Artificial intelligence  
(AI) technologies are  
one of the top  
investment priorities  
in these days. We  
expect that by 2030,  
some 800 million jobs  
will have disappeared  
and taken over by  
machines, and

artificial intelligence will reach human levels by around 2029. Continuing this train of thought to 2045, we will have multiplied the intelligence, the human biological machine intelligence of our civilization a billion-fold. The time of machines requires new forms of work
