Having clear boundaries is essential to a healthy, balanced lifestyle. A boundary is a personal property line that marks those things for which we are responsible. In other words, boundaries define who we are and who we are not. Boundaries impact all areas of our lives: Physical boundaries help us determine who may touch us and under what circumstances -- Mental boundaries give us the freedom to have our own thoughts and opinions -- Emotional boundaries help us to deal with our own emotions and disengage from the harmful, manipulative emotions of others -- Spiritual boundaries help us to distinguish God's will from our own and give us renewed awe for our Creator -- Often, Christians focus so much on being loving and unselfish that they forget their own limits and limitations. When confronted with their lack of boundaries, they ask: - Can I set limits and still be a loving person? - What are legitimate boundaries? - What if someone is upset or hurt by my boundaries? - How do I answer someone who wants my time, love, energy, or money? - Aren't boundaries selfish? - Why do I feel guilty or afraid when I consider setting boundaries? Dr. Henry Cloud and Dr. John Townsend offer biblically-based answers to these and other tough questions, showing us how to set healthy boundaries with our parents, spouses, children, friends, co-workers, and even ourselves.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

Git-R-Done is chock-full of fart jokes and straight talk about America. I sat down one day and said to myself, "Larry, you've done it all. You've got three gold records, a successful DVD, a hit TV show, a picture of Shania Twain givin' ya the finger, and most important, the high score on Frogger. What more could you possibly do?" Then I started thinking about writing a book. I wanted mostly to write Git-R-Done for all those good Americans who just wanna laugh like I do. Come on inside and hear me make fun of Janet Reno, Rosie O'Donnell, and my fat sister, who caused a twelve-tray pileup in front of the caramel nut rolls at the country buffet. I'm gonna tell you why Dick Trickle is my hero, why we need to get back to good ol' common sense, and why I prefer a picture of the Last Supper with NASCAR drivers as the disciples over just about

anything. Lord, I apologize! The book will go down in history as one of America's most important events since the breakup of Aldo Nova. Even my mom liked the book—here's what she said: "There's really not much I can say here except for I apologize to everyone ahead of time for the crap you are about to read." Git-R-Done is just plain funny, I don't care who ya are! Also available as an eBook.

The How and Wow of the Human Body

The Six to Fix

Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

For several months, prior to publication, some people were asking that we should write this book and that it be entitled, "The Message Of The Cross". • I believed then and now that their request was from the Lord. Consequently, this book is the result of that need. • This Message, "The Message Of The Cross" is the single most important Message of the Word in any language. The Salvation of the soul and how we live for God is important beyond comprehension. • I feel every Believer will be greatly strengthened in the Word if they will avail themselves of this publication.

As a holistic veterinarian and scientist, Dr. Gary Richter helps dog and cat owners to navigate the thicket of treatment options and separate the fact from the fiction. He wants us to use what actually works, not just what Western science or alternative medicine say "should" work. This multifaceted approach to health is known as integrative medicine. Dr. Richter examines traditional medicine from many cultures alongside modern medical techniques, describing the best of complementary care and the best of conventional veterinary medicine. Every treatment he recommends has the backing of scientific research or years of successful outcomes in his clinical practice. After explaining the treatment, he offers specific recommendations for an integrative approach to common diseases, including allergies, skin conditions, diabetes, heart disease, and cancer. A holistic approach to health includes nutrition, as it sets up the foundation for your pet's health. Dr. Richter cuts through the hype in the pet-food world and explains how to choose the best commercial foods and supplements, and even includes both raw and cooked dog- and cat-food recipes for general diet as well as to treat specific needs. He also explains how we can use the right foods and supplements to "hack" the body's processes, including the immune system.

Named a Best Book of 2020 by NPR and Lit Hub. A Los Angeles Times Bestseller. A New York Times Book Review Editors' Choice "In The Cactus League [Emily Nemens] provides her readers with what amounts to a miniature, self-enclosed world that is funny and poignant and lovingly observed." --Charles McGrath, The New York Times Book Review An explosive, character-driven odyssey through the world of baseball from Emily Nemens, the editor of The Paris Review Jason Goodyear is the star outfielder for the Los Angeles Lions, stationed with the rest of his team in the punishingly hot Arizona desert for their annual spring training. Handsome, famous, and talented, Goodyear is nonetheless coming apart at the seams. And the coaches, writers, wives, girlfriends, petty criminals, and diehard fans following his every move are eager to find out why—as they hide secrets of their own. Humming with the energy of a ballpark before the first pitch, Emily Nemens's The Cactus League unravels the tightly connected web of people behind a seemingly linear game. Narrated by a sportscaster, Goodyear's story is interspersed with tales of Michael Taylor, a batting coach trying to stay relevant; Tamara Rowland, a resourceful spring-training paramour, looking for one last catch; Herb Allison, a legendary sports agent grappling with his decline; and a plethora of other richly drawn characters, all striving to be seen as the season approaches. It's a journey that, like the Arizona desert, brims with both possibility and destruction. Anchored by an expert knowledge of baseball's inner workings, Emily Nemens's The Cactus League is a propulsive and deeply human debut that captures a strange desert world that is both exciting and unforgiving, where the most crucial games are the ones played off the field.
