Primary Source Readings in World Religions Saint Mary's Press

*While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required*

*for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.*

*Now in its second edition, Reading Primary Sources explores the varied traditions in source criticism and, through specific examples, illustrates how primary sources can be read and used in historical research. Part I of this two-part volume begins by establishing the reader's understanding of source criticism with an overview of both traditional and new methodological approaches to the use of primary documents. Taking into account the huge expansion in the range of primary sources used by historians, Part II includes chapters on surveillance reports, testimony and court files, in addition to more traditional genres such as letters, memoranda, diaries, novels, newspapers, political speeches and autobiography. For the new edition, each chapter now includes a checklist that suggests an easy-to-follow sequence of steps for interpreting a specific source genre, enabling students to understand how the sources should be read, what they have to offer, and the pitfalls of their interpretation. In addition to new discussions about the availability of digitised source materials, a new chapter on social surveys unlocks the potential of these widely used primary sources. Taking examples of sources from many European countries and the United States, and providing up-to-date information on the most widely used textual sources, this book is the perfect companion for every student of history who wants to engage with primary sources.*

*From Gandhi to Osama bin Laden, from Mao to Churchill, and from Kipling to Salman Rushdie, Twentieth Century Voices: Selected Readings in World History offers a wide*

variety of primary sources for students of the Twentieth Century world. While all students will benefit from these readings, Michael G. Vann used his expertise in teacher training to specifically compile this collection to prepare students who intend to teach in California high school classrooms. Thus, the sources are organized with an eye to the California State Standards for 10th grade World History. Furthermore, Vann, an active member of the World History Association and an officer in the California World History Association (a WHA regional affiliate), has framed these primary sources with current trends in the historiography of World History. Specifically, the collection rejects discounted Eurocentric narratives and gives voice to traditionally marginalized historical actors in the history of imperialism, communism, and the Cold War. Along with many classic documents from key historical moments, readers will find several sources that challenge conventional wisdom about this tumultuous century. Michael G. Vann is an Associate Professor of World History at Sacramento State University, vice president of the California World History Association, and a past president of the French Colonial Historical Society. In addition to teaching World History for undergraduate and graduate students, he offers courses on imperialism, Southeast Asia, and genocide. Vann is active in teacher training for California high school teachers. His publications include *The Colonial Good Life: A Commentary on Andre Joyeux's Vision of French Indochina*, a special issue of the *World History Association Bulletin on France in World History*, and over a dozen academic journal articles on French colonialism.
