Weaving together personal stories, history, and analysis, *Same Family, Different Colors* explores the myriad ways skin-color politics affect family dynamics in the United States. Colorism and color bias—the preference for or presumed superiority of people based on the color of their skin—is a pervasive and damaging but rarely openly discussed phenomenon. In this unprecedented book, Lori L. Tharps explores the issue in African American, Latino, Asian American, and mixed-race families and communities by weaving together personal stories, history, and analysis. The result is a compelling portrait of the myriad ways skin-color politics affect family dynamics in the United States. Tharps, the mother of three mixed-race children with three distinct skin colors, uses her own family as a starting point to investigate how skin-color difference is dealt with. Her journey takes her across the country and into the lives of dozens of diverse individuals, all of whom have grappled with skin-color politics and speak candidly about experiences that sometimes scarred them. From a Latina woman who was told she couldn't be in her best friend's wedding photos because her dark skin would "spoil" the pictures, to a light-skinned African American man who spent his entire childhood "trying to be Black," Tharps illuminates the complex and multifaceted ways that colorism affects our self-esteem and shapes our lives and relationships. Along with intimate and revealing

stories, Sharps adds a historical overview and a contemporary cultural critique to contextualize how various communities and individuals navigate skin-color politics. Groundbreaking and urgent, *Same Family, Different Colors* is a solution-seeking journey to the heart of identity politics, so that this more subtle “cousin to racism,” in the author’s words, will be exposed and confronted.

"This is a book about patterned differences in American families--differences based on the national, cultural, religious, and racial identification and membership of groups of people who do not set the dominant style of life or control the privileges and power in any given society. These differences are embedded in what are generally known as "ethnic groups." Ethnicity is usually displayed in the values, attitudes, lifestyles, customs, rituals, and personality types of individuals who identify with particular ethnic groups."--Introduction.

Now in a significantly revised and expanded second edition, this groundbreaking work illuminates how racism, sexism, and other forms of oppression constrain the lives of diverse clients a " and family therapy itself. Practitioners and students gain vital tools for re-evaluating prevailing conceptions of family health and pathology; tapping into clients' cultural resources; and developing more inclusive theories and therapeutic practices. From leaders in the field, the second edition features many new chapters, case examples, and specific recommendations for culturally competent assessment, treatment, and

clinical training. The section in which authors reflect on their own cultural and family legacies also has been significantly expanded.

This book explores the risk and protective factors of rural life and minority status for youth and their families. It provides innovative perspectives on well-documented developmental challenges (e.g., poverty and lack of resources) as well as insights into the benefits of familial and cultural strengths. Coverage includes recent theories in child development, empirical studies of rural minority populations, and leading-edge interventions for urgent issues. The volume presents a spectrum of opportunities for understanding and providing services for youth in the United States through the lens of a diverse collection of ethnic minority experiences in rural settings. Topics featured in this volume include: Theoretical models focused on the intersection of ethnicity and rural settings. Family processes, child care, and early schooling in rural minority families. Promising strategies for conducting research with rural minority families. Strengths-based educational interventions in rural settings. Promoting supportive contexts for minority youth in low-resource rural communities. Rural Ethnic Minority Youth and Families in the United States is a valuable resource for researchers and professors, clinicians and related professionals and graduate students across such disciplines as clinical child, school and developmental psychology, family studies, social work and public health.

**In *Race and Family: A Structural Approach*, author Roberta L. Coles looks at ethnic minority families in a novel way— through a structural lens. Unlike many texts on race and family, this book offers an approach that illustrates overarching structural factors affecting all families as opposed to examining each ethnicity in isolation from one another. By focusing on various structural factors such as demographic, economic, and historical aspects, this book analyzes various family trends in a cross-cutting manner to exemplify the similarities and distinctions among all racial and ethnic groups.**

**race/ethnicity and socioeconomic status intersect to shape children's development and developmental contexts. Important chapters in this new release include the Implications of Intersecting Socioeconomic and Racial Identities for Academic Achievement and Well-being, The home environment of low-income Latino children: Challenges and opportunities, Profiles of race/ethnicity and socioeconomic status: Implications for ethnic/racial identity, discrimination and sleep, Youths' sociopolitical perceptions and mental health: Intersections between race, class, and gender, and much more. Rather than focusing on the additive effects of race/ethnicity and SES, which is typical (and a limitation) in the developmental literature, the scholarship in this book considers how the factors and processes shaping the development of children of color can differ markedly across the socioeconomic continuum. This collection illustrates how applying an intersectional lens to developmental science can yield unique insights into the challenges confronting, and assets buoying, both minority and majority children's healthy development. **As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health**

