How have modern democracies squared their commitment to equality with their fear that disparities in talent and intelligence might be natural, persistent, and consequential? In this wide-ranging account of American and French understandings of merit, talent, and intelligence over the past two centuries, John Carson tells the fascinating story of how two nations wrestled scientifically with human inequalities and their social and political implications. Surveying a broad array of political tracts, philosophical treatises, scientific works, and journalistic writings, Carson chronicles the gradual embrace of the IQ version of intelligence in the United States, while in France, the birthplace of the modern intelligence test, expert judgment was consistently prized above such quantitative measures. He also reveals the crucial role that determinations of, and contests over, merit have played in both societies--they have helped to organize educational systems, justify racial hierarchies, classify army recruits, and direct individuals onto particular educational and career paths. A contribution to both the history of science and intellectual history, The Measure of Merit illuminates the shadow languages of inequality that have haunted the American and French republics since their inceptions.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Advance your everyday proficiency with Excel 2016. And earn the credential that proves it! Demonstrate your expertise with Microsoft Excel! Designed to help you practice and prepare for Microsoft Office Specialist (MOS): Excel 2016 Core certification, this official Study Guide delivers: In-depth preparation for each MOS objective Detailed procedures to help build the skills measured by the exam Hands-on tasks to practice what you've learned Practice files and sample solutions Sharpen the skills measured by these objectives: Create and manage worksheets and workbooks Manage data cells and ranges Create tables Perform operations with formulas and functions Create charts and objects About MOS A Microsoft Office Specialist (MOS) certification validates your proficiency with Microsoft Office programs, demonstrating that you can meet globally recognized performance standards. Hands-on experience with the technology is required to successfully pass Microsoft Certification exams.

From cloud computing to data analytics, society stores vast supplies of information through wireless networks and mobile computing. As organizations are becoming increasingly more wireless, ensuring the security and seamless function of electronic gadgets while creating a strong network is imperative. Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics highlights the challenges associated with creating a strong network architecture in a perpetually online society. Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data. This book is an important resource for information technology professionals, software developers, data analysts, graduate-level students, researchers, computer engineers, and IT specialists seeking modern information on emerging methods in data mining, information technology, and wireless networks.

This book provides a review of basic terminology and offers guidelines to the untrained researcher for carrying out `nuts-and-bolts' quality improvement research. Fourteen case studies involving actual health care situations help to demonstrate how such a research project can be implemented.

What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked information society? The increasing diversity of information and communication technologies and their equally wide range of usage in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. The aim of the IFIP/FIDIS Summer Schools has been to encourage young academic and industry entrants to share their own ideas about privacy and identity management and to build up collegial relationships with others. As such, the Summer Schools have been introducing participants to the social implications of information technology through the process of informed discussion. The 4th International Summer School took place in Brno, Czech Republic, during September 1-7, 2008. It was organized by IFIP (International Federation for Information Processing) working groups 9.2 (Social Accountability), 9.6/11.7 (IT Misuse and the Law) and 11.6 (Identity Management) in cooperation with the EU FP6 Network of Excellence FIDIS and Masaryk University in Brno. The focus of the event was on security and privacy issues in the Internet environment, and aspects of identity management in relation to current and future technologies in a variety of contexts.

Edu-lution is a common sense approach to the "educational evolution" that is long overdue in America. This book explores the many problems our teachers, parents, students, and society face, as well as research-based suggestions aimed at improving each of those facets. "Edu-lutionists" realize that our country has fallen behind and are adamant about making immediate changes before it is too late. An innovative blend of education, psychology, ethics, politics, and unbiased truth, Edu-lution offers strategies that should be implemented by every citizen to ensure America gets back on the right path and remains a reputable nation for generations to come. " Edu-lution offers an insightful, deliberate and common sense approach for dealing with the problems facing our children and future. Tippitt's 'back-to-basics with a new attitude' approach engages teachers, parents, school administration, businesses, and children. Tippitt has started the conversation. Now it is up to us to continue it. Our children deserve nothing less." Illiff McMahan, Jr. - Mayor, Cocke County, TN " Edu-lution is a blueprint for learning for students, parents, educators, and the public." Larry B. Blazer - Superintendent of Schools, Cocke County, TN " Every student must read this book to gain insight as to how the educational experience could be. Every parent must read this book to understand the crisis in today's educational system. Every educator must read this book, look inside himself/herself, and realize their importance in shaping the lives of students in turmoil today." Peggy Hammonds - retired High School Math Teacher and District Instructional Supervisor "Edu-lution is a must read for anyone that has children or works with children. An eye opening book, Tippitt's insight into the educational system is both revealing and alarming. A clarion call for parents and educators to inject a renewed emphasis of morality in our schools and homes immediately." Pastor Keith Pierce - Cades Cove Baptist Fellowship, Maryville, TN "Mr. Tippitt possesses all the necessary skills and charisma to motivate students to perform their best. He makes learning relevant and interesting. As a result, his students have a high level of mastery and understanding of the skills and concepts being taught. Our students' response has been overwhelmingly positive." Rob Britt - Principal, Carpenters Middle School, Blount County, TN

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

This book provides detailed, yet succinct, information in an absorbing "question and answer" format on every aspect of the High Holy Days, including history, liturgy, theology, and philosophy, as well as laws and customs.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

The Education Outlook

The Outlook

This book constitutes the refereed proceedings of the 12th International Colloquium on Theoretical Aspects of Computing, ICTAC 2015, held in Cali, Colombia, in October 2015. The 25 revised full papers presented together with 7 invited talks, 3 tool papers, and 2 short papers were carefully reviewed and selected from 93 submissions. The papers cover various topics such as algebra and category theory; automata and formal languages; concurrency; constraints, logic and semantic; software architecture and component-based design; and verification.

As the official publication for Windows Vista, we cover Microsoft's latest OS with more depth, passion and clarity than any other magazine on the market. Each issue is packed with tips, tricks and service elements on every page. We give you an insider's tour of the operating system and illustrate how to get the most out of your PC.
