About the Expert Nathan DeMetz is a long time "average guy" type of bodybuilder, power lifter, and mixed martial artist. He power lifts and practices kickboxing and Jiu-Jitsu. He does this not because he wants to compete but because he loves it. As Mr. DeMetz would say "it is his greatest hobby". He has been a lifter since 2002 at the age of 22 . He is also a second year martial artist and has a few years of untrained "brawling" under his belt. Nathan is now about to turn 32 and he will tell you that he is in the best shape of his life and that he owes it all the his commitment to lifting and staying fit. He has an intense desire to succeed. Nathan is not a competitive athlete but he has competed in some local bench press contests and even competed in the "20 and Hot" bodybuilding contest held by Champion Nutrition. He competed six times and placed in the top 10 three times. He won the bench press contest of the former equipment retailer New Home Fitness and placed third in the bench contest held by Ritchie's Fitness, formerly Atlas Fitness. Nathan has also competed in some non-sanctioned bare-knuckle fights but those days are behind him. His gym owner has approached him about entering the 2012 March Madness contest hosted by Vitamin Giant. Nathan is considering it. In the gym Nathan boasts some impressive lifts. He has lifted at different weights throughout the years. His most impressive lifts come from when he weighed 205 lbs. At this weight he bench pressed 350 lbs , dead lifted 535 lbs, and squatted 500 lbs. He is currently 185 lbs boasting a 350 lb bench press, 495 lb dead lift , and a 445 lb squat. Nathan is strong in a host of other lifts as well Nathan is loosely described as natural lifter. He does not use synthetic substances such as steroid, pro-hormones, synthetic testosterone boosters, or anything similar. He does use various supplements that are herb or plant based and uses extra vitamins and minerals. He believes hard work will get you where you need to be. He believes in a holistic approach to the health of the mind and body. For this reason he does not refer to himself as Power lifter or martial artist but instead refers to himself as an athlete. He feels this better reflects his true goals and the way that he trains. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.**

Bicycling Maximum Overload for Cyclists is a radical strength-based training program aimed at increasing cycling speed, athletic longevity, and overall health in half the training time. Rather than improving endurance by riding longer distances, you'll learn how to do it by reducing your riding time and adding heavy strength and power training. Traditionally cyclists and endurance athletes have avoided strength and power training, believing that the extra muscle weight will slow them down, but authors Jacques DeVore and Roy M. Wallack show that exactly the opposite is true. The Maximum Overload program uses weightlifting to create sustainable power and improved speed while drastically reducing training time and eliminating the dreaded deterioration that often occurs during the second half of a ride. A 40-minute Maximum Overload workout, done once or twice a week, can replace a long day in the saddle and lead to even better results. This comprehensive program includes unique takes on diet, interval training, hard and easy training, and sustainable power. Backed by the most trusted authority in the sport, Bicycling Maximum Overload for Cyclists is a book that no cyclist should be without.

A revolutionary, twelve-week program to take you to the top level of fitness and wellness from "one of the fittest men on earth" (CNN International). Sean Burch started out with a lofty goal: to climb Mount Everest solo and without supplementary oxygen. To accomplish this, Sean developed a training regimen that incorporated cardio and strength elements, nutrition, and mental conditioning. That program took him to Everest's summit and helped launch his career as one of the world's premier athletes. He is now considered an "American Fitness Guru" (Men's Journal) and sought after for his unique techniques and his contagious enthusiasm. Hyperfitness means learning to test and challenge yourself every day. It means setting short-term and long-range goals and achieving them. It means pushing yourself and discovering that you are stronger, tougher, and more capable than you ever dreamed. With Sean's three building blocks to success-hyperstrength (exercise), hyperfare (nutrition), and hypermind (mental conditioning)-you can accomplish any physical and mental goal you can imagine in twelve short weeks. But what sets this fitness book apart is Sean Burch's incredible personal story and his encouraging, no-holds-barred motivational approach. With such creative daily exercises as speed skater drills, aerial spins, scale

the whale, and ski-mogul master jumps clearly illustrated throughout, the workouts are more like obstacle courses-challenging, varied, and fun. Whether you are preparing for a marathon or another event, or are just ready to dedicate yourself to getting in the best shape of your life physically and mentally, Hyperfitness will inspire you to reach the highest level of yourself possible.