The book also includes chapters focused on troubling situations that are less commonly researched, but growing in importance, including the role of race and racism in child sex trafficking and US immigration law and policy. Thus, individual chapters explore myriad ways in which law and policy shape the lives of marginalized children and adolescents - racial and ethnic minorities - who historically and presently are at heightened risk for experiencing disadvantageous consequences of law and policy. In so doing, The Legacy of Racism for Children can help social scientists to understand and work to prevent the perpetuation of racial discrimination in American laws and public policies.*

*residential segregation, and low visibility in the national political landscape. In Latinos in American Society, Ruth Enid Zambrana brings together the latest research on Latinos in the United States to demonstrate how national origin, age, gender, socioeconomic status, and education affect the well-being of families and individuals. By mapping out how these factors result in economic, social, and political disadvantage, Zambrana challenges the widespread negative perceptions of Latinos in America and the single story of Latinos in the United States as a monolithic group. Synthesizing an increasingly substantial body of social science research—much of it emerging from the interdisciplinary fields of Chicano studies, U.S. Latino studies, critical race studies, and family studies—the author adopts an intersectional "social inequality lens" as a means for understanding the broader sociopolitical dynamics of the Latino family, considering ethnic subgroup diversity, community context, institutional practices, and their intersections with family processes and well-being. **Nuclear Family Values, Extended Family Lives** shows how the current emphasis on the nuclear family – with its exclusion of the extended family – is narrow, even deleterious, and misses much of family life. This omission is tied to gender, race, and class. This book is broken down into six chapters. Chapter one

discusses how, when promoting "family values" and talking about "family as the basic unit of American society," social commentators, politicians, and social scientists alike typically ignore extended kin ties and focus only on the nuclear family. Chapters two and three show that the focus on marriage and the nuclear family is a narrow view that ignores the familial practices and experiences of many Americans – particularly those of women who do much of the work of maintaining kin ties and racial/ethnic minorities for whom extended kin are centrally important. Chapter four focuses on class and economic inequality and explores how an emphasis on the nuclear family may actually promulgate a vision of family life that dismisses the very social resources and community ties that are critical to the survival strategies of those in need. In chapter five, the authors argue that marriage actually detracts from social integration and ties to broader communities. Finally, in chapter six, the authors suggest that the focus on marriage and the nuclear family and the inattention to the extended family distort and reduce the power of social policy in the United States.

The views and experiences of multiracial people as parents The world ' s multiracial population is considered to be one of the fastest growing of all ethnic groups. In the United States alone, it is estimated that over 20% of the population will be considered " mixed race " by 2050. Public figures—such as

former President Barack Obama and Hollywood actress Ruth Negga—further highlight the highly diverse backgrounds of those classified under the umbrella term of “multiracial.” *Multiracial Parents* considers how mixed-race parents identify with and draw from their cultural backgrounds in raising and socializing their children. Miri Song presents a groundbreaking examination of how the meanings and practices surrounding multiracial identification are passed down through the generations. A revealing portrait of how multiracial identity is and is not transmitted to children, *Multiracial Parents* focuses on couples comprised of one White and one non-white minority, who were mostly “first generation mixed,” situating her findings in a trans-Atlantic framework. By drawing on detailed narratives about the parents’ children and family lives, this book explores what it means to be multiracial, and whether multiracial identity and status will matter for multiracial people’s children. Many couples suggested that their very existence (and their children’s) is a step toward breaking down boundaries about the meaning of race and that the idea of a mixed-race population is increasingly becoming normalized, despite existing concerns about racism and racial bias within and beyond various communities. A critical perspective on contemporary multiracial families, *Multiracial Parents* raises fundamental questions about the future significance of racial boundaries and

identities.

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of

the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? Unequal Treatment offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. Unequal Treatment will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

The multiracial-multiethnic population has grown significantly over the past 50 years, and about half of the current multiracial-multiethnic population is under the age of 18. A majority of the research conducted on this population has focused on the identity development of the multiracial-multiethnic individual. The available literature about multiracial-multiethnic identity development emphasizes healthy views about mixed race and ethnicity as a focal point for the well-being, self-esteem, and personal identity development of this population. This view includes the recent shift towards accepting the racial-ethnic identity of the multiracial-multiethnic individual regardless of how the person self-identifies. Race and racial issues have also been found to be a challenging and emotional process for parents raising multiracial-multiethnic children, particularly when discussing issues of

