edition addresses several interlocking themes, such as research methods, the development of prejudice in children, the relationship between prejudice and discrimination, and discrimination in the workplace, which are developed in greater detail than in other textbooks. The first theme introduced is the nature of prejudice and discrimination, which is followed by a discussion of research methods. Next comes the psychological underpinnings of prejudice: the nature of stereotypes, the conditions under which stereotypes influence responses

to other people, contemporary theories of prejudice, and how values and belief systems are related to prejudice. Explored next are the development of prejudice in children and the social context of prejudice. The theme of discrimination is developed via discussions of the nature of discrimination, the experience of discrimination, and specific forms of discrimination, including gender, sexual orientation, age, ability, and appearance. The concluding theme is the reduction of prejudice. An ideal core text for junior and senior college students who have had a course
