

Research Papers Special Place

This proceedings book features selected papers from the 9th National Scientific and Practical Conference “Digital Economy: Complexity and Variety Vs. Rationality,” which took place on April 17-18, 2019, in Vladimir (Russian Federation). It presents the latest research in the field of the digital economy, discussing its role in the creation of advantages for the state, entrepreneurship, and society, as well as the emergence of new economic risks. The chapters address the following topics: the importance of economy’s digital modernization, tools for the formation of the digital economy in Russia, specific features and perspectives of digital modernization of the regional economy, an overview of the social consequences of transition to the digital economy, financial components of the digital economy, legal challenges regarding the digital reality for society and state, and the main challenges and threats to the profession of jurisprudence in the context of the digitization of the economy. Intended for representatives of the academic community and researchers interested in the formation of the digital economy and digital society as well as undergraduates, postgraduates, and masters of economic specialties, the book is also a valuable resource for companies that use or wishing to implement digital technologies into their economic practices; and public and government employees involved with monitoring, control, and regulation of the digital economy.

First Published in 1989. Routledge is an imprint of Taylor & Francis, an Informa company.

Analysing well-known Hebrew medieval poets from a new, refreshing standpoint and focusing on less known authors and periods, this book shows the maturity of the research in this field. Written in English (and French) the articles make the Hebrew texts more easily available to scholars of comparative literature.

Global Ecotourism Policies and Case Studies

The SAGE Handbook of Criminological Research Methods

This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, “must-know” content on how to write high-quality articles. The book also addresses other, rarely discussed areas of scientific writing including dealing with rejected manuscripts, the reviewer’s perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book’s hallmark, and it aims to provide an accessible, comprehensive and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing

*work in a scientific journal is the lack of information on or experience with scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published. By its very nature, management is a multidisciplinary enterprise. Despite this, management research has tended to be organized around a number of discrete management disciplines with their own methodological outlooks. As a result, researchers in different fields often find it difficult to appreciate work outside their own area of specialization, so inhibiting much-needed collaboration across disciplinary boundaries. Management has emerged as a major area of research that has attracted students in growing numbers. However, there are still relatively few texts that are tailored specifically to the needs and interests of management researchers. Together with its companion volume, *Research Skills for Management Studies* (Routledge, 2003), this book offers management students a challenging but accessible introduction to research methods and concepts, irrespective of their field of specialization.*

*This volume highlights new research on Jewish spiritual and religious life in Poland before modern political ideas began to transform the Jewish world. It covers a range of topics. Three articles deal with rabbinic scholarship in the sixteenth and seventeenth centuries and a fourth presents accounts of Purim festivities at that time. The eighteenth-century studies focus on Jewish spirituality. Four articles deal with the Frankist movement, the main topics being Frankist propaganda; non-Christian Frankists; Jonathan Eibeschutz and the Frankists; and the influence of Frankism on Polish culture. There are four articles on hasidism-on the tsadik and the ba'al shem; the childhood of tsadikim in hasidic legends; the fall of the Seer of Lublin; and the hasidism of Gur-and one about Nahman Krochmal. Of the contributors to the core section on Jewish spiritual and religious life, four are Polish. Three contributors are working in Germany, where Jewish studies is likewise re-establishing itself. Other contributors are scholars from Canada, Israel, South Africa, the United Kingdom, and the United States. Some are themselves religious, others are secular; taken together, their contributions further the study of Jewish religious traditions in Poland, a topic central to an understanding of Jewish society and history in Poland but one which has long been considered marginal by the academic world. As in earlier volumes of Polin, substantial space is given to new research in other areas of Polish-Jewish studies. There is an extensive survey of the papal Holocaust papers, as well as contributions relating to education for girls, to Auschwitz as a site of memories, and to aspects of Jewish literature, politics, society, and economics. A young Polish scholar from Jedwabne has contributed a moving article on local reactions to news of the massacre of the Jews of that town. The review section include two separate essays with contrasting opinions on Yaffa Eliach's monumental study of Eishyshok. *Central European Jewish Émigrés and the Shaping of Postwar Culture: Studies in Memory of Lilian Furst**

