Chief of Staff of the U.S. Army General Mark A. Milley repeatedly warns of increased complexity, ambiguity, and speed in future warfare. The decision-making process at all levels of command will be challenged by the environment, the situation, and the enemy, as well as by the perception and interpretation of our thoughts. The requirement to frame decisions around the scope and rate of information sharing on the modern battlefield and adapting those frames to the complexity of context and content, necessitates the ability to think critically and creatively. The curriculum at the University of Foreign Military and Cultural Studies (UFMCS) directly addresses these challenges by training

and preparing students to operate as a Red Teamer. Red Teaming creates and illuminates pathways to better decisions by employing structured techniques to identify hidden dangers, reveal unseen possibilities, and facilitate creative alternatives. It is, in essence, a form of risk management for the human brain. The U.S. Army chartered UFMCS with the mission to teach Red Teaming to the U.S. Army and other authorized organizations. As the nature of warfare has evolved, so too has our curriculum and academic offerings. Version 9.0 of the Red Team Handbook represents the current state of our program. Although the contents of this volume and our courses are not official doctrine, the practices discussed directly support and are in both Joint and U.S. Army Doctrine. This handbook provides the reader with an

But no matter the focus, the poet "pares close to the bone," exploring, yet never shrinking from, the truth. The reward, as revealed in the title poem, is a "bending to beauty" that makes one stronger. Poem after poem, *Bending to Beauty* probes the complicated, painful, and wondrous that is life - and holds it up for all to recognize.

Why Red Teaming? The premise of the program at the  
University of Foreign Military and Cultural Studies  
(UFMCS) is that people and organizations court failure in  
predictable ways, that they do so by degrees, almost  
imperceptibly, and that they do so according to their

mindsets, biases, and experience, which are formed in large part by their own culture and context. The sources of these failures are simple, observable, and lamentably, often repeated. They are also preventable, and that is the point of ‘ red teaming ’ . Our methods and education involve more than Socratic discussion and brainstorming. We believe that good decision processes are essential to good outcomes. To that end, our curriculum is rich in divergent processes, red teaming tools, and liberating structures, all aimed at decision support. We educate people to develop a disposition of curiosity, and help them become aware of biases and behavior that prevent them

from real positive change in the ways they seek solutions and engage others. We borrow techniques, methods, frameworks, concepts, and best practices from several sources and disciplines to create an education, and practical applications, that we find to be the best safeguard against individual and organizational tendencies toward biases, errors in cognition, and groupthink. Red teaming is diagnostic, preventative, and corrective; yet it is neither predictive or a solution. Our goal is to be better prepared and less surprised in dealing with complexity. What is Red Teaming? Red teaming is a function that provides commanders an independent capability to fully explore

alternatives in plans, operations, concepts, organizations and capabilities in the context of the operational environment (OE) and from the perspectives of partners, adversaries and others. A Red Team performs three general types of tasks: - Support to operations, planning, and decision support - Critical review and analysis of already-existing plans - Intelligence support (Threat Emulation) (UFMCS provides education for the first two tasks; TRADOC ' s Intelligence School and Center provides education on the third.) In order for a Red Team to effectively contribute to decision making all of the following elements are required:

- The ability to think

## Read Online Red Teaming Handbook V7

critically about the problem. While this may seem obvious, the reality is that critical thinking is a skill set that requires training, education and tools. The Army assimilates people from different backgrounds across the nation. One of the drawbacks of that assimilation is our military tendency to reflect the same biases and perspectives. We pride ourselves in common values—which while ingrained in the Army culture are not universal outside of that culture. • Thinking critically and challenging the group is an unnatural act for military staffs. Doing so effectively requires tools and methods that enable leaders to see different perspectives. • Red Teams

require top cover to be allowed to challenge the conventional wisdom and the organization ' s leaders. No matter the quality of the Red Team or the methods they employ, dictatorial or toxic leaders are incompatible with successful red teaming. • Red teaming is not easy, and not everyone can do it. Red Teamers must be effective written and oral communicators. They must have credibility in the area in which they are providing red teaming insights. They must be able to constructively challenge the plan. This means focusing on what is truly important, able to explain why it is being challenged and offering some alternative ways to think about the problem.

This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include

With the advances of technology and the reoccurrence of data leaks, cyber security is a bigger challenge than ever before. Cyber attacks evolve as quickly as the technology itself, and hackers are finding more innovative ways to break security controls to access confidential data and to interrupt services. Hackers reinvent themselves using new technology features as a tool to expose companies and individuals. Therefore, cyber security cannot be reactive but must go a step further by implementing proactive security controls that protect one of the most important assets of every organization: the company's information. Originally published in 1853, author Nathaniel Hawthorne delivers a vibrant selection of mythological tales inspired by some of the most popular figures in Greek lore. Tanglewood Tales is filled with whimsical characters and their fantastical stories. Nathaniel Hawthorne brings Ancient Greek mythology to life in this collection of Tanglewood Tales. The author reinterprets the stories for a younger audience with a broad appeal. The book contains heroes and heroines, as well as magicians and kings. Some of the most notable myths include “The Golden Fleece,” which centers Jason and the Argonauts. And “Circe's Palace,” which follows a battle of wits

A Guide to the Project Management Body of Knowledge

(PMBOK® Guide) – Seventh Edition and The Standard for Project Management (RUSSIAN)

All states and dominions which hold or have held sway over mankind are either republics or monarchies. Monarchies are either hereditary ones, in which the rulers have been for many years of the same family, or else they are those of recent foundation. The newly founded ones are either entirely new, as was Milan to Francesco Sforza, or else they are, as it were, new members grafted on to the hereditary possessions of a prince that annexes them, as is the kingdom of Naples to the King of Spain. The dominions thus acquired have either been

previously accustomed to the rule of another prince, or else have been free states, and they are annexed either by force of arms of the prince, or of others, or else fall to him by good fortune or merit. I will not here speak of republics, having already treated of them fully in another place. I will deal only with monarchies, and will show how the various kinds described above can be governed and maintained. In the first place, in hereditary states accustomed to the reigning family the difficulty of maintaining them is far less than in new monarchies; for it is sufficient not to exceed the ancestral usages, and to accommodate one's self to accidental circumstances; in this way such a prince, if of ordinary abilities will always be able to maintain his position, unless some ve

exceptional and excessive force deprives him of it; and even if he be thus deprived of it, on the slightest misfortune happening to the new occupier, he will be able to regain it. We have in Italy the example of the Duke of Ferrara, who was able to withstand the assaults of the Venetians in the year '84, and Pope Julius in the year '10, for no other reason than because of the antiquity of his family in that dominion. In as much as the legitimate prince has less cause and less necessity to offend, it is only natural that he should be more loved; and if no extraordinary vices make him hated, it is only reasonable for his subjects to be naturally attached to him, the memories and causes of innovations being forgotten in the long period over which his rule has existed; whereas one change always

studying. The relevance of these skills is shown throughout the text by highlighting the advantages of basing one's decisions on a thoughtful understanding of arguments and presenting the overarching commonalities across arguments. With its conversational writing style and carefully selected examples, the book employs a consistent and unified treatment of logical form and an innovative semiformal method of standardizing arguments that illustrates the concept of logical form while maintaining a visible connection to ordinary speech. Without sacrificing accuracy or detail, the authors clearly present the material, with appropriate study tools and exercises that emphasize application rather than memorization.
