Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures.

Although you may not own the expensive tooling and machining to perform all or any of

the machining
required for a quality
build, you need to
understand the
principles,
procedures, and
goals for machining,
so you can guide

components so you
can provide astute
guidance and make
the best machine
work choices.

Machining
procedures included
are cylinder boring,
align boring/honing,
decking, valveseat
cutting, cam tunnel
boring, and a
multitude of other

services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, reconditioning connecting rods, and machining and matching valvetrain components are also covered.

Whether you're an enthusiast engine