Conducting research into crime and criminal justice carries unique challenges. This Handbook focuses on the application of 'methods' to address the core substantive questions that currently motivate contemporary criminological research. It maps a canon of methods that are more elaborated than in most other fields of social science, and the intellectual terrain of research problems with which criminologists are routinely confronted. Drawing on exemplary studies, chapters in each section illustrate the techniques (qualitative and quantitative) that are commonly applied in empirical studies, as well as the logic of criminological enquiry. Organized into five sections, each prefaced by an editorial introduction, the Handbook covers:

- Crime and Criminals
- Contextualizing Crimes in Space and Time: Networks, Communities and Culture
- Perceptual Dimensions of Crime
- Criminal Justice Systems: Organizations and Institutions
- Preventing Crime and Improving Justice

Edited by leaders in the field of criminological research, and with contributions from internationally renowned experts, The SAGE Handbook of Criminological Research Methods is set to become the definitive resource for postgraduates, researchers and academics in criminology, criminal justice, policing, law, and sociology. David Gadd is Professor of Criminology at Manchester University School of Law where he is also Director of the Centre for Criminology and Criminal Justice. Susanne Karstedt has a Chair in Criminology and Criminological Justice at the University of Leeds. Steven F. Messner is Distinguished Teaching Professor of Sociology, University at Albany, State University of New York.

This Handbook charts the growing area of journalism studies, exploring the current state of theory and setting an agenda for future research in an international context. The volume is structured around theoretical and empirical approaches, and covers scholarship on news production and organizations; news content; journalism and society; and journalism in a global context. Emphasizing comparative and global perspectives, each chapter explores: Key elements, thinkers, and texts Historical context Current state of the art Methodological issues

Merits and advantages of the approach/area of studies
Limitations and critical issues of the approach/area of studies
Directions for future research
Offering broad international coverage from top-tier contributors, this volume ranks among the first publications to serve as a comprehensive resource addressing theory and scholarship in journalism studies. As such, the Handbook of Journalism Studies is a must-have resource for scholars and graduate students working in journalism, media studies, and communication around the globe.

Contains articles presented at the 2004 Northeastern Recreation Research Symposium. Contents cover place attachment, diverse populations, tourism economics, visitor management, tourism development, perceptions, preferences and attitudes, trends, visitor choice and resource attributes, norms and carrying capacity, specialization and participant development, planning and administration, submitted papers from the poster session.

Statistics for Research in Psychology offers an intuitive approach to statistics based on estimation for interpreting research in psychology. This innovative text covers topic areas in a traditional sequence but gently shifts the focus to an alternative approach using estimation, emphasizing confidence intervals, effect sizes, and practical significance, with the advantages naturally emerging in the process. Frequent opportunities for practice and step-by-step instructions for using Excel, SPSS, and R in appendices will help readers come away with a better understanding of statistics that will allow them to more effectively evaluate published research and undertake meaningful research of their own.

This book presents endeavors to join synergies in order to create added value for society, using the latest scientific knowledge to boost technology transfer from academia to industry. It potentiates the foundations for the creation of knowledge- and entrepreneurial cooperation networks involving engineering, innovation, and entrepreneurship stakeholders. The Regional HELIX 2018 conference was organized at the University of Minho's School of Engineering by the MEtRICs and Algoritmi Research Centers, and took place in Guimarães, Portugal, from June 27th to 29th, 2018.

After a rigorous peer-review process, 160 were accepted for publication, covering a wide range of topics, including Control, Automation and Robotics; Mechatronics Design, Medical Devices and Wellbeing; Cyber-Physical Systems, IoT and Industry 4.0; Innovations in Industrial Context and Advanced Manufacturing; New Trends in Mechanical Systems

Development; Advanced Materials and Innovative Applications; Waste to Energy and Sustainable Environment; Operational Research and Industrial Mathematics; Innovation and Collaborative Arrangements; Entrepreneurship and Internationalization; and Oriented Education for Innovation, Engineering and/or Entrepreneurship.

Bringing together leading authorities, this unique handbook reviews the breadth of current approaches for studying how people think, feel, and behave in everyday environments, rather than in the laboratory. The volume thoroughly describes experience sampling methods, diary methods, physiological measures, and other self-report and non-self-report tools that allow for repeated, real-time measurement in natural settings. Practical guidance is provided to help the reader design a high-quality study, select and implement appropriate methods, and analyze the resulting data using cutting-edge statistical techniques. Applications across a wide range of psychological subfields and research areas are discussed in detail.

