Our goal with this book, *Research on Enhancing the Interactivity of Online Learning*, is to present a juried, scholarly, and accessible review of research, theory, and/or policy on specific issues of interactive online learning for K-16 educators, administrators, and students of online learning. Online learning has become the norm rather than the exception for many of today’s students. Instructors are more willing to explore online learning options, students are enrolling in record numbers and colleges, as well as many K-12 institutions, are offering more online courses. As educators, we have more tools than ever to ensure online course success, but just as with a traditional class, we must continue to place emphasis on good pedagogy. To achieve good pedagogy, online teaching takes additional time and a restructuring of course content by the instructor. Student issues include coping strategies, ease of navigation, skills required to complete the course, availability of online resources, feedback from the instructor, and collaborative, interactive learning opportunities. Principles of interactive online learning are new to many, and this book provides a forum for interactive online learning research while also including ideas that enhance both the practical and theoretical aspects of interactive online learning. The editors have included chapters that can further knowledge and understanding of emerging trends and foster debate regarding issues that surround interactive online learning.

The International Student’s Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* (by Lionel Menasche, 1998) and partly a companion to *The ESL Writer’s Handbook*. Like *WRP*, teachers can move through the writing process in stages to end up with a thorough and coherent research paper. Like a handbook, the text is less dense, with explanations provided in sections for easy comprehension and practice exercises included.

Many students find literature reviews fiendishly difficult to write. That is because the literature review -- a paper summarizing a body of published works on a given topic -- requires the writer to abandon almost everything they've learned about writing and to use a brand new tone and approach. This booklet explains everything the writer needs to generate a successful literature review in step-by-step fashion. By focusing on tone and organization and showing the writer how to use a grid system to develop the paper, this booklet will turn a difficult project into a finished one. Table of Contents - How to Use This Booklet - What Is a Literature Review? - Step One: Understand the Assignment - A Preliminary Word About Tone - Step Two: Organize the Material - Step Three: Create Topic Sentences - Step Four: Complete the Paragraphs - Step Five: The First Paragraph - Step Six: Thesis and Tone - Step Seven: The Last Paragraph - Step Eight: The Final Check Here's what students have said about this method: "The grid made a big job seem really manageable." "Thank you for the guidance. I have made a breakthrough!" "Awesome!"

Carol Smallwood’s *The Complete Guide to Using Google in Libraries, Volume 1: Instruction, Administration, and Staff Productivity* explores how Google’s suite of tools, from Google Docs (now Google Drive), Google Scholar, Hangout, Forms, and others made freely available to the Internet Community can be used by libraries to expand the role of digital operations in the management of library materials, to communicate with their patrons and collaborators, to exploit the resources on the Web, and many others. The book has 29 chapters organized into sections that focus on ways that Google’s suite of tools can be applied to address problems in a specific area of library concern. The section headings are: Library Instruction for Users; Collaboration within and among libraries; Library Administration; Collection Management; and Library Productivity. In each topical area, the chapters show how librarians are taking advantage of these tools to change the way that their library works. All of this without the burden of an additional bill to pay. It provides numerous samples of writing through readings, specific guidelines on how to approach each rhetorical mode, writing assignments for each mode, and student and professional models of completed assignments. The book covers nine rhetorical modes and includes a complete unit on the research paper and a comprehensive handbook section. Prewriting, prewriting, and writing exercises offer guidance in the fundamentals of reading and writing. All chapters in Part II, "Writing the Essay," follow the same pedagogical structure: Readings for Ideas: story and poem; How to Write: writing assignment, specific instructions, professional model, student model, and alternate readings; Additional Writing Assignments; Rewriting Assignment; Photo Writing Assignment. Photo Writing Assignments give students practice in writing about what they see, rather than only about what they’ve read. Part IV, "A Handbook," includes exercises with answers at the back to provide immediate feedback for self-grading. For anyone interested in composition.

Elegant ideas deserve elegant expression. Sword dispels the myth that you can’t get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

For the most part, those who teach writing and administer writing programs do not conduct research on writing. Perhaps more significantly, they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities. By and large, those responsible for maintaining and improving writing instruction cannot -- without further training -- access work that could help them carry out their responsibilities more effectively. This book is designed as a text in graduate programs that offer instruction in rhetoric and composition. Its primary educational purposes are: * to provide models and critical methods designed to improve the reading of scientific discourse * to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric. Aiming to cultivate new attitudes toward empirical research, this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities, rather that methods extend the power of humanist researchers trying to solve the problems of their discipline.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, *Orwell's Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' – *Irish Times*

Faculty often worry that students can't or won't read critically, a foundational skill for success in academic and professional endeavors. "Critical reading" refers both to reading for academic purposes and reading for social engagement. This volume is based on collaborative, multidisciplinary research into how students read in first-year courses in subjects ranging from scientific literacy through composition. The authors discovered the good (students can read), the bad (students are not reading for social engagement), and the ugly (class assignments may be setting students up for failure) and they offer strategies that can better engage students and provide more meaningful reading experiences.

These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one’s writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities.
