A substantial collection of bibliographies close the volume, offering a compendium of sources for this burgeoning field.

Umberto Eco's wise and witty guide to researching and writing a thesis, published in English for the first time. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, *How to Write a Thesis*, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft. Now in its twenty-third edition in Italy and translated into seventeen languages, *How to Write a Thesis* has become a classic. Remarkably, this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. *How to Write a Thesis* is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious. Eco advises students how to avoid "thesis neurosis" and he answers the important question "Must You Read Books?" He reminds students "You are not Proust" and "Write everything that comes into your head, but only in the first draft." Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. *How to Write a Thesis* belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere. Already a classic, it would fit nicely between two other classics: *Strunk and White* and *The Name of the Rose*. Contents The Definition and Purpose of a Thesis • Choosing the Topic • Conducting Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft

Museum Thresholds is a progressive, interdisciplinary volume and the first to explore the importance and potential of entrance spaces for visitor experience. Bringing together an international collection of writers from different disciplines, the chapters in this volume offer different theoretical perspectives on the nature of engagement, interaction and immersion in threshold spaces, and the factors which enable and inhibit those immersive possibilities. Organised into themed sections, the book explores museum thresholds from three different perspectives. Considering them first as a problem space, the contributors then go on to explore thresholds through different media and, finally, draw upon other subjects and professions, including performance, gaming, retail and discourse studies, in order to examine them from an entirely new perspective. Drawing upon examples that span Asia, North America and Europe, the authors set the entrance space in its historical, social and architectural contexts. Together, the essays show how the challenges posed by the threshold can be rethought and reimagined from a variety of perspectives, each of which have much to bring to future thinking and design. Combining both theory and practice, Museum Thresholds should be essential reading for academics, researchers and postgraduate students working in museum studies, digital heritage, architecture, design studies, retail studies and media studies. It will also be of great interest to museum practitioners working in a wide variety of institutions around the globe.

The existence of World Literature depends on specific processes, institutions, and actors involved in the global circulation of literary works. The contributions of this volume aim to pay attention to these multiple material dimensions of Latin American 20th and 21st century literatures. From perspectives informed by materialism, sociology, book studies, and digital humanities, the articles of this volume analyze the role of publishing houses, politics of translation, mediators and gatekeepers, allowing insights into the processes that enable books to cross borders and to be transformed into globally circulating commodities. The book focusses both on material (re)sources of literary archives, key actors in literary and cultural markets, prizes and book fairs, as well as on recent dimension of the digital age. Statements of some of the leading representatives of the global publishing world complement these analyses of the operations of selection and aggregation of value to literary texts.

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She

illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Transplanting International Courts provides a deep, systematic investigation of the most active and successful transplant of the European Court of Justice. The Andean Tribunal is effective by any plausible definition of the term, but only in the domain of intellectual property law. Alter and Helfer explain how the Andean Tribunal established its legal authority within and beyond this intellectual property island, and how Andean judges have navigated moments of both transnational political consensus and political contestation over the goals and objectives of regional economic integration. By letting member states set the pace and scope of Andean integration, by condemning unequivocal violations of Andean rules, and by allowing for the coexistence of national legislation and supranational authority, the Tribunal has retained its fidelity to Andean law while building relationships with nationally-based administrative agencies, lawyers, and judges. Yet the Tribunal's circumspect and formalist approach means that, unlike in Europe, Community law is not an engine of integration. The Tribunal's strategy has also limited its influence within the Andean legal system. Transplanting International Courts also revisits the authors' path-breaking scholarship on the effectiveness of international adjudication. Alter and Helfer argue that the European Court of Justice benefitted in underappreciated ways from the support of jurist advocacy movements that are absent or poorly organized in the Andes and elsewhere in the world. The Andean Tribunal's longevity despite these and other challenges offers guidance for international courts in other developing country contexts. Moreover, given that the Andean Community has weathered member state withdrawals and threats of exit, major economic and political crises, and the retrenchment of core policies such as the common external tariff, the Andean experience offers timely and important lessons for Europe's international courts.

On 24 April 1942, Czechoslovak journalist and active CPC member Julius Fucik was detained in Pankrác Prison in Prague, where he was subsequently interrogated and tortured, before being sent to Germany to stand trial for high treason. It was during this time that Fucik's Notes from the Gallows (Czech: Reportáž psaná na oprátce, literally Reports Written Under the Noose) arose—written on pieces of cigarette paper and smuggled out by two sympathetic prison warders named Kolinsky and Hora. The notes were treated as great literary works after his death in 1943 and translated into many languages worldwide, resulting in this book, which was first published in English in 1948. It describes events in the prison since Fucik's arrest and is filled with hope for a better, Communist future.

This is the English edition of the first marketing book in Spanish to be adapted to the European Space for Higher Education, which has been written with the new requirements of the recent official degrees in mind. In addition to its theoretical presentation illustrated with many examples, each chapter starts with a business situation, and closes with a case study with practice topics, key terms and review questions, along with related Internet links and specific bibliography. In addition, teachers and students are provided with complementary on-line material on the book's website: www.miguelsantesmases.com/fm.htm This textbook presents the fundamentals of marketing, the market, the consumer's environment and behaviour, the marketing research, and the information systems. It later goes deeper into the marketing tools (product and services management, pricing, communication, sales, distribution and, lastly, the marketing plan), all supported by examples and case studies. Chapters dealing with relationship marketing, customer relations management, new communication technologies and emerging marketing techniques have also been included. Fundamentals of Marketing offers a modern approach, adapted to the new teaching methodologies which will make both the teaching and learning of the principles of marketing much easier.

Over the past half century, translation studies has emerged decisively as an academic field around the world, and in recent years the number of academic institutions offering instruction in translation has risen along with an increased demand for translators, interpreters and translator trainers. Teaching Translation is the most comprehensive and theoretically informed overview of current translation teaching. Contributions from leading figures in translation studies are preceded by a substantial introduction by Lawrence Venuti, in which he presents a view of translation as the ultimate humanistic task – an interpretive act that varies the

form, meaning, and effect of the source text. 26 incisive chapters are divided into four parts, covering: certificate and degree programs teaching translation practices studying translation theory, history, and practice surveys of translation pedagogies and key textbooks The chapters describe long-standing programs and courses in the US, Canada, the UK, and Spain, and each one presents an exemplary model for teaching that can be replicated or adapted in other institutions. Each contributor responds to fundamental questions at the core of any translation course – for example, how is translation defined? What qualifies students for admission to the course? What impact does the institutional site have upon the course or pedagogy? Teaching Translation will be relevant for all those working and teaching in the areas of translation and translation studies. Additional resources for Translation and Interpreting Studies are available on the Routledge Translation Studies Portal.

The Design and Media of Arrival

LLBA.

This book examines the moral role of news media practitioners and organizations, and applies a modified philosophical account of Aristotle's Ethics as a framework for the role of journalists—and journalism organizations—in public life. It shows how journalists and journalism organizations that adopt an aim towards professional excellence (virtue) by putting a premium on investigative journalism—and small measures depending on the nature of the reporting—can achieve lofty professional goals under modern deadlines. News media, both electronic and traditional, are imperative to an informed public, and an informed public is critical to a properly functioning cross-section of social, government and corporate domains. The book emphasizes the virtues of justice and integrity as foundational to professional practice. It examines the modern ethical challenges presented by organizations ranging from online upstarts to large conglomerates, each that have economic challenges that can inhibit professional excellence through corruption or corrosion. The author applies his account of virtue—bolstered by suggestions for complementary reforms in education and regulation—to improve the news media-challenged industry as it undergoes significant technological change.