The period of transition from socialism to capitalism in parts of Europe and Asia over the past 25 years has attracted considerable interest in academia and beyond. From the Editors of Palgrave's iconic series 'Studies in Economic Transition' comes the Palgrave Dictionary of Emerging Markets and Transition Economics. This dictionary addresses the needs of students, lecturers and the interested general public to quickly find definitions and

explanations of topics, institutions, personalities and processes in this historical phase of changing societies, which as such is not concluded. Today newly emerging market economies try to learn from the experiences of transition economies. Those who love The New Palgrave Dictionary of Economics will enjoy the format of this Dictionary, which uses an encyclopaedia-based approach, where articles not only define the terms but provide an overview of the evolution of the term or theory and also touch on the current debates.

During the first and second millennia BCE a swathe of nomadic peoples migrated outward from Central Asia into the Eurasian periphery. One group of these people would find themselves encamped in an unpromising, arid region just south of the Caspian Sea. From these modest and uncertain beginnings, they would go on to form one of the most powerful empires in history: the Persian Empire. In this book, Geoffrey and Brenda Parker tell the captivating story of this ancient civilization and its enduring legacy to the world. The authors examine the unique features of Persian life and trace their influence throughout the centuries. They examine the environmental difficulties the early Persians encountered and how, in overcoming them, they were able to develop a unique culture that would culminate in the massive, first empire, the Achaemenid Empire. Extending their influence into the maritime west, they fought the Greeks for mastery of the eastern Mediterranean—one of the most significant geopolitical contests of the ancient world. And the authors paint vivid portraits of Persian cities and their spectacular achievements: intricate and far-reaching roadways, an astonishing irrigation system that created desert paradises, and, above all, an extraordinary reflection of the diverse peoples that inhabited them. Informed and original, this is a history of an incomparable culture whose influence can still be seen, millennia later, in modern-day Iran and the wider Middle East.

Women in Gaming: 100 Professionals of Play is a celebration of female accomplishments in the video game industry, ranging from high-level executives to programmers to cosplayers. This insightful and celebratory book highlights women who helped to establish the industry, women who disrupted it, women who fight to diversify it, and young women who will someday lead it. Featuring household names and unsung heroes, each individual profiled is a pioneer in their own right. Key features in this book include: *100 Professionals of Play: Interviews and Special Features with 100 diverse and prominent women highlighting their impact on the gaming industry in the fields of design, programming, animation, marketing, voiceover, and many more. *Pro Tips: Practical and anecdotal advice from industry professionals for young adults working toward a career in the video game industry. *Essays: Short essays covering various topics affecting women in gaming related careers, including "Difficult Women: The Importance of Female Characters Who Go Beyond Being Strong," "NPC: On Being Unseen in the Game Dev Community," and "Motherhood and Gaming: How Motherhood Can Help Rather Than Hinder a

Career." *"A Day in the Life of" Features: An inside look at a typical day in the gaming industry across several vocations, including a streamer, a voice actor, and many more.

1) The presented book JPSC (Jharkhand public Service Commission) General Studies Preliminary exam paper I & paper II prepared in a manner that will be very useful for the candidates who are preparing the upcoming JPSC Preliminary exams. 2) This book consist 20 Model Papers of paper I & paper II with previous years solved papers of 2003-2021 along with authentic answers and detailed explanations. 3) These solved Papers and Model paper will help to candidates for boosting the preparation level to excel in the upcoming exam. 4) This book provides you an idea of questions that have been asked in the previous year's exams, so an aspirant can do better preparation for upcoming exams. This book also helpful for those candidates who wants quick revision and multiple time practice before exams. 5) The power of practice to perform exceptionally well in the exam. It will help candidates figure out their doubts and fears and will give the real feel of the exam.

This text provides an accessible and up to date guide to study skills for all those undertaking degrees and foundation degrees in policing. It will also be relevant to degree courses in criminology and criminal justice. Efficient study skills pave the way to successful learning. This book helps policing students with all aspects of their studies including identifying how they learn best, effective note-taking, how to be critical and analytical in their reading, writing and thinking, how to carry out research and writing a final dissertation.