discrimination. The purpose of this project is to provide a story-workbook that can be used by interracial-interethnic families with children 5-8. It is designed to help families discuss issues about race and ethnicity in order to promote a healthy identity development within the family system, and for the child as he/she grows. This best-selling textbook explains the current state of research in the sociology of race/ethnicity, emphasizing white privilege, the social construction of race, and the newest theoretical perspectives for understanding race and ethnicity. It is designed to engage students with an emphasis on topics that are meaningful to their lives, including sports, popular culture, interracial relationships, and biracial/multiracial identities and families. The new third edition comes at a pivotal time in the politics of race and identity. Fitzgerald includes vital new discussions on white ethnicities and the politics of Trump and populism. Prominent attention is given to immigration and the discourse surrounding it, police and minority populations, and the criminal justice system. Using the latest available data, the author examines the present and future of generational change. New cases studies include athletes and racial justice activism, removal of Confederate monuments, updates on Black Lives Matter, and Native American activism at Standing Rock and against the Bayou Bridge pipeline.

This chart book is designed to document current differences in well-being by race and Hispanic origin and to describe how such differences have evolved over the past several decades. The charts included in this book show key indicators of well-being in seven broad categories: (1) population; (2) education; (3) labor markets;

(4) economic status; (5) health; (6) crime and criminal justice; and (7) housing and neighborhoods. Each section begins with a brief introduction and overview of the charts presented. This information provides a benchmark for measuring future progress and can highlight priority areas for reducing disparities across racial and ethnic groups. All the racial and ethnic groups considered here have experienced substantial improvements in well-being over the second half of the century, but disparities between groups have persisted, or in some cases, widened. An example is the decline in the relative economic status of Hispanics over the past 25 years, reflecting the increasing proportion of Hispanics with lower average levels of education, in large part because of immigration. The section on education, which makes disparities in educational attainment and achievement clear, contains information on family participation in literacy activities and preschool education. One chart reviews computer use by elementary school children, and two charts cover reading and mathematics proficiency scores, both of which have implications for the pursuit of higher education. Three charts focus on the educational attainment of adults over 25 years old. An appendix provides a list of other government publications and Internet addresses for more information. This volume examines existing research documenting racial disproportionality and disparities in child welfare systems, the underlying factors that contribute to these phenomena and the harms that result at both the individual and community levels. It reviews multiple forms of interventions designed to prevent and reduce disproportionality, particularly in states and jurisdictions that have seen meaningful change. With contributions from authorities and leaders in the field, this volume serves as the authoritative volume on the complex issue of child maltreatment and child welfare. It offers a central source of information for students and practitioners who are seeking understanding on how structural and institutional racism can be addressed in public systems.

Social scientists claim that we now live in a post-race society, where race has been replaced by 'ethnicity'. Yet racism is endemic to British society and people often think in terms of black and white. With a marked rise in the number of children from mixed parentage, there is an urgent need to challenge simplistic understandings of 'race',

nation and culture, and interrogate what it means to grow up in Britain and claim a 'mixed' identity. Focusing on mixed-race and inter-ethnic families, this book not only explores current understandings of 'race', but it shows, using innovative research techniques with children, how we come to read race. What influence do photographs and television have on childrens ideas about 'race'? How do children use memories and stories to talk about racial differences within their own families? How important is the home and domestic culture in achieving a sense of belonging? Ali also considers, through data gathered from teachers and parents, broader issues relating to the effectiveness of anti-racist and multicultural teaching in schools, and parental concerns over the social mobility and social acceptability of their children. Rigorously researched, this book is the first to combine childrens accounts on 'race' and identity with contemporary cultural theory. Using fascinating case studies, it fills a major gap in this area and provides an original approach to writing on race.

Race, ethnicity and nation are all intimately linked to family and kinship, yet these links deserve closer attention than they usually get in social science, above all when family and kinship are changing rapidly in the context of genomic and biotechnological revolutions. Drawing on data from assisted reproduction, transnational adoption, mixed race families, Basque identity politics and post-Soviet nation-building, this volume provides new and challenging ways to understand race, ethnicity and nation. Filling a critical void in the literature, *Race, Racism, and the Developing Child* provides an important source of information for researchers, psychologists, and students on the recent advances in the unique developmental and social features of race and racism in children's lives. Thorough and accessible, this timely reference draws on an international collection of experts and scholars representing the breadth of

perspectives, theoretical traditions, and empirical approaches in this field.

