*Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. uncovers the largely untold story of the training and education of these crucial protagonists of the Fascist and Nazi regimes, and he examines more broadly the structures, ideologies, rhetoric, and aspirations of youth organizations in Fascist Italy and Nazi Germany. Ponzio shows how the Italian Fascists' pedagogical practices influenced the origin and evolution of the Hitler Youth. He dissects similarities and differences in the training processes of the youth leaders of the Opera Nazionale Balilla, Gioventù Italiana del Littorio, and Hitlerjugend. And, he explores the transnational institutional interactions and mutual cooperation that flourished between Mussolini's and Hitler's youth organizations in the 1930s and 1940s.

*This book examines European history and politics between two very well-known but flawed treaties: The Treaty of Versailles and the Treaty of Maastricht. Taking the Treaty of Versailles, signed following World War I, as a starting point, the volume argues that while it was well-intentioned to the point of being utopian, it was also totally impractical, rearranging the map of Europe in a way which led to the tragic*

The volume then moves through the post war period, the outcome of the war producing the uneasy stability of a Cold War divided continent, and with the establishment of NATO in 1949, the process of European integration ushered in the era of cooperation. Under the influence of Charles de Gaulle, the newly created European Community acted as an association of sovereign states led by*

After de Gaulle's retirement in 1969, this approach was progressively abandoned in favour of a federal model of integration in which member states transferred their sovereignty to the institutions of what became the European Union. Europe was to be transformed from a continent to a country. The book concludes by analysing the Maastricht treaty, which*

***This book analyzes the role and function of an Italian deportation camp during and immediately after World War Two within the context of Italian, European, and Holocaust history. Drawing upon archival documents, trial proceedings, memoirs, and testimonies, Herr investigates the uses of Fossoli as an Italian prisoner-of-war camp for Allied soldiers captured in North Africa (1942-43), a Nazi deportation camp for Jews and political prisoners (1943-44), a postwar Italian prison for Fascists, German soldiers, and displaced persons (1945-47), and a Catholic orphanage (1947-52). This case study shines a spotlight on victims, perpetrators, Resistance fighters, and local collaborators to depict how the***

This book trains a powerful lens on the multi-layered history of Italy during the Holocaust and illuminates key elements of local involvement largely ignored by Italian wartime and postwar narratives, particularly compensated compliance (compliance for financial gain), the normalization of mass murder, and the industrialization of the Judeocide in Italy.*

(Includes maps) From September 1943, when Allied troops came ashore near Salerno, until German surrender in May 1945, 312,000 Allied soldiers were killed, wounded, or missing in Italy. Was a campaign that from the first faced the bleak prospect of coming to a dead end against the forbidding escarpment of the Alps worth that cost? Was the objective of tying down German troops to avoid their commitment in

northwestern Europe all that the campaign might have accomplished? The answers to those questions have long been sought but, as is the nature of history, must forever remain conjecture. What is established bet, as this volume makes clear, is the tenacity and intrepidity displayed by American and Allied soldiers in the face of a determined and resourceful enemy, harsh weather, sharply convoluted terrain, limited numbers, and indefinite goals in what many of them must have looked upon as a backwater of the war. This volume relates the story of the last year of their struggle. Three volumes previously published tell of the campaign in northwest Africa, the conquest of Sicily and covert politico-military negotiations leading to surrender of the Italian armed forces, and the

campaign from the Allied landings on the mainland through the bitter disappointment of the amphibious assault at Anzio. This volume is thus the capstone of a four-volume series dealing with American military operations in the western Mediterranean.

Documents consist of departmental memos and reports, correspondence with individuals, and press clippings and press reports which deal with American Jewish groups during 1942-1945, as well as issues relating to Palestine, Jews and Jewish refugees during World War II.
