

Red Cross First Aid Test Study Guide

The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides information on how to manage illness and injuries in a child during the first few minutes of an emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Life League organizations, as well as parents, grandparents, and baby sitters.

Discusses the history and techniques of swimming and diving, safety rescue techniques, and skills for a variety of aquatic activities.

Caregivers and teachers need to know what to do when a child is injured or becomes suddenly ill. Most injuries that require first aid care are not life-threatening. However, first aid can sometimes mean the difference between life and death. This course is designed to give caregivers and teachers the education they need to effectively care for children.

American Red Cross First Aid Responding to Emergencies

Ask any fire/rescue or EMS person and they will tell you: the key to emergency response is preparedness. First comes prevention; knowing how to stop emergencies before they happen. Yet if sudden injury or illness occurs, knowing what to do can make the difference between a mild emergency and a serious one, or even between life and death. When you don't know, panic usually results; now you're part of the problem. But don't fret; the information you need to be the first step in the solution - basic first aid and safety skills - is relatively simple and easy to learn. Easy to learn, yes, but if things go wrong, your learning suddenly makes all the difference. First Aid and Safety For Dummies gives you the tools you need to save a life. Whether it's performing CPR correctly or accident-proofing your home, this comprehensive guide shows you how to effectively prevent and respond to emergencies. In typical lively-yet-informative Dummies style, you'll find out about dealing with: Wounds Burns Poisoning Shock Bites and stings Choking And much more Thorough instructions detail each problem and its first aid; off-putting jargon is kept to a minimum and common sense to a maximum in considering not only the classic symptoms (for example, two hands on the throat for choking) but also the variations (what if that choking victim is you - and you're alone?) that crop up in real-world emergencies. Emphasizing practicality and ready-to-use knowledge, this book also covers: Creating a first-aid kit Safety for all areas of the home Special needs of children, the elderly, and the disabled A chapter on hazards of the high-tech workplace Sports injuries and accidents Herbal remedies CPR and artificial respiration Emergency rescue procedures Who to call and when Preparedness is peace of mind. With the knowledge you'll gain from First Aid and Safety For Dummies, you can rest assured that you've taken the most effective steps against accidents and mishaps. You can also be confident that if an emergency does occur, yours will be the calmer, cooler head, and cooler heads are the ones that prevail.

When did you last read yours? For over 80 years The Highway Code has been the official guide to using the roads safely and legally. It has contributed enormously to road safety and reliable road transport. However, every day, on average five people are killed and just over 60 people are seriously injured in road collisions. So it is as important as ever that all road users, including drivers, motorcyclists, cyclists, horse riders and pedestrians, should update their knowledge of The Highway Code. The Highway Code - for life, not just for learners.

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children.

Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED.

Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

APLS: The Pediatric Emergency Medicine Resource, Revised Fourth Edition offers the information necessary to assess and manage critically ill or injured children during the first hours in the emergency department. The Revised Fourth Edition of APLS is truly the body of knowledge in pediatric emergency medicine. If you want the newest, most comprehensive reference on pediatric emergency medicine, the Revised Fourth Edition will meet your needs. Developed by expert authors, editors, and faculty from both AAP and ACEP, the new APLS is a unique teaching and learning system for individual physicians, residents, students, and APLS instructors and course directors. The Fourth Edition of APLS has been revised and expanded to cover new conclusions drawn from reason, fact, and experience to the benefit of sick and injured children worldwide. Together, AAP and ACEP developed APLS into a new, stand-alone course, offering continuing medical education

units and an APLS course completion card. The course is highly interactive with small group scenarios, hands-on skill stations, and case-based lectures.
