After Zurich (1995), Lisbon (1998), Orlando (2002), Taipei (2005) and Paris (2008), the International Conference on Weigh-In-Motion (ICWIM6) returns to North America to join with the North American Travel Monitoring Exhibition and Conference (NATMEC 2012). International WIM conferences are organized by the International Society for Weigh-In-Motion (ISWIM). The conference addresses the broad range of technical issues related to weighing sensors and systems, weight data management and quality assurance, enforcement, road operation and infrastructure related issues. It provides access to current research and best practices, in an international forum for WIM technology, standards, research, policy and applications. Heavy vehicle mass monitoring, assessment and enforcement are key actions to ensure road safety and fair competition in freight transport, facilitating the inter-modality, and to design and maintain reliable and durable road infrastructures, with a better compliance of weights and dimensions. WIM is becoming part of a global ITS for heavy traffic management, contributing to reduce the environmental impact of freight transport and to a better use of the existing road networks.

Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a “problem” with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it’s hard to avoid how alcohol really makes us feel...

terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking.

Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

The car world is full of fascinating characters, but few have a story to tell quite as remarkable and inspirational as Tom Hartley. Walking out of school at the age of 11, unable to read or write, Hartley set up his own business buying and selling cars.

From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as

"The Dealmaker." Tom has been at the top for over 40 years, survived and thrived through four recessions, and overcome three life threatening illnesses. In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional Romany family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having decided to drive himself around illegally, he was only 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, living in a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to clinch deals in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in the Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that comes through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dream come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven’t kept pace with today’s more hostile security environment, leaving millions vulnerable to attack. The Car Hacker’s Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. Then, once you have an understanding of a vehicle’s communication network, you’ll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker’s Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you’re curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker’s Handbook your first stop.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
