□ Concepts of heaven and hell are among the oldest, most widespread religious beliefs in history. In Western literature, they are frequently embedded in stories of underworld explorations and celestial journeys—stories examining the nature of the universe, life on earth and the existence of the gods. The author analyzes tales of wonder in both ancient and medieval European literature. Other-worldly narratives appeared in literary contexts in the ancient world, including mythology, poetry and philosophical writings. In medieval times, they remained a popular form of literary expression. These stories are primarily religious in nature, describing fantastic worlds filled with miracles and supernatural beings.

there is a person who is all powerful but no one know this person yet everyone says her name every time and every day do you know her? this person is called "fate" who is most kind and cruel with many different personalities and many names like lady fate, lady luck, fortuna, maha maya,...etc.there is one sentence to describe this person's power "no matter if you are THE GOD or THE DEVIL, one can never cross fate unless she gave you the way". what if a person propose his love to fate? "oh! you love me, so what, what qualification do you have, but since you have the guts to propose to me then prove me your worth". "conquer all the worlds under me and find all the pieces of me in the world and conquer them from level zero without your current power to finally reach this fate realm then we can see your worth". this started the journey of the conqueror to conquer the world and fate where there are many adventures in many realms, forming a huge harem, refining pills, weapons crafting, charm making, formation building, monster taming, and many and unknown things with a marvelous game system that shake's the world. THIS NOVEL IS MY FIRST NOVEL since English is not my mother tongue grammar will be a little off but as the story goes on the grammar will improve as well this is proved through the comments of my successful publishing through other platforms thank you readers

He learns that he is the victim of an extraordinary experiment. In an attempt to reform society, the government has divided the population into four groups, each representing a different personality type. The land, too, has been divided into quarters. Borders have been established, reinforced by concrete walls, armed guards and rolls of razor wire. Cohen argues that the emergence of the United States as the world's sole superpower and the process of globalization have failed to remove the importance of geography as a political and strategic factor of great import. After laying out the structural basis for his theory of geopolitical theory, he launches into an examination of how geopolitical realities have developed since World War II, a period that witnessed greater change than the preceding two and a half centuries. He then turns his attention to the meat of the book, separate examinations of the each of the major world regions, including examinations of the important countries and their individual geopolitical realities.

**A Shocking Bible Discovery found in the Dead Sea Scrolls! After forty years of research in the Biblical text, this book came about while studying Biblical manuscripts in their original Greek. I was given a project by my Greek professor to research the Dead Sea Scrolls. This research changed my life, my belief about time and the books of the Bible. While researching the Dead Sea Scrolls, I found two historical books that were in the Bible during Jesus time on this Earth. So I ask this question: Why did man remove these books? The deeper I studied I discovered that our Bible should have seventy books instead of sixty-six. Six is the number of man and a number representing incompleteness. Sixty-six doubles its meaning, and the number 666 needs no explanations. "Men do resist God's will today" (2 Peter 3:9). While researching the subject I encountered extreme opposition. The books of the Bible should be divisible by seven. So, we are missing one New Testament book and three Old Testament books to make a seventy book Bible. Have we been deceived by our religious leaders and science community? Does all time truly consist in a 7,007-year window? This book is written from the complete seventy-book Bible which was revealed in the Dead Sea Scrolls. Do the scrolls reveal angels mating with the daughters of Adam? Where did the giant human originate? Have we all been lied to about Genesis 6 and the events during the days of Noah? Are angels and demons masquerading as aliens and UFOs in a great end of time deception? Will the dollar collapse by 2022? Will the U.S. be destroyed in one day by 2028? "However, when He, the Spirit of truth, has come, He will guide you into all truth; for He will not speak on His own authority, but whatever He hears He will speak; and He will tell you things to come," (John 16:13-14).**

England, 1215. The year of Magna Carta and King John's war with his barons, but also of crusading and church reform, of foreign wars and dramatic sieges, of trade and treachery; a year in which London would be stormed by angry barons; England would be invaded by a French army; and a supposedly impregnable castle would be brought down with burning pig fat. But this was also a year in which life, for most people, just went on. Thus 1215 opens a window onto everyday life in the 13th century. It offers a vivid and authoritative portrait--from royal court to peasant wedding--of medieval life in the round, as well as an exhilarating and revelatory exploration of the big themes of politics, warfare, religion, feudalism, mercantilism, travel, and the law in a transformative year in English history. 100,000 miles of mountains and rivers shattered. 80 million corpses were buried in the sky. In drunkenness, the dream was born with bitterness. After waking up, he would not become an immortal! ... .. I am just a village child, forced by fate to go through a tragic life, suffering unspeakably in my heart, becoming an inscriptionist, witnessing the coming of a chaotic world, the rise of demi-humans, the unravel of the Immortal's War, the secrets of the three great dead, step by step, I have to unearth the truth of this world, to find out the true story of myself, the legend of the demonkind ...

