The Power Report

Voici un nouveau livre sur l'innovation, fondé sur l'histoire du projet Kwid de Renault, nouvelle voiture globale, low cost, pour les marchés émergents, une cible au potentiel immense. Après le succès de l'épopée Logan, Renault affirme sa stratégie de conquête « par le bas » des marchés émergents

Tekhnicheskoe Obsluzhivanie

en commençant par l'Inde. Ce projet est né en développant une stratégie d'innovation « low end » qui introduit des compromis originaux entre valeur d'usage et coût des produits, ouvrant les marchés à des clients nouveaux, jusqu'ici délaissés par les innovations trop coûteuses et complexes. Le livre est organisé en 2 parties. La première raconte l'histoire du projet qui a conduit à la Kwid, depuis sa genèse stratégique jusqu'au déploiement commercial actuel sur le marché indien. La seconde partie met en perspective cette success story avec les théories sur l'innovation dans l'entreprise selon trois axes : La caractérisation des processus d'innovation capables de développer de telles innovations de rupture ; l'analyse des stratégies low cost dans les grands groupes et la mise en oeuvre de stratégies

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated

expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Positioning is hot. Not only in the realm of consumer goods manufacturers, but also for other companies, institutions, governments and even individual persons. An explosion of good quality products on the market and targeted media and advertising campaigns has led to an increasing interest from organizations as to how to strategically position their brand. Up to now, only a few books on positioning were published. Positioning the Brand picks up the gauntlet with an approach based on two fundamental choices: Firstly, the book was written

Tekhnicheskoe Obsluzhivanie  
from the perspective of the brand manager, and has therefore been shaped as a practical roadmap.

Secondly, this book advocates a new stance on positioning, teaching the reader to look from the inside-out, instead of adopting the usual outside-in methodology. This inside-out approach departs from an analysis of the corporate identity, enabling better fulfilment of external positioning, and ensuring internal support. This book is intended for (future) managers, marketing professionals and communication professionals responsible for the commercial success and reputation of a brand. The contents have a practical set-up, reinforced by engaging examples, and enable the

An in-depth, hard-hitting account of the mistakes, miscalculations and myopia that have doomed America's automobile industry. In the 1990s, Detroit's Big Three automobile companies were riding high. The introduction of the minivan and the SUV had revitalized the industry, and it was widely believed that Detroit had miraculously overcome the threat of foreign imports and regained its ascendant position. As Micheline Maynard makes brilliantly clear in THE END OF DETROIT, however, the traditional American car industry

was, in fact, headed for disaster. Maynard argues that by focusing on high-profit trucks and SUVs, the Big Three missed a golden opportunity to win back the American car-buyer. Foreign companies like Toyota and Honda solidified their dominance in family and economy cars, gained market share in high-margin luxury cars, and, in an ironic twist, soon stormed in with their own sophisticatedly engineered and marketed SUVs, pickups and minivans. Detroit, suffering from a “good enough” syndrome and wedded to ineffective

marketing gimmicks like rebates and zero-percent financing, failed to give consumers what they really wanted—reliability, the latest technology and good design at a reasonable cost. Drawing on a wide range of interviews with industry leaders, including Toyota's Fujio Cho, Nissan's Carlos Ghosn, Chrysler's Dieter Zetsche, BMW's Helmut Panke, and GM's Robert Lutz, as well as car designers, engineers, test drivers and owners, Maynard presents a stark picture of the culture of arrogance and insularity that led American car

by the end of the decade, one of the American
