Why have people from different cultures and eras formulated myths and stories with similar structures? What does this similarity tell us about the mind, morality, and structure of the world itself? From the author of *12 Rules for Life: An Antidote to Chaos* comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals, myths, and religious stories have long narrated. A cutting-edge work that brings together neuropsychology, cognitive science, and Freudian and Jungian approaches to mythology and narrative, *Maps of Meaning* presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind.

In practice, psychology has a social contract with the public to promote human and societal welfare, all the while responsible for the constant upkeep of systems that promote, maintain, and demand quality from health care professionals. In *Global Promise: Quality Assurance and Accountability in Professional Psychology*, editors Judy E. Hall and Elizabeth M. Altmaier examine the tools needed for evaluating the crucial components of quality assurance- education, training, accreditation and designation, licensing and credentialing, ethics, mobility, and continuing professional development- from an international perspective, with a specific focus on practices in the United States, Canada, the European Union, Latin America, Australia, and The Netherlands and vignettes on the United Kingdom, China and South Africa. This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide

Kantowitz, Roediger, and Elmes, all prominent researchers, take an example-based approach to the fundamentals of research methodology. The text is organized by topic--such as research in human factors, learning, thinking, and problem solving--and the authors discuss and clarify research methods in the context of actual research conducted in these specific areas. This unique feature helps students connect the concepts of sound methodology with their practical applications. Carefully selected real-world examples allow students to see for themselves the issues and problems that can occur in conducting

This updated edition includes easy-to-read screen shots as well as guidance on where to find answers to commonly asked student questions.

Based on the highest levels of Bloom's taxonomy, The Social Studies Helper easily integrates technology into every core high school social studies course as well as two electives. These creative assignments are designed to appeal to visual, auditory and kinesthetic learning styles as the students are immersed in research, role-playing, art, etc. This is the resource book that you will turn to again and again throughout the school year. The Social Studies Helper is all the help you'll need, with innovative activities and projects,

along with their rubrics and handouts, that are ready for use.

Volume two of a four volume set. This second edition has been extensively rewritten and should be of interest to both practitioners and students of organizational psychology.

Progress in Behavior Modification, Volume 2 reviews issues and developments in the field of behavior modification, with emphasis on a wide spectrum of child and adult disorders. Topics covered range from behavioral assessment and treatment of alcoholism to

sexual arousal in male sexual deviates, along with aversion therapy and research methods in behavior modification. Comprised of eight chapters, this volume begins with a discussion on the status and future trends in behavior assessment of alcoholism and behavior modification with alcoholics. The next chapter deals with therapy models, focusing on the domain of social learning, removal of fears, and assertive and social skill training. The discussion then turns to the measurement and generation of sexual

arousal in male sexual deviates; applications of behavior modification in nursing practice; aversion therapy and its clinical effects; deceleration of aberrant behavior among retarded individuals; and research methods in behavior modification. The final chapter examines clinical issues regarding behavioral self-control. This book should be of value to theoreticians, researchers, or practitioners in the fields of psychiatry, psychology, and behavior therapy as well as social work, speech therapy, education, and rehabilitation.

High Impact Teaching for Sport and Exercise Psychology Educators addresses the need for a resource on effective course design, assessment, content delivery, and classroom management that is specific to educators in the field of sport and exercise psychology and to working with the millennial learner. It provides discipline-specific ideas to improve teaching in higher education. The book provides an evidence-based guide of tried and tested teaching methods for teachers of sport and exercise psychology at all levels in all formats of

education. Irrespective of the level and prior teaching experience in sport and exercise psychology, this is a starting point for delivering significant learning experiences for students in this field of study. Second, it addresses the millennial learner and recommends future teaching and learning experiences in traditional, hybrid, and online formats. Finally, High Impact Teaching for Sport and Exercise Psychology Educators provides a positive approach to engaging students in an ongoing process of learning and