"This important study provides a unique and comprehensive analysis of research into the development of adoption policy and practice regarding black and minority ethnic children in the care of local authorities...I found this book intellectually stimulating and often provocative - it does not make comfortable reading but in the final analysis the case for retaining a commitment to placing children in families which reflect their ethnicity is strongly made." - Felicity Collier, the Director of British Agencies for Adoption and Fostering. \* What are the needs of adopted minority ethnic children? \* To what extent can white families meet these needs? \* Should the emphasis on ethnic matching of children and families in adoption be relaxed? This book reviews the long running and often fierce controversy surrounding the adoption of black and minority ethnic children, either transracially into white families or into matched 'same race' placements. Through analysis of research and the writings of protagonists, the core concepts - namely the nature and salience of racial/ethnic identity, cultural heritage and dealing with racism - are explored and located within broader debates on 'race' and the family. The history of the controversy is set out in terms of the competing paradigms offered by liberalism and black radicalism, and more recent 'post-structuralist' influences. The author argues the need to see adoption (and especially that of black children) as inherently political and contested. While broadly supporting the case for 'same race' adoption, it is suggested that this must rest on acknowledgement of, and

engagement with, social and psychological complexities, rather than their suppression beneath doctrinaire formulae. 'Race', Ethnicity and Adoption sets the issues in the wider context of a multiracial society and its politics, and will be of particular interest to social workers and child care professionals, but will also appeal more widely to students of sociology, and social and public policy.

The Legacy of Racism for Children

The complexity of ethnicity, socio-economic context, gender, race and racism provide the backdrop for discussions around contested areas such as parental authority and discipline, attitudes and views about education, and acculturation and racial and ethnic socialisation. Parenting in Multi-racial Britain presents the findings from an empirical study into the views and experiences of a non-clinical group of 'ordinary' parents in diverse ethnic communities in England and provides a unique insight for the range of professionals working with diverse families.

Many scholars and political analysts assume that thriving kin and non-kin social support networks continue to characterize minority family life. Policy recommendations based on these underlying assumptions may lead to the implementation of harmful social policy. *No More Kin* examines extended kinship networks among African American, Chicano and Puerto-Rican families in the United States, and provides an integrated theoretical framework for examining how the simultaneity of gender, race and class oppression affects minority family organization.

In their later years, Americans of different racial and ethnic backgrounds are not in equally good--or equally poor--health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume

provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

This pioneering volume draws together theoretical and empirical contributions analyzing the experiences of white mothers in interracial families in Britain, Canada and the USA. The growth of the mixed race population reflects an increasingly racially and culturally heterogeneous society, shaped by powerful forces of globalisation and migration. Mixed family formations are becoming increasingly common through marriage, relationships and adoption, and there is also increasing social recognition of interracial families through the inclusion of mixed categories in Census data and other official statistics. The changing demographic make-up of Britain and other Western countries raises important questions about identity, belonging and the changing nature of family life. It also connects with theoretical and empirical discussions about the significance of 'race' in contemporary society. In exploring mothering across racialised boundaries, this volume offers new insights and perspectives. The notion of racialisation is invoked to argue that, while the notion of race does not exist in any meaningful sense, it continues to operate as a social process. This crucial resource will appeal to academics, researchers, policy makers, practitioners and undergraduate and postgraduate students. This book was originally published as

Examines how recent profound structural and attitudinal changes affect family forms, interpersonal relationships, and raising children. It reaches beyond the traditional discussions to explore racial-ethnic families, single-parent families and gay families as well as the recent scholarship by and about men, fathers, and grandfathers. Contemporary American marriages and families vary greatly in structure, dynamics, and cultural heritage. Thus, discussions of gender roles, social class, race, ethnicity, age, and sexual orientation are integrated throughout this book. To further strengthen students understanding of the growing diversity among today's families, the author included a series of boxes that focus on families from many cultures.

**Choices** On the individual level, family members have many more choices today than ever before. People feel freer to postpone marriage, to cohabit, or to raise children as single parents. As a result, household forms vary greatly, ranging from commuter marriages to those in which several generations live together under the same roof.

**Constraints** Although family members choices are more varied today, we also face greater macro- level constraints. Our options are increasingly limited, for example, by government policies. Economic changes often shape family life and not vice versa. Political and legal institutions also have a major impact on most families in tax laws, welfare reform, and even in defining what a family is. Because laws, public policies, and religious groups affect our everyday lives, the author has framed many discussions of individual choices within the larger picture of the institutional constraints that limit our choices. workshop. The family patterns seen in recent decades—cohabitation, divorce, nonmarital childbearing, same-sex marriage and childrearing—can seem like radical changes from the past. But upon closer examination, many are consistent with broader trends that have been going on for centuries. *Sociology of Families: Change, Continuity, and Diversity* considers this tension between change and continuity, situating families in a social, historical, and economic context, and emphasizing how these contexts create family diversity and inequality. By incorporating diverse family structures into each chapter, author Teresa Ciabattari has written a text that challenges idealized assumptions about how families should be, and instead explores the complex realities of how families actually are.
