An urgent critique of the biopolitical subject and omnipresent Empire. Historical conflict no longer opposes two massive molar heaps, two classes—the exploited and the exploiters, the dominant and dominated, managers and workers—between which, in each individual case, it would be possible to differentiate. The front line no longer cuts through the middle of society; it now runs through each one of us... “—from This Is Not a Program Traditional lines of revolutionary struggle no longer hold. Rather, it is ubiquitous cybernetics, surveillance, and terror that create the illusion of difference within hegemony. Configurations of dissent and the rhetoric of revolution are merely the other face of capital, conforming identities to empty predicates, ensuring that even “thieves,” “saboteurs,” and “terrorists” no longer exceed the totalizing space of Empire. This Is Not a Program offers two texts, both originally published in French by Tiqqun with Introduction to Civil War in 2001. In This Is Not a Program, Tiqqun outlines a new path for resistance and struggle in the age of Empire, one that eschews the worn-out example of France's May '68 in favor of what they consider to be the still fruitful and contemporary insurrectionary movements in Italy of the 1970s. “As a Science of Apparatuses” examines the way Empire has enforced on the subject a veritable metaphysics of isolation and pacification, “apparatuses” that include chairs, desks, computers; surveillance (security guards, cameras); disease (depression); crutch (cell phone, lover, sedative); and authority. Tiqqun's critique of the biopolitical subject and omnipresent Empire is all the more urgent as we become inured to the permanent state of exception that is the War on Terror and to other, no less intimate forms of pacification. But all is not lost. In its unrelenting production of the Same, Empire itself creates the conditions necessary for the insurrection to come.

This book is the fifth in the Cambridge Socio-Legal Group series and it concerns the evolving notions and practices of kinship in contemporary Britain and the interrelationship of kinship, law and social policy. Assembling contributions from scholars in a range of disciplines, it examines social, legal, cultural and psychological questions related to kinship. Rising rates of divorce and of alternative modes of partnership have raised questions about the care and well-being of children, while increasing longevity and mobility, together with lower birth rates and changes in our economic circumstances, have led to a reconsideration of duties and responsibilities towards the care of elderly people. In addition, globalisation trends and international flows of migrants and refugees have confronted us with alternative constructions of kinship and with the challenges of maintaining kinship ties transnationally. Finally, new developments in genetics research and the growing use of assisted reproductive technologies may raise questions about our notions of kinship and of kin rights and responsibilities. The book explores these changes from various perspectives and draws on theoretical and empirical data to describe practices of kinship in contemporary Britain.

Experience the fun of PSK31 operation. Created and distributed by Nifty Ham Accessories, a well know provider of reference guides that simplify amateur radio transceiver operation. Using the same approach for for providing simple, clear-cut explanations, the author, Bernie Lafreniere, N6FN has produced a book that "cuts to the chase" in describing how to setup your station for PSK operation.Using the very popular DigiPan software as a basis, a

step-by-step approach is used for configuring your software and computer system. Separate chapters are devoted to the installation and setup of three different PC-to-radio interfaces. Along the way, the pros and cons of using different types of radio-to-PC interfaces are explored in detail. The book is designed to help you get PSK31 up and running quickly and easily. Light on theory, the book concentrates on the practical issues of getting things connected and making PSK31 QSOs. If you have been thinking about PSK31 operation and have been unsure of how to go about it and the various options available, this is the book for you.

Trace the evolution of automatic Morse code devices from the early 1800s to today through this informative text and over 1,100 photos. Beginning with an overview of telegraphy and early key history, fifteen sections explore the equipment used to send messages over long distances. Featured are code readers, oscillators, Morse trainers, electronic keyers, single- and dual-lever paddles, portable paddles, automatic mechanical keys, accessories, and more. Each device is presented in text and images, some with classic advertisements; this combination allows the reader to appreciate device development and better understand the thinking that went into the design. Paddle and key maintenance and adjustment are also examined, as well as computer interfacing and use of the Internet. The book also includes the results of patent studies and historical research, with many new findings presented, making it a must-have for collectors, ham operators, or anyone interested in the history of these communication devices.

Personal Radio Service Reform (US Federal Communications Commission Regulation) (FCC) (2018 Edition) The Law Library presents the complete text of the Personal Radio Service Reform (US Federal Communications Commission Regulation) (FCC) (2018 Edition). Updated as of May 29, 2018 The Federal Communications Commission (Commission) adopted a comprehensive reorganization of and update to the rules governing the Personal Radio Services (PRS). PRS provides for a wide variety of wireless devices that are used by the general public for personal communication uses, which include applications

like walkie-talkies, radio controlled model toys, Personal Locator Beacons (PLBs), medical implant devices and other uses. In addition to the comprehensive review and update of the rules to reflect modern practices, the Commission enhanced the General Mobile Radio Service (GMRS) to allow new digital applications, allot additional interstitial channels and extend the license term from five to ten years. It also allotted additional channels to the Family Radio Service (FRS) and increased the power on certain FRS channels from 0.5 Watts to two Watts. It also updated the CB Radio Service to allow hands-free headsets, removed a restriction on communicating over long distances and removed other outdated requirements. These changes and others outlined below will update PRS rules to be more in line with current public demands for the services and will make the rules easier to read and find information, while also removing outdated requirements and removing unnecessary rules. This book contains: - The complete text of the Personal Radio Service Reform (US Federal Communications Commission Regulation) (FCC) (2018 Edition) - A table of contents with the page number of each section
