Manual of Clinical Psychopharmacology for Nurses offers a holistic approach to psychopharmacological prescribing from a nursing perspective and is the only text designed especially for Psychiatric Mental Health Advanced Practice Registered Nurses (P.M.H.-A.P.R.N.s). The Manual is grounded in the belief that given their nursing background and their personalized approach to the individual, P.M.H.-A.P.R.N.s are uniquely qualified to offer symptom-based treatment within the context of an individual's medical and psychological care. A comprehensive resource for advanced practice nurses, mental health practitioners, general practitioners, and consumers, this book possesses many useful features, including the following: A logical, easy-to-use format that guides the reader through the most common psychiatric conditions, presenting the diagnostic criteria and neurobiology of the relevant disorder, pharmacological choices and recommendations on monitoring, side effects to consider, and treatment of special populations, including those with medical illnesses. A special chapter devoted to culturally sensitive psychopharmacology that offers information on the role of culture in mental health, wellness, and illness and provides culturally sensitive assessment techniques and other treatment strategies PMH nurses can use to minimize stigma; address health care disparities; and improve patient adherence, satisfaction, and outcomes. A chapter that addresses complementary and alternative pharmacotherapies -- vital because a significant percentage of patients may be using herbal preparations, which present serious implications for the prescribing clinician. Appendices covering drug dosing equivalencies, pharmacogenetics, psychiatric rating scales, and other helpful resources. The core philosophy of the advanced practice nursing field is that health care should be individualized, focusing not only on patients' conditions but also on the effects those conditions have on patients' lives and the lives of their families. The Manual of Clinical Psychopharmacology for Nurses offers readers the most current information on psychopharmacological treatment in an accessible, easy-to-use format grounded in the principles and practices of holistic nursing. Developed especially for practicing nurses preparing for the certification examination offered by the American Nurses Credentialing Center (ANCC), the Psychiatric Nursing Certification Review Guide for the Generalist and Advanced Practice Psychiatric and Mental Health Nurse provides a succinct, yet comprehensive review of the core material. This book has been organized to give the reviewer test taking strategies and techniques and sample test questions, which are intended to serve as an introduction to the testing arena. In addition, a bibliography is included for those who need a more in depth discussion of the subject matter in each chapter. The Third Edition has been completely revised and updated to reflect current guidelines and information from the latest version of the DSM IV-TR. The medications and use of medications has also been updated to reflect proper usage and doses.

Provide quality care for clients from culturally diverse backgrounds! Transcultural Nursing, 8th Edition shows you how to apply assessment and intervention strategies to individuals from a variety of different cultures. Based on Giger and Davidhizer's unique transcultural model, this text helps you design culturally sensitive care with use of the six key aspects of cultural assessment: communication, time, space, social organization, environmental control, and biologic variations. Written by nursing educators Joyce Newman Giger and Linda G. Haddad, Transcultural Nursing shows how an understanding of cultural variations and individual patient needs will help you provide safe and effective care. UNIQUE! The six key aspects of cultural assessment each receive a full chapter of coverage, allowing you to also apply the Transcultural Assessment Model to cultures not covered in the text. Case studies and critical decision-making questions help you apply the assessment framework to practice. 23 chapters on specific cultural groups apply this assessment model to the clients most commonly encountered in United States health care settings, with nearly all chapters written by contributors who are part of that ethnic group. Client care plans in culture-specific chapters show how to apply principles to the needs of individuals. Review questions reinforce your understanding of cultural principles, with answers found in the back of the book. Discussions of spirituality throughout the text provide a holistic, integrated approach to culture, beliefs, and assessment. NEW co-author Dr. Linda Haddad is an internationally recognized cultural scholar who has taught nursing around the globe, has acted as an advisor and coordinator for the World Health Organization, and has published over 30 scholarly articles on nursing with a focus on understanding the cultural implication to care. UPDATED! Cultural chapters are completely revised to reflect the shifting experiences of cultural groups in our society.

Manual of Psychiatric Nursing Skills guides nursing students and practicing nurses towards enhancing fundamental psychiatric nursing skills competency in specific assessment and interventions for the selected psychiatric disorders. A nursing skill book in a manual format, this text is handy at the clinical site and encourages readers to translate their theoretical knowledge and psychiatric nursing skills into clinical practice. Topics include therapeutic communication techniques, assessment and interventions for depression, bipolar disorder, schizophrenia, and suicide attempts, and crisis management skills for psychiatric emergencies. Included in the appendices are essential insights into ego defense mechanisms, Erickson's Psychosocial Developmental Stages, Freud's Stages of Psychosexual Development, and Piaget's Stages of Cognitive Development.

