A working guide for students conducting theological writing and research on theology and biblical studies courses, this book integrates the disciplines of writing, rhetoric, and theology, to provide a standard text for the teaching and mentoring of writing across the theological curriculum. As a theological rhetoric, it also encourages excellence in theological writing in the public domain by helping to equip students for their wider vocations as writers, preachers, and communicators in a variety of ministerial and professional contexts. This 2nd Edition includes new chapters on 'Writing Theology in a New Language', which explores the linguistic and cultural challenges of writing theology well in a non-native language, and 'Writing and Learning Theology in an Electronic Age', addressed to distance learning students learning to write theology well from online courses, and dealing with the technologies necessary to do so. Developed for the Ultimate Introductory Engineering Course Introduction to Engineering: An Assessment and Problem-Solving Approach incorporates experiential, and problem- and activity-based instruction to engage students and empower them in their own learning. This book compiles the requirements of ABET, (the organization that accredits most US engineering, computer science, and technology programs and equivalency evaluations to international engineering programs) and integrates the educational practices of the Association of American Colleges and Universities (AAC&U). The book provides learning objectives aligned with ABET learning outcomes and AAC&U high-impact educational practices. It also identifies methods for overcoming institutional barriers and challenges to implementing assessment initiatives. The book begins with an overview of the assessment theory, presents examples of real-world applications, and includes key assessment resources throughout. In addition, the book covers six basic themes: Use of assessment to improve student learning and educational programs at both undergraduate and graduate levels Understanding and applying ABET criteria to accomplish differing program and institutional missions Illustration of evaluation/assessment activities that can assist faculty in improving undergraduate and graduate courses and programs Description of tools and methods that have been demonstrated to improve the quality of degree programs and maintain accreditation Using high-impact educational practices to maximize student learning Identification of methods for overcoming institutional barriers and challenges to implementing assessment initiative A practical guide to the field of engineering and engineering technology, Introduction to Engineering: An Assessment and Problem-Solving Approach serves as an aid to both instructor and student in developing competencies and skills required by ABET and AAC&U.

Bourgeois Radicals explores the NAACP's key role in the liberation of Africans and Asians across the globe even as it fought Jim Crow on the home front during the long civil rights movement. For NAACP's leaders, the way to create a stable international system, stave off communism in Africa and Asia, and prevent capitalist exploitation was to embed human rights, with its economic and cultural protections, in the transformation of colonies into nations. Indeed, the NAACP aided in the liberation struggles of multiple African and Asian countries within the limited ideological space of the Second Red Scare. However, its vision of a 'third way' to democracy for the hundreds of millions in Asia and Africa was only partially realized due to a toxic combination of the Cold War, Jim Crow, and imperialism. Bourgeois Radicals examines the toll that internationalism took on the organization and illuminates the linkages between the struggle for human rights and the fight for colonial independence.

Statistics are just as vital to understanding political science as the study of institutions, but getting students to understand them when teaching a methods course can be a big challenge. Statistics for Political Analysis makes understanding the numbers easy. The only introduction to statistics book written specifically for political science undergraduates, this book explains each statistical concept in plain language—from basic univariate statistics and the basic measures of association to bivariate and multivariate regression—and uses real world political examples. Students learn the relevance of statistics to political science, how to understand and calculate statistics mathematically, and how to obtain them using SPSS. All calculations are modeled step-by-step, giving students needed practice to master the process without making it intimidating. Each chapter concludes with exercises that get students actively applying the steps and building their professional skills through data calculation, analysis, and memo writing.

Three people living in Tel Aviv, Haifa, and Jerusalem embark on distinct journeys that converge at “the file”; their efforts to admit Palestine to the Olympics in the early twentieth century. Their pivotal roles in history have been purposely omitted from official record, kept secret, or forgotten. Why? Because of the “Nazi Olympics” in 1936 in Berlin. And because of the death in 1972 of eleven Israeli Olympic athletes in the Munich Massacre. This book narrates the previously untold history of a Palestine Olympic Committee recognized before the creation of the State of Israel in 1948. It sheds light on some of the darkest events in sport history, exposing secretive relationships behind the doors of the Jerusalem YMCA, Nazi agitation, arrests, internments, and other intrigue in the complicated history of Israeli and Palestinian sport. The File breaks new ground at the intersection of sport and politics—illuminating the hope, tension, and horror of the 20s, 30s, and 40s, the creation of the State of Israel and the Palestinian refugees, and the resulting guerrilla attack at the Olympics in Munich in 1972—and reveals a handful of heroes whose impact on athletes and international sport competitions is still felt today. Consultant and researcher San Charles Haddad weaves a true and masterful tale of forgotten personalities in a conflict characterized by unabated venom, bringing hope and new questions in his wake. What will be the future of Israel and Palestine, and how might sport play a restorative role in the twenty-first century?
