

Radio A Transistor

From the bestselling author of *Midwives* comes a thought-provoking story about gender, love, and new relationships. When Allison Banks develops a crush on Dana Stevens, she knows that he will give her what she needs most: attention, gentleness, kindness, passion. Her daughter, Carly, enthusiastically witnesses the change in her mother. But then a few months into their relationship, Dana tells Allison his secret: he has always been certain that he is a woman born into the wrong skin, and soon he will transition. Allison, overwhelmed by the depth of her passion, finds herself unable to leave Dana. By deciding to

stay, she finds she must confront questions most people never even consider. Not only will her own life and Carly's be irrevocably changed, she will have to contend with the outrage of a small Vermont community and come to terms with her lover's new body—hoping against hope that her love will transcend the physical.

A DIY guide to designing and building transistor radios Create sophisticated transistor radios that are inexpensive yet highly efficient. Build Your Own Transistor Radios: A Hobbyist's Guide to High-Performance and Low-Powered Radio Circuits offers complete projects with detailed schematics and insights on how the radios were designed. Learn how to choose components, construct the different

Cellular telephones, satellite communications and radar systems are adding to the increasing demand for radio frequency circuit design principles. At the same time, several generations of digitally-oriented graduates are missing the essential RF skills. This book contains a wealth of valuable design information difficult to find elsewhere. It's a complete 'tool kit' for successful RF circuit design. Written by experienced RF design engineers from Motorola's semiconductors product section. Book covers design examples of circuits (e.g. amplifiers; oscillators; switches; pulsed power; modular systems; wiring state-of-the-art devices; design techniques).

God's Transistor Radio is an audit of the myriad processes through which people reinvented themselves, using the old, the new and the in-between, to survive the twentieth century. Writing in a style that is elegantly spare Oguibe scans and spans his personal, familial, communal, national and continental archives, illuminating contemporary Africa and the notion of Africanity from the inside with a scrutiny that zooms seamlessly between a global depth of focus, and the extreme close-up. At the same time Oguibe treats the archives of the West as his own, recognizing

no limits, no boundaries--his frame of reference is universal. For those who would, here is the primer on how to write about Africa.

Over 600 color photos display novelty transistor radios, including models shaped as airplanes, beer bottles, bugs, cars, vending machines, weapons, famous people, and advertising characters. Some radios advertise food, drinks, household products, and sports teams. Detailed information and values are provided.
