This textbook is designed to learn python programming from scratch. At the beginning of the book general problem solving concepts such as types of problems, difficulties in problem solving, and problem solving aspects are discussed. From this book, you will start learning the Python programming by knowing about the variables, constants, keywords, data types, indentation and various programming constructs. The most commonly used types such as Lists, Tuples, dictionaries are also discussed with necessary examples and illustrations. The book includes the concepts of functions, lambda functions, modules and strings. In the later part of this book the concept of object oriented programming using Python is discussed in detail. Finally how to handle files and directories using Python is discussed. At the end of book some sample programs in Python are given that are based on the programming constructs. Python will be most demanded language after Java in future. So learning Python is need for today's software professionals. This book serves the purpose of teaching Python programming in the simplest and easiest manner.

• Strictly as per the Term-II syllabus for Board 2022 Exams(March-April) • Includes Questions of the both -Objective & Subjective Types Questions • Objective Questions based on new typologies introduced by the board- I. Stand- Alone MCQs, II. MCQs based on Assertion-Reason III. Goyal's ICSE Computer Applications Question Bank with Model Test Papers For Class 10 Semester 2 Examination 2022

Application development activity is becoming more and more complex and tedious day-by-day as the customers' requirements are ever changing. To address their needs, the IT industry is focusing on newer ways of doing things and providing both cost and time advantage to the customers. Therefore, all of you who wish to be in the IT Industry and service the IT customers need to think innovatively and be ready to accept the change. If you have done C, now it is time to move on to C++. C++ is a super set of C language. It provides the C programmers the flavor of Object Orientation. With its object-oriented programming features like encapsulation, inheritance and polymorphism, C++ offers a number of benefits over the C language. The book titled Object-Oriented Programming with C++ is exclusively designed as per the syllabus of III semester B.E. (Computer Science & Engineering and Information Science Engineering) course framed by the Visveswararajah Technological University, Belgaum. This book is to teach the students object-oriented programming concepts and C++. This book is written in simple and easily understandable style. The information provided in the book is also helpful for B.E., B.Sc., BCA, MCA and M.Tech students of all universities. This book contains 14 chapters; each chapter begins with a well-defined set of objectives, discusses the various concepts with the sufficient number of Example Programs, summarizes and ends with exercises and multiple choice questions. The book provides more than 130 C++ programs which are executed on Windows with Turbo C++ compiler and Microsoft Visual C++ 2008 Express Edition. All C-style programs are run on Turbo C++ IDE and the new-style C++ programs are executed on Microsoft Visual C++ 2008 Express Edition. All programs of chapter 14 are developed and executed on Microsoft Visual C++ 2008 Express Edition. It is important that you will use the right compiler and understand the working of each program. I am more than happy to receive your suggestions and comments for further improvement of the book.