In this revelatory and original book, award-winning author of the acclaimed surf memoir *On a Wave* illuminates the connection between waves, addiction, and recovery, exploring what surfing can teach us about the powerful undertow of addictive behaviors and the ways to swim free of them. Addiction is arguably the dominant feature of contemporary life: sex, gambling, exercise, eating, shopping, Internet use—there's virtually no pleasurable activity that can't morph into a destructive obsession. For Americans under the age of fifty-five, the leading cause of death is drug overdose. But there is another side of addiction. In some instances, the very activities that can lead to addiction can also lead out of it. As neurologists have recently discovered, surfing is a kind of study in the mechanism of addiction, delivering dopamine to the "pleasure" center of the brain and reshaping priorities and desire in a feedback loop of narrowing focus. Thad Ziolkowski knows this dynamic intimately. A lifelong surfer, he has been surrounded by addiction since his boyhood. In this unique, groundbreaking book, part addiction memoir, part

sociological study, part spiritual odyssey, Ziolkowski dismantles the myth of surfing as a radiantly wholesome lifestyle immune to the darker temptations of the culture and discovers among the rubble a new way to understand and ultimately overcome addiction. Combining his own story with insights from scientists, progressive thinkers and the experiences of top surfers and addicts from around the world, Ziolkowski shows how getting on a board and catching a wave is a unique and deeply instructive means of riding out of the darkness and back into the light. Yet while surfing is his salvation, its lessons can applied to other activities that can pull us free from the lethal undertow of addiction and save lives.

***The heavens and earth are the army, I am the general, Hong Yu is the official, and I am the king. The Heaven and Earth, the determinant of destiny. A heaven's pride level expert of this era had to bear the blessing of the Five Gods, changing his fate in a way that defied the will of the heavens. ***The Abhisamayalamkara summarizes all the topics in the vast body of the prajñāparamita sutras. Resembling a zip-file, it comes to life only through its Indian and Tibetan commentaries. Together, these texts not only discuss the "hidden meaning" of the prajñāparamita sutras—the paths and bhumis of sravakas, pratyekabuddhas, and bodhisattvas—but also serve as contemplative manuals for the explicit topic of these sutras—emptiness—and how it is to be understood on the progressive levels of realization of bodhisattvas. Thus these texts describe what happens in the mind of a bodhisattva who meditates on emptiness, making it a living experience from the beginner's stage up through buddhahood. Groundless Paths contains the first in-depth study of the Abhisamayalamkara (the text studied most extensively in higher Tibetan Buddhist education) and its commentaries from the perspective of the Nyingma School of Tibetan Buddhism. This study consists mainly of translations of Maitreya's famous text and two commentaries on it by Patrul Rinpoche. These are supplemented by three short texts on the paths and bhumis by the same author, as well as extensive excerpts from commentaries by six other Nyingma masters, including Mipham Rinpoche. Thus this book helps close a long-standing gap in the modern scholarship on the prajñāparamita sutras and the literature on paths and bhumis in mahayana Buddhism. Arya Maitreya's Ornament of Clear Realization, with its Indian and Tibetan commentaries, presents the complex dynamics of the path to liberation as a succession of***

**Now recognised as the standard work on the subject, *Realm of St Stephen* is a comprehensive history of medieval Eastern and Central Europe. Pál Engel traces the establishment of the medieval kingdom of Hungary from its conquest by the Magyar tribes in 895 until defeat by the Ottomans at the Battle of Mohacs in 1526. He shows the development of the dominant Magyars who, upon inheriting an almost empty land, absorbed the remaining Slavic peoples into their culture after the original communities had largely disappeared. **This book is the first comprehensive documentation and interpretation of modern neritic carbonate sediments on the southern Australian continental margin, the largest cool-water carbonate depositional system on the globe. The approach is classical but the information is new. A brief chapter of introduction is followed by a section that describes the setting of the continental margin in terms of the regional geology, its evolution through time, the climate, and the complex oceanography. The setting is further explored in chapter 3 that outlines the Pleistocene history of sedimentation in this region. This is particularly important since many of the surficial sediments have a partial older history. The following section on the carbonate factory describes in detail the nature of the animals and plants that determine the nature of the sediments and the environmental conditions that control their distribution. The shelf itself cannot be discussed in isolation and thus a short chapter on the marginal marine environment is presented. The core of the book comprises two chapters that document the suite of depositional facies and their composition and then the suite of depositional environments where these sediments are found. The variety of deposits in this vast area is such that three chapters are devoted to the character of the materials on the southwestern shelf the south Australian sea and the southeastern shelf. The diagenesis that affects these sediments is tackled in a chapter after all the attributes are**

documented because they are intimately linked to different controls. The book finishes with a summary chapter that also addresses the various controls on sedimentation and models the effects to be expected when these are changed outside those present in the current realm. Audience: The book is an invaluable source of information about this vast region and will be a critical reference for researchers, graduate students, and professionals engaged in marine and environmental research. It will be of particular importance for geologists interpreting the ancient rock record. Instant #1 New York Times Bestseller! *In 1908, the ruler of the Balinese realm of Klungkung and more than 100 members of his family and court were massacred when they marched deliberately into the fire of the Dutch colonial army. The question of what their action meant and its continued significance in contemporary Klungkung forms the basis of Margaret Wiener's complex anthropological history. Wiener challenges colonial and academic claims that Klungkung had no "real" power and argues that such claims enabled colonial domination. By focusing on Balinese discourses she makes clear the choices open to Balinese, both at the time of the Dutch conquest and in its narration. At the same time, she shows how these discourses, which revolve around magical weapons acquired from invisible agents such as gods, spirits, and ancestors, offer an alternative understanding of Klungkung's power. Moving between Balinese and Dutch narratives and between past and present, Wiener critiques colonial accounts by recounting Balinese memories and interpretations. Her attention to history and local situations illuminates the ways in which colonialism and orientalist scholarship have obscured the power of indigenous rulers and shows how Klungkung, once Bali's paramount realm, was relegated to a peripheral corner of the Indonesian nation-state. Both as a fascinating story and as a rich example of interdisciplinary scholarship, this book will interest students of colonialism, anthropology, history, religion, and Southeast Asia.*
