This book therefore takes an all-encompassing approach to improving the scientist's career. It begins by focusing on writing and publishing - a scientist's most important weapon in the

Seasoned classroom veterans,

This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience (“guests”) expects the title of the talk to determine presentation content, they require

Download File PDF
Presentation Skills For

understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide

design), and scientific (Q&A, slide content). The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful

Download File PDF

pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a “ghost”. In addition, the book goes in-depth over the treatment of