involvement in the field of sport and exercise psychology. This book is intended for any educator in a 2- or 4-year institution of higher education who is or will be teaching courses at the undergraduate or graduate level in sport and exercise psychology as well as students and practitioners in the areas of sport and exercise psychology and physical education. Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage students in their major and psychology department, impart

realistic expectations, and prepare them for life beyond college. Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors, department chairs, program directors, and deans, and both types of courses have become important sources for gathering pre- and post-coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and

developing a psychology-specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy, or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first-year students and, at graduation, for bringing closure, reinforcing the overall departmental

learning outcomes, and helping students apply their disciplinary knowledge in capstone experiences and post-graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design,

and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand-alone courses and offer concrete advice on counseling psychology graduates about how to use what they have learned beyond their higher education experiences.

disciplinary boundaries to address issues between individuals and their socio-cultural environments so as to design the most effective studies possible. The core philosophical and theoretical assumptions that underlie the strategies, designs, and techniques used when researching cultural issues are examined. The book reviews all the steps that go into doing cultural research from formulating the research problem to selecting the most appropriate method for data analysis. Realist and interpretivist paradigms together with the theory of cultural models and quantitative, qualitative, mixed-method, and multiple-design strategies are reviewed. Case studies, ethnographies, and interviewing techniques are emphasized throughout. Chapters open with learning objectives and end with a conclusion, a glossary, questions, exercises, and recommended readings. Numerous multidisciplinary examples, tables, and figures

Multivariate statistics and mathematical models provide flexible and powerful tools essential in most disciplines. Nevertheless, many practicing researchers lack an adequate knowledge of these techniques, or did once know the techniques, but have not been able to keep abreast of new developments. The Handbook of Applied Multivariate Statistics and Mathematical Modeling explains the appropriate uses of multivariate procedures and mathematical modeling techniques, and prescribe practices that enable applied researchers to use these procedures effectively without needing to

concern themselves with the mathematical basis. The Handbook emphasizes using models and statistics as tools. The objective of the book is to inform readers about which tool to use to accomplish which task. Each chapter begins with a discussion of what kinds of questions a particular technique can and cannot answer. As multivariate statistics and modeling techniques are useful across disciplines, these examples include issues of concern in biological and social sciences as well as the humanities.

An invaluable guide for homeopaths and

students of homeopathy! Renowned homeopathic counsellor and author, Liz Lalor lectures and writes on the symbiotic relationship between mental and emotional disturbance, and physical pathology. "A Psychological Analysis of the Delusion Rubrics" is an extensive Materia medica adaption of her second book "Homeopathic Psychiatry." In its original form, "Homeopathic Psychiatry" combined homeopathic rubric-repertorisation and traditional

counselling techniques to create an invaluable case taking manual. "A Psychological Analysis of the Delusion Rubrics" expands on this with a revised introduction, new Denial chapter and extended Materia medica to address the narrative behind the physical pathology. Homeopathic analysis of disease concentrates on unearthing the peculiar within the patient's story of their life. In this fresh adaption, Lalor focuses attention on the denial

process of the patient as they negotiate illness. The peculiar in the patient's narrative is the essence of the understanding of the use and meaning of the Delusion rubrics in case analysis. This book is an invaluable guide, both for homeopaths and students of homeopathy, to fully understand these previously misunderstood and underutilized rubrics in our repertory. ""Liz Lalor's book explores humanness within remedies and reflects the remedy

back to the psychodynamic delusion. It makes a difference in understanding my client's needs with incorporating Elizabeth Kubler Ross's 5 stages of grief and guides me in the right direction of support. A wonderful desktop companion for my device and clinic desk." Sally Bevan, Homeopath

"My entire understanding of delusion rubrics, how to decipher them, and subsequently how to apply them to my case-taking, changed considerably for

the better once I had read this very insightful book. Liz's experience with psychotherapy, coupled with her deep understanding of remedies and their psychological profiles, has enabled her to author a book of great significance and profound assistance to the practising homeopath.
