Renault Parts Catalogue

The beautiful design of the Alpine Renault 'berlinettes' and their extraordinary performances in competition made them the cars to beat in the late 1960s and early 1970s. This book brings to life the efforts, successes and failures of the engineers and drivers that worked with the cars, and explores the 'berlinettes' development and history in fascinating detail.

replacement parts and providing repair services form the basis of many legitimate businesses, many manufacturing enterprises seek to augment the competitive advantage realized at the market stage of selling their main products by attempting to monopolize the market for spares, repairs and refills. Increasingly, companies are using intellectual property laws to devise up-front business strategies to gain exclusive rights in the components of their products. This is the first in-depth analysis of the law in this relatively new and rapidly developing area of practice. It sheds clear light on the

conflicting interests of manufacturers, consumers, spare parts makers and the general public; explores the extent to which this kind of business strategy can be more or less successful with respect to the different rights involved, and in different jurisdictions; and highlights the competition issues that inevitably arise. The essays included are revised and updated versions of papers presented at the seventh (2006) of the innovative IP conference organized annually by the Macau Institute of European Studies (IEEM) on intellectual property law and the economic challenges for Asia.

have guided and continue to guide business strategies in the field. Jurisdictions treated include the EU, the US, the UK, Germany, the Netherlands, China, Hong Kong, Japan, and Korea. In its clarification of the limits and possibilities of business strategies in this area of competition that is just beginning to attract attention, this book will be of great value not only to intellectual property law practitioners but to business people in nearly any field of production, especially where cross-border marketing is involved.

World Databases in Company Information

This is the 11th in the series of directories whose overall aim is to make sense of the myriad files in the marketplace by listing databases completely, and grouping them logically. The title, Company Information, implies a somewhat narrower focus than the directory offers, as the five sections are: Spares, Repairs, and Intellectual Property Rights

of global sustainability. Purchasing and Supply Chain Management, Second Edition, not only fully addresses the environmental, social and economic challenges of how companies manage purchasing and supply chains, but also delves deeper into emerging areas such as modern slavery, digital technologies and circular supply chains. In addition to explaining the basic principles and processes of both purchasing and supply chain management, the book evaluates how to develop

strategic and sustainable purchasing and supply chain management. Our key message is that purchasing and supply chain management needs to focus on value creation rather than cost cutting. This requires the development of new purchasing and supply chain models that involve circular supply structures, supply chain transparency and collaboration with new stakeholders in traditional sourcing and supply chain settings. Aimed at students, educators and

practitioners the book integrates sustainability into each chapter as a core element of purchasing and supply chain management. This second edition incorporates new examples and case studies from industry throughout, striking a balance between theoretical frameworks and guidelines for implementation in practice.

This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers – the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured? What does it take to engineer a successful vehicle? The story is told through the author's own journey around the globe – starting as a young graduate engineer working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its 'halo' sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes

story of three well-known vehicles, whose development teams were led by the author – the Nissan Qashqai, the Renault ZOE, and the Alpine A110 – revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on behind the glamour of the Motor Shows and the well-honed corporate press releases – work that is sometimes exciting, but often grindingly difficult.
