

Rebuild Fifth Wheel

How to Rebuild and Modify High-Performance Manual Transmissions breaks down the disassembly, inspection, modification/upgrade, and rebuilding process into detailed yet easy-to-follow steps consistent with our other Workbench series books. The latest techniques and inside info help you quickly perform a tear-down, identify worn parts, select the best components, and successfully assemble a high-performance transmission. Transmission expert and designer Paul Cangialosi shares his proven rebuilding methods, insight, and 27 years of knowledge in the transmission rebuilding process for most major high-performance transmissions, including BorgWarner T10 and super T10, GM/Muncie, Ford Toploader, and Tremec T5. This new edition also contains a complete step-by-step rebuild of the Chrysler A833 transmission.

In the late twentieth century, nothing united union members, progressive students, Black and Chicano activists, Native Americans, feminists, and members of the LGBTQ+ community quite as well as Coors beer. They came together not in praise of the ice cold beverage but rather in protest of the Coors-based Coors Brewing Company. Wielding the consumer boycott as their weapon of choice, activists targeted Coors for allegations of antiunionism, discrimination, and conservative political ties. Over decades of organizing and coalition-building from the 1950s to the 1990s, anti-Coors became a powerful means of political protest. In this first narrative history of one of the longest boycott campaigns in U.S. history, Allyson P. Brantley draws from a broad archive as well as oral history interviews with long-time boycotters to offer a compelling, grassroots view of anti-Coors that formed in opposition to the iconic Rocky Mountain brew. The story highlights the vibrancy of activism in the final decades of the twentieth century and the enduring legacy of that organizing for communities, consumer activists, and corporations today.

Dmitri Kondratiev has given his name to business cycles. We call the ups and downs Kondratiev Waves. Other economists have studied the field but Kondratiev made it his career and paid for his dedication with his life, landing on one of Stalin's many lists as individuals to be executed, in his case in the year 1938. The existence of the business cycle is interwoven with the lives of the Doran family. Robinson Doran has retired from a professorship in economics and in a precipitous fashion moves to the country to take up farming. He believes that life as we have known it is coming to an end. Economic life, that is. Robinson's wife, Rose, refuses to move to the country. She takes up with a widower out of loneliness. Their son, Stanton, loses his job on the newspaper but slowly rebuilds his life. Their daughter, Harriet, a medical doctor, saves lives through it all. There is a romantic interest, who happens on Robinson at his farm, providing him company and gardening skills. A new tax code to replace the current one is provided by Robinson and Stanton. The national debt is analyzed. Life in the United States returns to normal after a long decade.

The business cycle is never repealed, its place made secure by the vagaries of human beings. Kondratiev lives on.