This book will help to answer some of the growing number of ethical questions and more complex issues that home health care nurses face. The cases presented in each chapter of the book are fictionalized situations based on interviews conducted with home health care nurses in both hospital-sponsored and private agencies, in hospices, and in urban and rural settings. Each chapter of the book is devoted to one of the main areas of concern for home health care nurses. Focusing on specific cases, it offers analysis and discussion of the ethical issues, cites legal requirements where relevant, and s.

Keltner's Psychiatric Nursing E-Book

Contemporary Practice

Manual of Clinical Psychopharmacology for Nurses

Gain the skills you need to provide safe and effective psychiatric nursing care! Keltner's Psychiatric Nursing, 9th Edition provides a solid foundation in the knowledge required to manage and care for patients with psychiatric disorders. It features a unique, three-pronged approach to psychotherapeutic management emphasizing the nurse's three primary tools: themselves and their relationship with patients, medications, and the therapeutic environment. New to this edition are Next Generation NCLEX® exam-style case studies to help you learn clinical judgment and prepare for success on the NCLEX. Known for its clear and friendly writing style, this text covers psychiatric nursing like no other book on the market. UNIQUE! Practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. UNIQUE! Norm's Notes offer personal, helpful tips from Norman Keltner — an expert educator and the book's erstwhile author — in each chapter. UNIQUE! Putting It All Together summaries are provided at the end of each psychopathology chapter. DSM-5 information is integrated throughout the text, along with new ICNP content. Nursing care plans highlight the nurse's role in psychiatric care, emphasizing assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. Critical thinking questions help you develop clinical reasoning skills. Family Issues boxes highlight the issues that families must confront when a member suffers from mental illness. Patient and Family Education boxes highlight information that the nurse should provide to patients and families. Learning resources on the Evolve website include lecture slides, psychotropic drug monographs, and NCLEX® exam-style review questions. NEW! Next Generation NCLEX® (NGN) examination-style case studies and NGN item types are included for five of the major mental health disorders, allowing you to apply clinical judgment skills. NEW! Updated Clinical Examples discuss real-world situations relating to mental health. NEW! COVID-19 resources and research includes information relevant to psychiatric nursing care. NEW! International Classification for Nursing Practice (ICNP) nursing diagnoses, from the International Council of Nurses, include straightforward, evidence-based terminology that is easily translatable across settings and disciplines.

Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment. Covering maternal and neonatal, pediatric, geriatric, mental health, and community nursing, Foundations of Nursing, 6th Edition, includes all of the essential LPN/LVN content you need. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and electrolytes tutorial. The consistent, logical framework of the nursing process connects specific disorders to patient care. A mathematics review chapter provides a complete review of basic arithmetic skills and practice in drug dosage calculation to ensure safe medication administration. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses for specific disorders paired with the appropriate nursing interventions. More than 100 skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. Coordinated Care boxes emphasize parameters for prioritizing tasks, as well as assigning tasks to and supervising unlicensed assistive personnel. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations boxes discuss the issues facing patients and caregivers in the home health care setting. Health Promotion boxes provide key information on staying healthy and preventing disease, with tips on wellness from Healthy People 2010. Cultural Considerations boxes discuss how to address the health needs of a culturally diverse patient population when planning care. Enhanced focus on the NCLEX® Examination offers end-of-chapter Get Ready for the NCLEX Examination! sections with key points for self-guided study and remediation and an extensive set of review questions for thorough self-assessment. Additional review questions on Evolve provide instant feedback with correct answer and rationale for even more test-taking practice. Evidence-Based Practice boxes summarize the latest research findings and highlight how they apply to LPN/LVN practice. Updated, vibrant full-color design highlights key information and enhances your understanding of important concepts.

Home health care is an important aspect of community health and a growing area of healthcare services. Clinical Case Studies in Home Health Care uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and

preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

Here's an evidence-based, holistic approach to caring for psychiatric and mental health patients in outpatient settings. Using a biopsychosocial model, this text addresses mental health issues through stabilization of brain chemistry, individualized psychotherapy, and re-socialization into the community. Inside, you'll find an in-depth focus on specific psychiatric disorders including the epidemiology, etiology, biological basis, clinical presentation of adults, older adults, and children, co-morbidities, differential diagnosis, and treatment. There is also comprehensive coverage of the interventions and "Levers of Change" used to aid patients in their recovery, as well preventative interventions.
