First published in 1971, The Country of Marriage is Wendell Berry's fifth volume of poetry. What he calls "an expansive metaphor" is "a farmer's relationship to his land as the basic and central relation of humanity to creation." "Similarly, marriage is the basic and central community tie; it begins and stands for the relation we have to family and to the larger circles of human association. And these relationships are in turn basic to, and may stand for, our relationship to God and to the

sustaining mysteries and powers of creation." Each of the thirty-five poems in this collection is concerned with this metaphor. The long sequence that is itself entitled "The Country of Marriage," perhaps the finest single work in the book, is a grave, moving, and beautifully wrought love poem. But the shorter lyrics have an equal grace and beauty—writing that contains the exhilarating lucidity of mountain spring water. And there are most notably, several more poems about the "Mad Farmer," who advises us here to 'every day do something that won't compute.' Berry has here perfected a work that is immediately accessible but that

becomes, as we read it again, always more satisfying, reverberant with manifold meanings. A collection of poems written outdoors on Sunday mornings over a span of more than two decades explores the beauty and spirituality of the natural world

Hannah Coulter is Wendell Berry's seventh novel and his first to employ the voice of a woman character in its telling. Hannah, the now-elderly narrator, recounts the love she has for the land and for her community. She remembers each of her two husbands, and all places and community connections threatened by twentieth-century technologies. At risk is the

whole culture of family farming, hope redeemed when her wayward and once lost grandson, Virgil, returns to his rural home place to work the farm.

The essays in The Gift of Good Land are as true today as when they were first published in 1981; the problems addressed here are still true and the solutions no nearer to hand. The insistent theme of this book is the interdependence, the wholeness, the oneness of people, land, weather, animals, and family. To touch one is to tamper with them all. We live in one functioning organism whose separate parts are artificially isolated by our culture. Here, Berry develops the

environmentalism, but his commentary on education has received comparatively little attention. Berry has been eloquently unmasking America's cultural obsession with restless mobility for decades, arguing that it causes damage to both the land and the character of our communities. Education, he maintains, plays a central role in this obsession, inculcating in students' minds the American dream of moving up and moving on. Drawing on Berry's essays, fiction, and poetry, Jack R. Baker and Jeffrey Bilbro illuminate the influential thinker's vision for higher education in this pathbreaking study. Each chapter begins with an examination of one of Berry's

Throughout, Baker and Bilbro argue that instead of training students to live in their careers, universities should educate students to inhabit and serve their places. The authors also offer practical suggestions for how students, teachers, and administrators might begin implementing these ideas. Baker and Bilbro conclude that institutions guided by Berry's vision might cultivate citizens who can begin the work of healing their communities -- graduates who have been educated for responsible membership in a

We often dismiss history as dull or irrelevant, but our modern disengagement from the past puts us fundamentally out of step with the long witness of the Christian tradition. Yet, says Margaret Bendroth, the past tense is essential to our language of faith, and without it our conversation is

limited and thin. This accessible, beautifully written book presents a new argument for honoring the past. The Christian tradition gives us the powerful image of a vast communion of saints, all of God's people, both living and dead, in vital conversation with each other. This kind of connection with our ancestors in the faith, Bendroth maintains, will not happen by wishing or by accident. She argues that remembering must become a regular spiritual practice, part of the rhythm of our daily lives as we recognize our world to be, in many ways, a

gift from others who have gone before. As in thought he passes backward into time, the country becomes quieter, and it seems to grow larger. The sounds of engines become less frequent and farther apart until they cease altogether. On a clear Kentucky night in 1888, a young woman risks her life to save a stranger from a drunken mob. Almost a hundred years later, her great-grandson Andy climbs a hill at the edge of town, and is flooded with memories of all he has lived, seen and heard of the past century of neighbourly feuds and family

secrets; of grief and betrayal - and of great friendship that endures for a lifetime.

Wendell Berry unravels the story of a town over the course of four generations, lovingly chronicling the intertwined lives of the families who call it home. Affectionate, elegiac and wry, these uplifting rural fables invite us to witness the beauty and quiet heroism at the heart of each ordinary, interconnected life.

An impassioned, thoughtful, and fearless essay on the effects of racism on the American identity by one of our country's

most humane literary voices. Acclaimed as “one of the most humane, honest, liberating works of our time” (The Village Voice), The Hidden Wound is a book-length essay about racism and the damage it has done to the identity of our country. Through Berry’s personal experience, he explains how remaining passive in the face of the struggle of racism further corrodes America’s great potential. In a quiet and observant manner, Berry opens up about how his attempt to discuss racism is rooted in the hope that someday the historical

wound will begin to heal. Pulitzer prize-winning author Larry McMurtry calls this “a profound, passionate, crucial piece of writing . . . Few readers, and I think, no writers will be able to read it without a small pulse of triumph at the temples: the strange, almost communal sense of triumph one feels when someone has written truly well . . . The Bonds of Home in an Industrial Landscape

Wendell Berry teaches us to love our places--to pay careful attention to where we are, to look beyond and within, and to live in ways that are not captive to the mastery of cultural, social, or economic assumptions about our life in these places. Creation has its own integrity and demands that we confront it. In *The Place of Imagination*, Joseph R. Wiebe argues that this confrontation is precisely what shapes our moral capacity to respond to people and to places. Wiebe contends that Berry manifests this

moral imagination most acutely in his fiction. Berry's fiction, however, does not portray an average community or even an ideal one. Instead, he depicts broken communities in broken places--sites and relations scarred by the routines of racial wounds and ecological harm. Yet, in the tracing of Berry's characters with place-based identities, Wiebe demonstrates the way in which Berry's fiction comes to embody Berry's own moral imagination. By joining these ambassadors of Berry's moral imagination in their fictive journeys, readers, too, can allow imagination to transform

blind to the damage industry has done--both to people and to the environment, but she shows us that there is also a rich human story that has gone largely untold, one that reveals, in all its ambiguities, the place of the industrial landscape in the heart. Singing the City is a celebration of a landscape that through most of its history has been unabashedly industrial. Convinced that industrial landscapes are too little understood and appreciated, Graham set out to investigate the city's landscape, past and present, and to learn the lessons she sensed were there about living a good life. The result, told in both her voice and the distinctive voices of the people she meets, is a powerful contribution to the literature of place. Graham begins by showing the city as an outgrowth of its geography and its geology--the factors that led to its becoming an industrial place. She describes the human investment in the area:

This vision is powerfully contrasted with that of modest Amish farmers content to live outside the pressures brought by capitalist postindustrial progress, and by working the land to keep away the three great evils of boredom, vice, and need. As Andy's perspective filters through his anger over his loss and the harsh city of San Francisco surrounding him, he begins to remember: the people and places that wait 2,000 miles away in his Kentucky home, the comfort he knew as a farmer, and his symbiotic relationship to the soil.
