book discusses the various strategies that the aforementioned languages have developed to resolve this conceptual difficulty, and demonstrates that many of the features of their tense-aspect systems can be regarded as the result of this conflict resolution. It also offers cognitively plausible explanations for the conceptual structures underlying the interactions attested between tense and aspect.

*Slavery's expansion across the globe often escapes notice because it operates as an underground criminal enterprise, rather than as a legal institution. In this volume, Elizabeth Swanson and James Brewer Stewart bring together scholars from across disciplines to address and expose the roots of modern-day slavery from a historical perspective as a means of supporting activist efforts to fight it in the present. They trace modern slavery to its many sources, examining how it is sustained and how today's abolitionists might benefit by understanding their predecessors' successes and failures. Using scholarship also intended as activism,*

*the volume's authors analyze how the history of African American enslavement might illuminate or obscure the understanding of slavery today and show how the legacies of earlier forms of slavery have shaped human bondage and social relations in the twenty-first century.*

*Being Present offers a framework to navigate social presence at work and at home. By exploring four primary communication choices--budgeted, entitled, competitive, and invitational--author Jeanine W. Turner shows when and where to employ each strategy to most effectively communicate in modern life.*

*A provocative new look at concepts of the present, their connection to ideas about time, and their effect on literature, art, and culture The problem of the present—what it is and what it means—is one that has vexed generations of thinkers and artists. Because modernity places so much value on the present, many critics argue that people today spend far too much time in the here and now—but how can we tell without first knowing what the here and now actually is? What Is the Present? takes a provocative new look at this moment in time that remains a mystery even though it is always with us. Michael North tackles puzzles that have preoccupied philosophy, neuroscience, psychology, history, and aesthetic theory and examines the complex role of the present in painting, fiction, and film. He engages with a range of thinkers, from Aristotle and Augustine to William James and Henri Bergson. He draws illuminating examples from artists such as Fra Angelico and Richard McGuire, filmmakers*

*like D. W. Griffith and Christopher Nolan, and novelists such as Elizabeth Bowen and Willa Cather. North offers a critical analysis of previous models of the present, from the experiential present to the historical period we call the contemporary. He argues that the present is not a cosmological or experiential fact but a metaphor, a figurative relationship with the whole of time. Presenting an entirely new conception of the temporal mystery Georg Lukács called the "unexplained instant," What Is the Present? explores how the arts have traditionally represented the present—and also how artists have offered radical alternatives to that tradition.*

The carefully wrapped present was perched half-hidden on his parents' closet shelf. Arthur, a little boy with a very large imagination, feverishly tried to guess what it might contain. A pet? A shiny trumpet? A new computer? The possibilities were almost endless. All for him and him alone—until the doorbell interrupted his reverie. What happened next

is a remarkable and soul-satisfying reminder that the act of sharing is perhaps the greatest present of all. A simple and timeless tale of spontaneous generosity, told with understated humor, a great warmth and a brilliantly direct graphic style which go to the very heart of the human experience. With the gentle insight of *A Cup of Christmas Tea* and the resonant innocence of *The Giving Tree*, Bob Gill's book is destined to become a best-loved gift about gift-giving.

This monograph surveys the history of the Army's professional ethic, focusing primarily on the Army officer corps. It assesses today's strategic, professional, and ethical environment. Then it argues that a clear statement of the Army officers' professional ethic is especially necessary in a time when the Army is stretched and stressed as an institution. The Army officer corps has both a need and an opportunity to better define itself as a profession, forthrightly to articulate its professional ethic, and clearly to codify what it means to be a military professional.

Language change is constant due to varied linguistic and sociolinguistic factors. Specifically, prolonged situations of language in contact have been observed to have a direct influence on language change and variation. Previous studies have documented several changes that may occur within bilingual speech communities in sustained circumstances of language in contact. This study examines the possibility of attrition of the simple

present form of Spanish in bilingual speakers of Spanish and English due to prolonged interaction between the two languages. Specifically, it attempts to determine whether the value of the Spanish simple present tense diminishes, and the present progressive form gains prominence as a result of language transfer occurring where there is intensive contact between Spanish and English. In order to determine that this linguistic phenomenon has occurred in bilingual speech communities, data were collected and analyzed from bilingual Spanish and English speakers living in the United States. To demonstrate bilingual speakers' use of the simple and progressive present forms, participants were instructed to complete two tasks: 1) a background questionnaire designed to gather information regarding each participants' relationship with the Spanish language, and 2) a picture-narration task designed to reveal each bilingual's preference for the simple present or progressive form. The study intended to show that in prolonged situations of language in contact between Spanish and English the bilingual speaker without little or no formal education in Spanish would transfer features from the dominant language (English) to the minority language (Spanish) in an attempt to cope with the task of working in two different linguistic systems. The results of the written-narrative task show that bilingual participants did demonstrate support for the use of the progressive rather than the simple-present form of the present tense when referring to

actions perceived as ongoing or continuous among all three groups of participants. Therefore, the results of the study seem to support the hypothesis that the selection for one present-tense form over the other is a result of language change due to intensive, long-term language contact between Spanish and English.

What Does It Mean to Be Present?

***Reveals the revolutionary power of the Chavista grassroots movement Venezuela has been the stuff of frontpage news extravaganzas, especially since the death of Hugo Chavez. With predictable bias, mainstream media focus on violent clashes between opposition and government, coup attempts, hyperinflation, U.S. sanctions, and massive immigration. What is less known, however, is the story of what the***

***Venezuelan people - especially the Chavista masses - do and think in these times of social emergency. Denying us their stories comes at a high price to people everywhere, because the Chavista bases are the real motors of the Bolivarian revolution. This revolutionary grassroots movement still aspires to the communal path to socialism that Chavez refined in his last years. Venezuela, the Present as Struggle is an eloquent testament to their lives. Comprised of a series of compelling interviews conducted by Cira Pascual Marquina, professor at the Bolivarian University, and contextualized by author Chris Gilbert, the book seeks to open a window on grassroots Chavismo itself in the wake of Chavez's death. Feminist and housing activists, comunards, organic intellectuals, and campesinos from around the country speak up in their own voices, defending the socialist project and pointing to what they see as revolutionary solutions to Venezuela's current crisis. If the Venezuelan government has shown an impressive capacity to resist imperialism, it is the Chavista grassroots movement, as this book shows, that actually defends socialism as the only coherent project of national liberation.
