Realidades is a standards-based Spanish curriculum that balances grammar and communication. The program offers technology designed to integrate language and culture to teach and motivate all students.

Extra-grammatical morphology is a hitherto neglected area of research, highly marginalised because of its irregularity and unpredictability. Yet many neologisms in English are formed by means of extra-grammatical mechanisms, such as abbreviation, blending and reduplication, which therefore deserve both greater attention and more systematic study. This book analyses such phenomena.
